7" ELECTRONIC MULTISTAGE SUBMERSIBLE PUMPS

7" submersible electronic multi-impeller pump designed for use in water wells, tanks or cisterns. The pump is suitable for use in residential building service for pressurization, rainwater reuse and gardening and irrigation.
The pressure switch and flow switch integrated with the electronic board, make the pump completely automatic for the switching on/off and dry running protection. It integrates a double mechanical seal, a not return valve and a handle for ease transport and installation. Built with a innovative modular design: the hydraulic part, the motor, the electrical part and the filter can be disassembled separately, simplifying the maintenance activity.
The suction height is adjustable from the bottom up to 8 cm using the special accessory supplied as standard. A float can be connected without compromising the water tightness of the pump thanks to the NFC pocket. Integrated 0.04-litre expansion vessel with no need for maintenance or refilling. The cable has a quick coupling for easier installation inside the tank/cistern.
The pump is also available in X version with 1" intake and kit X which includes 1 meter suction hose and float to prevent the suction of impurities from the bottom. The whole pump is classified as IP 68. With the accessory DOC68 (supplied separately) becomes a surface pump to be used under the water level.
* Certified version for drinking water is available on request.

Flow rate maximum 7,2 m³/h.
Head up to 45 m.
Maximum immersion depth 12 m.
Type of pumped liquid Clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallized and chemically neutral.
Free passage 2 mm.
Liquid temperature range from +0°C to +50°C.
Maximum immersion depth 15 m.
Set cut-in 2,4 bar (+-0,2).
Outlet connection Thread 1" 1/4.
Pump maximum diameter 185 mm.
Protection class IP 68.
Motor insulation class F.
Power cable (m) and plug 15 m with plug.
Possible type of installation Fixed, horizontal or vertical. Submerged or semi-submerged. It can be installed on the surface, under the water level, or outside in a vertical position with the DOC68 accessory (supplied separately).

DCONNECT MAINTENANCE SERVICES PACK

REMOTE CONTROL FOR ELECTRONIC RESIDENTIAL AND COMMERCIAL SYSTEMS

DCONNECT MAINTENANCE SERVICES PACK

RELIABLE SUPPORT FOR AN EFFICIENT SYSTEM WITHOUT SURPRISES

GREATER EFFICIENCY | GREATER RELIABILITY | GREATER SAVINGS

GOLD AND SILVER PACKS

MAINTENANCE PACKAGES* WITH
COMPLETE REMOTE CONTROL OF YOUR SYSTEM

GOLD PACK

SILVER PACK

DAB now offers its customers two **new complete and highly professional services** based on DAB Pumps' four decades of experience, with specific support for every type of system.

FEATURES

- **Optimal control of set-up**, specific to every pump or pumping system;
- **Functional control of the pump,** after installation;
- **Quick intervention,** thanks to alerts in real time;
- **Complete remote control of the pumps,** with the DConnect app that signals any faults or errors in real time.

MAIN BENEFITS

Constant control and meticulous maintenance ensure:

- GREATER EFFICIENCY
- GREATER RELIABILITY
- REAL ENERGY SAVINGS
- GREATER DURABILITY OF THE SYSTEM

* Contact your nearest DAB branch or retailer to check availability and prices of the maintenance packages in your area of interest.

MODULARITY AND CONNECTIVITY
THE REVOLUTION OF WATER PRESSURISATION

ESYBOXLINE.COM

DAB
WATER•TECHNOLOGY

INDEX - ESYBOX LINE

DISCOVER THE HISTORY OF esybox LINE

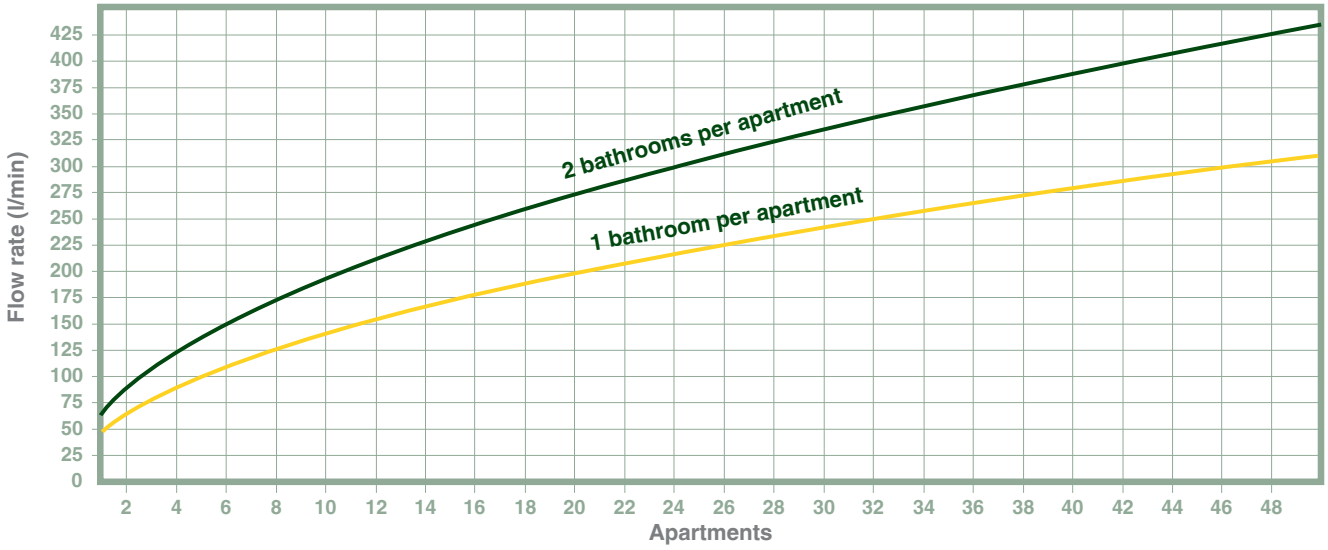
WHICH ESYBOX DO YOU NEED? FOLLOW THESE STEPS:

1 CALCULATION OF THE FLOW RATE

Flow rate curves in relation to the number of apartments.

TOILET TANKS

TOILET FLUSHING TAPS



2 CALCULATION OF THE HEAD

$$Head\ [m] = 3.6 \cdot \#\ floors + 20\ m$$

3.6: assuming a height per floor of 3 metres + pressure losses due to friction in the pipes equal to 20% of the total height of the building.

20 m: pressure required by the most disadvantaged user (2 bar).

The suction pressure is not taken into account as the standards prohibit direct connection of the aqueduct to the pump.
To this value must be added the pressure losses due to the devices installed in the system (softeners, boilers, ...).

EXAMPLE OF SIZING

EXAMPLE	CALCULATION	CHOICE
2 APARTMENTS EACH WITH 2 BATHROOMS 2 FLOORS 	*Flow rate required* = **51 l/min** *Head required = 3.6 · 2 + 20* = **28 m**	esybox mini³ 
5 APARTMENTS EACH WITH 2 BATHROOMS 3 FLOORS 	*Flow rate required* = **79 l/min** *Head required = 3.6 · 3 + 20* = **31 m**	esybox 
15 APARTMENTS EACH WITH 2 BATHROOMS 6 FLOORS 	*Flow rate required* = **136 l/min** *Head required = 3.6 · 6 + 20* = **42 m**	esybox max 

WARNING: the calculations and tables shown on these pages are based on our experience and can never replace the calculations made by a qualified technician: they are therefore only intended to give a general, non-binding indication for planning purposes.

ESYBOX MINI 3

ELECTRONIC PRESSURISATION SYSTEM

NEW

esybox mini 3

ESYBOX MINI 3 is the DAB compact automatic pressurisation system for the water supply of a single dwelling.
ESYBOX MINI 3 guarantees the comfort of constant pressure (Pressure Set Point adjustable from 1 up to 5,5 bar) inside the system, and energy savings thanks to the inverter technology.
Suitable for use with drinking water, in domestic systems, and in gardening applications.
ESYBOX MINI 3 does not require any additional components for its installation.
It consists of a high frequency self-priming double impeller pump, management inverter electronics, pressure and flow sensors, adjustable high resolution LCD display with 1 litre built-in expansion vessel, and cartridge check valve.
The double suction and delivery ports allow both vertical and horizontal installation.
Thanks to its compact sizes, installation is also possible in difficult places without high air exchange.

Operating range
Capacity up to 4,8 m³/h; head up to 55 m.

Liquid quality requirements
Clean, free from solid or abrasive contaminants, not viscous, not aggressive, not crystallised and chemically neutral.

Liquid temperature range
From 0°C to +35°C for domestic use.
For other use from 0°C to +40°C.

Maximum suction depth 8 meters.

Maximum ambient temperature +50°C.

Maximum operating pressure
7,5 bar (750 kPa).

Motor protection rating IPX4.

Insulation class F.

Installation Horizontal or vertical fixed position.

Special executions on request
Alternative types of electrical plug.

ESYBOX

ELECTRONIC PRESSURISATION SYSTEM

esybox

ESYBOX is DAB's new integrated system for pressurisation in domestic and residential areas.
ESYBOX does not require any additional components for installation. It consists of a self-priming multistage pump, electronic inverter management, flow and pressure sensors, high-resolution swivel LCD display and an integrated 2 liter expansion tank. It can be installed both vertically and horizontally and even in tight spaces without a high air exchange.
The water-cooled engine, the hull protection in ABS with sound-absorbing function, the vibration damping feet and electronics make it an absolutely quiet (**43 dB**) and compact.
The wireless device facilitates the creation of pressurisation units and connectivity with other DAB devices.

Operating range
Capacity up to 7,2 m³/h; head up to 65 m.

Degree of protection IP X4.

Insulation class F.

Pumped liquid clean, free from solids or abrasive, not aggressive, not viscous, not crystallized and not chemically neutral.

Maximum liquid temperature 40° C.

Maximum ambient temperature 50° C.

Maximum suction depth
self priming up to 8 metres.

Maximum working pressure 8 bar (800 kPa).

Installation Horizontal or vertical fixed position.

Special executions on request
Alternative types of electrical plug.

ESYBOX DIVER

7" MULTISTAGE SUBMERSIBLE PUMPS WITH VARIABLE FREQUENCY DRIVE

esybox DIVER

7" multi-stage electronic pump with variable frequency drive for clean water designed for use in wells, tanks or cisterns.
The pump can be used submerged, partially submerged or on the surface (with the DOC68 accessory, supplied separately).
The pump is suitable for pressurisation, rainwater re-use and gardening and irrigation activities in residential building service. The pump integrates the variable frequency drive for operation according to the system requirements a not return valve and a handle in stainless steel for transport. The electronic operation also protects against dry running and the VFD saves energy. The suction height is adjustable from the bottom up to 8 cm. It is possible to connect a float and a level sensor without compromising the water tightness of the pump thanks to the NFC (Near Field Communication) pocket. Equipped with expansion tank making the use of an additional expansion tank superfluous.
Integrated 0.04-litre expansion vessel with no need for maintenance or refilling. 15-metre power cable with plug.
Wi-Fi connectivity as standard. The DConnect Box 2 is included, by downloading the DConnect APP for Android or iOS you can control the pump from your smartphone.
The pump is available in X version with 1" inlet and X kit which includes 1 meter suction hose and float to prevent the suction of impurities from the bottom. The whole pump is IP 68 certified, it can be used on the surface (under head).

Flow rate maximum 7,2 m³/h.
Head up to 55 m.
Maximum immersion depth 12 m standard version.
Type of pumped liquid Clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallized and chemically neutral.
Free passage 2 mm.
Liquid temperature range from +0°C to +50°C.
Maximum immersion depth 15 m.
Set cut-in 2,4 bar (±0,2).
Outlet connection Thread 1" 1/4.
Pump maximum diameter 185 mm.
Protection class IP 68.
Motor insulation class F.
Power cable (m) and plug 15 m with plug.
Possible type of installation Fixed, horizontal or vertical. Submerged or semi-submerged. It can be installed on the surface, under the water level, or outside in a vertical position with the DOC68 accessory (supplied separately).

2 ESYBOX WITH ESYTWIN

ELECTRONIC PRESSURISATION SET

2 ESYBOX + ESYTWIN is the electronic water pressurisation set for domestic and residential environments.
The installation of 2 ESYBOX + ESYTWIN does not require any additional components. It consists of two multistage self-priming pumps with inverter electronics, pressure and flow sensors, adjustable high resolution LCD display, and 2 litre built-in expansion vessel for each pump.
The water cooled motor, the sound-proofing ABS protection guards, the anti-vibration feet and the electronics, make this a completely silent (45 dB) and compact product.
The wireless device facilitates the creation of pressurisation sets and the connection to other DAB devices.
The kit consists of two ESYBOX and one ESYTWIN.
The components are supplied disassembled.

Operating range
Capacity up to 14,4 m3/h; head up to 65 m.

Protection class IP X4.

Insulation class F.

Pumped Liquid clean, free of solids and abrasives, not viscous, not aggressive, not crystallised and chemically neutral.

Maximum temperature of liquid 40 °C.

Maximum ambient temperature 50 °C.

Maximum suction capacity
Self-priming to 8 metres.

Maximum operating pressure 8 bar (800 kPa).

ESYBOX MAX

ELECTRONIC PRESSURISATION SYSTEM

Integrated pumping system for water pressurisation in commercial building service.
Available in two power sizes, the system is composed of **modular elements** that allow different configurations: single, double, triple or quadruple unit are possible, to cover the needs of medium/large condominiums and high buildings (even over 14 floors).
Each unit consists of the hydraulic connection base and the pumping unit which includes an electronic vertical multi-impeller pump, display, Wi-Fi module, pressure sensors, not return valve on delivery and an expansion tank, **all integrated**.
The innovative support base of the pumping unit and the wireless communication between the pumps make it possible to **assemble the unit directly at the installation site (O.S.A. concept)** even by one person.
The variable frequency drive keeps the pressure constant by varying the frequency of the motor according to the request and also thanks to the water-cooled permanent magnet motor it allows greater efficiency and energy savings.
The large display allows easy configuration of the operating parameters with the possibility of viewing them from a smartphone (via the DConnect APP) or remotely via the DConnect service.
The expansion module (esy I / O, available as an accessory) gives the possibility to interface Esybox max with the BMS.

Operating range
Capacity up to 17,4 m³/h (single pump unit);
Head up to 96 m.
Type of pumped liquid Clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallized and chemically neutral.
Liquid temperature +50°C.
Maximum room temperature +55°C.
Maximum inlet pressure 5 bar.
Nominal pressure (PN) 12 bar / 1200 kPa.
Maximum differential pressure
9.4 bar (85/120); 6.7 bar (60/120).
Constant pressure range
1-12 bar (3 bar by default).
Maximum suction height
4 m (with bottom valve)
Motor protection class IP X5.
Motor insulation class F.
Impeller material
technopolymer with steel wear rings
Single phase power input 208-240 V 50/60 Hz.
Three phase power input 380-480 V 50/60 Hz.
Type of installation Fixed in vertical position.
Certification WRAS, NSF61, ACS

ESYBOX MAX

ELECTRONIC PRESSURISATION SYSTEM

Efficiency at the state of the art

The DAB inverter has been combined with a brand new permanent magnet motor. We also designed completely new hydraulics, making it leap ahead in terms of energy efficiency.

20%
Energy Saving

What about logistics

Esybox Max will improve the storage efficiency in your warehouse.
Where there was once one booster occupying space, you can now fit three in its place, that's three times more efficient!
This allows you to store the full range on one pallet, meaning your customer can pick up an off the shelf booster solution of up to 4 pumps the same day.

That's efficient!

1 PIECE OF 2KVC AD

6 PIECES OF ESYBOX MAX
+
3 PIECES OF 2ESYDOCK MAX

As quick as a "click"

Install Esydock into your pipework system and simply "plug" your pumps in. A final quick set up via the digital DConnect app completes your installation project.

ESYBOX MAX

ELECTRONIC PRESSURISATION SYSTEM

OSA
ON SITE ASSEMBLY

Easy to move & install

Keeping it flexible, we have the On-Site Assembly concept. So if you have difficulties getting to the pumps location, due to narrow stairways and corridors etc.., you can choose to assemble your booster on-site which will only require moving smaller lighter boxes into the location then carry out our quick assembly steps.

D CONNECT

Affordable web based remote control for your installation

You can use your smartphone to connect directly with the pump using the simple interface. It will automatically detect the language, time and unit of measurement at the installation site, which will save you time during the first set up of the system.

All adjustments are possible remotely allowing total control with no unwanted surprises.
DConnect makes monitoring DAB products easy and intuitive.

MCE/C

INVERTER

MCE/C inverters are used for the management of circulation pumps and set themselves apart due to ease of use, power, simplicity of installation and management.
MCE/C inverters are designed for use with circulator pumps to enable simple control of differential pressure, thereby adapting pump performances to match effective system requirements.
The solution of mounting on the motor base greatly simplifies installation of the pump with **MCE/C** in minimal times.
Ease of programming is guaranteed by the use of an interface similar to DAB Dialogue and a graphic display.
MCE/C inverters feature dual microprocessor architecture to guarantee maximum efficiency and reliability. Sturdy and reliable construction is combined with modern and innovative styling to complete the product also in terms of aesthetics.
MCE/C inverters protect the pump thanks to integrated safety devices. They are also able to prolong the useful lifetime of the pump thanks to the elimination of water hammer and rotation of the pump at the minimum rpm necessary to meet the requirements of the user.

Last but not least, these inverters save power by keeping pump consumption to the minimum levels strictly necessary to meet user requirements.

Equipped with communication module for the creation of twin pump sets.
Should ΔP-v proportional differential pressure regulation be required, specify the pump model on which the inverter will be installed.
When installing twin sets, the connection cable must be ordered separately.

MCE/P

INVERTER

MCE/P inverters are used for the management of pressurization pumps intended for complex professional applications.
MCE/P inverters can drive three-phase pumps up to 15kW.
These units combine the simplicity with the robust design and power of an inverter drive.
MCE/P are mounted on the pump, and are equipped with pressure sensors and the **optional flow sensors** as required. The use of a flow sensor, moreover, allows a better pressure regulation.
The **MCE/P** can easily be set up in booster sets,thanks to a standard wire cable connection.
Comfort, energy saving, protections and simplicity are the keywords of this professional series.

The **MCE/P** units are air cooled.
The **MCE/P** can be easily installed in existing systems and can operates with all pumps Facility to create sets with interchange of up to 8 pumps.

ADAC
INVERTER

ADAC inverters are intended for **HEAVY PROFESSIONAL APPLICATIONS.**
They can drive pumps of up to 15 kW. These units combine the simplicity with the robust design and power of an inverter drive. They can be installed in a control panel and must be supplied with external pressure.
The use of a flow sensor (OPTIONAL), allows a better pressure regulation.
The **ADAC** can easily be set up in booster sets,thanks to a standard wire cable connection.
Comfort, energy saving, protections and simplicity are the keywords of this professional series.

The ADAC units are air cooled. These extremely robust panel-mounting inverters feature a metal body and are suitable for heavy-duty applications. ADAC ensure the utmost practicality and increase the average working life of the system, permitting also significant savings in power consumption.

ACTIVE DRIVER PLUS

INVERTER

ACTIVEDRIVER plus

Active Driver Plus are inverters used for the control of hydraulic pumps. Their obvious fields of application are domestic, industrial, and agricultural constant pressure pumping systems.
The OLED display offers an extremely simple and intuitive graphic interface. Displaying or changing any parameters is extremely simple, which in turn also simplifies maintenance.
Installation is also very easy: the installation wizard asks the user for the parameters required for the configuration.
Active Driver Plus inverters provide a reduction of electric consumption, thanks to the inverter technology, whilst at the same time ensuring maximum comfort thanks to the constant pressure.
They are extremely versatile, as they do not require external sensors and not return valves. There is in-fact a built-in pressure sensor, a flow switch, and a not return valve.
The advantages of Active Driver Plus are:
- Comfort, thanks to the constant pressure,
- Energy savings, thanks to the inverter technology.
- Less noise,
- Compact shape,
- All the built-in protections: dry run, overload, abnormal voltage, overtemperature, freezing.

Line voltage 115V and 230V single-phase. 400V three-phase.

Electric pump voltage 115V and 230V single-phase; 230V and 400V three-phase.

Power supply frequency 50 Hz - 60 Hz.

Installation
Vertical and horizontal (M/M and M/T only).

Maximum liquid temperature 50°C.

Max operating temperature 50°C.

Max flow rate 18m³/h.

Maximum working pressure 13 bar.

Pressure regulation range from 1 to 13 bar.

Suction diameter (DNA) 1 1/4" male.

Delivery diameter (DNM) 1 1/2" female.

Protection level IP55.

Communication interface for sets
YES, an Active Driver Plus for each pump.

Not return valve not required.
Equipped with graphic display.

EBOX

ELECTRONIC PROTECTION AND CONTROL PANEL

Ebox plus D

Ebox basic

ebox

EBOX BASIC

Electronic control panel for the protection and automatic operation of one or two single-phase submersible or pressurization pumps for domestic applications. Compatible with all pump models with current between 1 and 12 A with power up to 2,2 kW, as shown in the product compatibility table.
Available with 3" display (D versions) which guide the installer during the initial installation settings, monitor the status of the pumps and sensors, set the start/stop levels and view the error list. It is also possible to take advantage of the Dconnect service, which allows you to monitor and control the systems remotely, on a smartphone, PC or tablet. The service is available only by purchasing the DConnect Box.

EBOX PLUS

Electronic control panel for the protection and automatic operation of one or two submersible or pressurization pumps, both single-phase and three-phase, installed in residential building service or commercial building service. Thanks to the possibility of regulating the current, the panel is compatible with all pump models supplied with current between 1 and 12 A with power up to 5,5 kW as shown in the product compatibility table.
Available with 3" display (D versions) which guide the installer during the initial installation settings, monitor the status of the pumps and sensors, set the start/stop levels and view the error list. It is also possible to take advantage of the Dconnect service, which allows you to monitor and control the systems remotely, on a smartphone, PC or tablet. The service is available only by purchasing the DConnect Box.

Nominal tension of power supply
Ebox plus 1 x 230 V / 3 x 230 V - 3 x 400 V (automatic selection).
Ebox basic 1x 230 V.
Frequency 50 - 60 Hz.
Maximum use of power
Ebox plus 5,5 kWatt + 5,5 kWatt.
Ebox basic 2,2 kWatt + 2,2 kWatt.
Maximum use of current 12 A + 12 A.
Starting capacitor
Kit supplied as an accessory.
Limits of use ambient temperature
-10°C +40°C.
Limits of storage temperature -25°C +55°C.
Relative humidity to the air 90% a 20°C.
Max altitude max 1000 s.l.m.
Degree of protection IP 55.
Reference standard for the construction of the panels EN 60335-1.

DISPLAY

Thanks to the configuration wizard, installation of display versions is much simpler.

Management is also much easier, thanks to the status always being visible and to a range of additional functions, such as the anti-seizing of drainage pumps, the alarm log, the language selection, and the password protected settings.

SMART PRESS

ON/OFF CONTROLLER

The SMART PRESS controls starting and stopping of the pump.
This device offers dry run protection for the pump.
It is advisable to use an expansion vessel.

SMART PRESS has an adjustable minimum restart pressure and with high flow rates, pressure losses are low.
All the SMART PRESS models have a MANUAL AND AUTOMATIC RESTART.

INDEX - CIRCULATORS AND IN-LINE PUMPS

RANGE

5 ANNI DI GARANZIA · 5 JAHRE GARANTIE · 5 AÑOS DE GARANTIA · 5 ANS DE GARANTIE
5 YEARS WARRANTY

Only for EU markets

A new range for the market of tomorrow

46 years of experience. Over 20 million circulators sold.

History and know-how, together with the in-house design of the mechanics and electronics and the new DAB 4.0 factory, make the new Evosta electronic wet rotor circulators utterly innovative.

in terms of technology, reliability and performance.

IPX5 TESTING

In this way, the infiltration of moisture is no longer an issue.

The IPX5 degree of protection is tested by firing a water jet from a 6.3 mm nozzle from every direction to ensure the water-tightness of the circulator.

CALCIUM REMOVAL CARTRIDGE

The Evosta calcium removal system keeps the motor shaft in perfect condition, preventing the normal formation of limescale generally caused by air and water residue.

EVOSTA 2

WET ROTOR ELECTRONIC CIRCULATORS

EVOSTA 2

Evosta 2 by DAB is a wet rotor electronic circulator designed for the recirculation of water in domestic and residential heating and air conditioning systems.
Evosta 2 has a permanent magnet synchronous motor and inverter electronics that automatically adapt performance to system requirements, ensuring energy savings and protection from hammering effects.
With its compact size and all-round performance, it's the perfect replacement of old three-speed circulators. It combines the strength of the mechanical circulator with the benefits of the electronic one.
Its configuration is very simple: a sequential key can be used to scroll through the nine operating modes, three with proportional pressure, three with constant pressure and three with constant speed.
All the models have a breather plug and allow manual release of the motor shaft.
Threaded suction and delivery ports. Technopolymer impeller.
Cataphoretic paint coated cast iron body, stainless steel motor casing. Water resistant electronics with IPX5 protection class.
The included calcium removal cartridge keeps the motor shaft in perfect condition, preventing the normal formation of limescale that it can be generated inside the circulator if some air bubbles are present during the first installation.

Operating range
0,4-3,6 m³/h with head up to 6,9 metres.

Pumped liquid temperature range
from -10 °C to +110°C.

Working pressure 10 bar (1000 kPa).

Protection class IP X5.

Insulation class F.

Installation with horizontal motor axis.

Standard power input
single-phase 1x230 V~ 50/60 Hz.

Pumped liquid Clean, free of solids and mineral oils, not viscous, chemically neutral, with properties similar to water (glycol max 30%).

ErP ready

EVOSTA 3

WET ROTOR ELECTRONIC CIRCULATORS

EVOSTA 3

Evosta 3 by DAB is a wet rotor electronic circulator designed for the recirculation of water in domestic and residential heating and air conditioning systems.
It's the first circulator with IPX5 protection class. It has a permanent magnet synchronous motor and inverter electronics that automatically adapt performance to system requirements, ensuring energy savings and protection from hammering effects.
Its configuration is very simple: a sequential key can be used to scroll through the nine operating modes, three with proportional pressure, three with constant pressure and three with constant curve.
All the models have a breather plug, automatic degassing function and allow manual release of the motor shaft. Threaded suction and delivery ports. Technopolymer impeller. Insulation casings included. Cataphoretic paint coated cast iron body, stainless steel motor casing.
Evosta 3 has a screen for the display of the height of the selected curve in metres, instantaneous power absorption in watts, instantaneous head and instantaneous flow rate. Thanks to the new standard interchangeable plug, Evosta 3 can be used with connectors of other brands without the need to redo the electrical connections.
The included calcium removal cartridge keeps the motor shaft in perfect condition, preventing the normal formation of limescale that it can be generated inside the circulator if some air bubbles are present during the first installation.

Operating range
0,4-4,2 m³/h with head up to 8+ metres.

Pumped liquid temperature range
from -10 °C to +110°C.

Working pressure 10 bar (1000 kPa).

Protection class IP X5.

Insulation class F.

Installation with horizontal motor axis.

Standard power input
single-phase 1x230 V~ 50/60 Hz.

Pumped liquid Clean, free of solids and mineral oils, not viscous, chemically neutral, with properties similar to water (glycol max 30%).

EVOSTA 2 SOL

WET ROTOR ELECTRONIC CIRCULATORS

EVOSTA 2

Evosta 2 Sol by DAB is a wet rotor electronic circulator designed for the recirculation of water in domestic and residential thermal solar panel heating and air conditioning systems.
It has a permanent magnet synchronous motor and inverter electronics that automatically adapt performance to system requirements, ensuring energy savings and protection from hammering effects.
Its configuration is very simple: a sequential key can be used to scroll through the operating modes.
All the models have a breather plug and allow manual release of the motor shaft.
Threaded suction and delivery ports.
Technopolymer impeller.
Cataphoretic paint coated cast iron body, stainless steel motor casing.
A version controlled by PWM external signal (1.5 m plug cable) is also available.
1.5 m molex plug power cable.
The included calcium removal cartridge keeps the motor shaft in perfect condition, preventing the normal formation of limescale that it can be generated inside the circulator if some air bubbles are present during the first installation.

Operating range
0-4 m³/h with head up to 14,5 metres.

Pumped liquid temperature range
from -10 °C to +110 °C. (130 °C to 60 °C ambient).

Working pressure 10 bar (1000 kPa).

Protection class IPX4.

Insulation class F.

Installation with horizontal motor axis.

Standard power input
single-phase 1x115-230 V ~ 50/60 Hz.

Power input connection
molex plug with 1.5m cable.

Pwm signal connector
plug with 1.5m cable (OEM versions only).

Pumped liquid Clean, free of solids and mineral oils, not viscous, chemically neutral, with properties similar to water (glycol max 50%).

ErP ready

EVOSTA 2 SAN V/R

WET ROTOR ELECTRONIC CIRCULATORS

EVOSTA 2

Evosta 2 San by DAB is a wet rotor circulator designed for the recirculation of domestic hot water in small domestic and residential systems.
Synchronous motor.
Threaded suction and delivery ports.
Brass pump body.
V versions with fittings with built-in check valve and on-off ball valve;
R versions with threads and without check valve and on-off ball valve.
Significant energy savings: circulator consumption 7 W only.

Operating range
0-0,6 m³/h with head up to 1,1 m.

Pumped liquid temperature range
from +2 °C to +75°C.

Working pressure 10 bar (1000 kPa).

Protection class IP 42.

Insulation class II.

Installation with horizontal motor axis.

Standard power input
single-phase 1x115-230 V~ 50/60 Hz.

Pumped liquid Clean, free of solids and mineral oils, not viscous, chemically neutral, with properties similar to water (glycol max 30%).

EVOSTA 2 SAN

WET ROTOR ELECTRONIC CIRCULATORS

EVOSTA 2

Evosta 2 San by DAB is a wet rotor electronic circulator designed for the recirculation of domestic hot water in domestic and residential systems.
It has a permanent magnet synchronous motor and inverter electronics that automatically adapt performance to system requirements, ensuring energy savings and protection from hammering effects.
Its configuration is very simple: a sequential key can be used to scroll through the nine operating modes, three with proportional pressure, three with constant pressure and three with constant speed curve.
All the models have a brass breather plug and allow manual release of the motor shaft. Threaded suction and delivery ports.
Brass pump body.
Electronics protected from water infiltrations; IPX5 protection class.
No overload protection required.
The included calcium removal cartridge keeps the motor shaft in perfect condition, preventing the normal formation of limescale that it can be generated inside the circulator if some air bubbles are present during the first installation.

Operating range
0,4-4,2 m3/h with head up to 8 m.

Pumped liquid temperature range
from -10 °C to +110°C.

Working pressure 10 bar (1000 kPa).

Protection class IP X5.

Insulation class F.

Installation
with horizontal motor axis.

Standard power input
single-phase 1x230 V~ 50/60 Hz.

Pumped liquid Clean, free of solids and mineral oils, not viscous, chemically neutral, with properties similar to water (glycol max 30%).

EVOPLUS SMALL

ELECTRONIC CIRCULATORS FOR SMALL COMMUNITY HEATING

EVOPLUS SMALL electronic circulators can be used in heating, ventilation and air conditioning systems for residential and commercial buildings.
In all correctly sized installations, the electronically controlled wet rotor pumps constantly ensure sufficient power and, simultaneously, lower noise emissions, greater comfort and a significant reduction in running costs.
All models fitted with flanged pump body are available in both single and the twin versions.
The user interface is easy to use and easy to understand.

Circulator protection rate IP 44.

Insulation class F.

Standard voltage
single-phase 220/240V, 50/60Hz.

In accordance with European standards
EN 61800-3 - EN 60335-1 - EN 60335-2-51.

Operating range
from 2 to 12 m3/h with head up to 11 meters.

Liquid Temperature range
from -10 °C to 110 °C.

Pumped liquid clean, free from solids and mineral oils, not viscous, chemically neutral, close to the properties of water (max. glycol contents 30%).

Maximum working pressure 16 bar (1600 kPa).

Standard flanging The single version is available with 1 1/2" and 2" threaded ports and with flanged ports DN 32 and DN 40, PN 6 / PN 10 / PN 16.
The twin version is available with flanged pump body DN 32 and DN 40, PN 6 / PN 10 / PN 16.

Installation with horizontal motor shaft.

EVOPLUS

ELECTRONIC CIRCULATORS FOR HEATING AND AIR-CONDITIONING SYSTEMS

EVOPLUS electronic circulators can be used in heating, ventilation and air conditioning systems for residential and commercial buildings. In all correctly sized installations, the electronically controlled wet rotor pumps constantly ensure sufficient power and, simultaneously, lower noise emissions, greater comfort and a significant reduction in running costs.
All models fitted with flanged pump body are available in both single and twin versions.
The user interface is easy to use and easy to understand.

Circulator protection rate IP 44.

Insulation class F.

Standard voltage
single-phase 220/240V, 50/60Hz.

In accordance with European standards
EN 61800-3 - EN 60335-1 - EN 60335-2-51.

Operating range
from 2 to 75.6 m³/h with head up to 18 meters.

Liquid Temperature range
from -10 °C to 110 °C.

Pumped liquid clean, free from solids and mineral oils, not viscous, chemically neutral, close to the properties of water (max. glycol contents 30%).

Maximum working pressure 16 bar (1600 kPa).

Standard flanging
DN 32, DN 40, DN 50, DN 65, PN 6 / PN 10 / PN 16 (4 slots), DN 80 e DN 100, PN 6 (4 slots) usable with flange 4 holes PN10.

Special version on demand
DN 80 , DN 100 PN 10 / PN 16 (8 holes).

Installation with horizontal motor shaft.

ErP ready

VA

WET ROTOR CIRCULATORS

Single body consisting of a cast iron hydraulic unit. Die-cast aluminium motor casing.
Technopolymer impeller.
Alumina driving shaft mounted on graphite brushing lubricated by the pumped liquid itself.
Stainless steel protective rotor sleeve, stator sleeve and closing flange.
Ceramic thrust bearing, E.P.D.M. O-rings and brass air outlet cap.
The two-pole asynchronous motor with wet rotor is self-protected for resistance.
No overload protection required.
Three-speed operation.

Operating range
from 0.5 to 3,6 m³/h with head up to 6 metres.

Liquid temperature range
from -10°C to +110°C.

Pumped liquid characteristics clean, free from solids and mineral oils, not viscous, chemically neutral, close to the characteristics of water (max 30% glycol).

Maximum working pressure
10 bar (1000 kPa).

Protection level corresponding to IP 44.

Insulation class F.

Cable grommet PG 11.

Installation with motor axis horizontal.

Only for extra EU markets. Please contact our sales network for more information.

ONLY FOR EXTRA MARKETS EU

WET ROTOR CIRCULATORS

Pump body in cast iron and motor casing in die-cast aluminium.
Technopolymer impeller and tempered stainless steel driving shaft mounted on graphite brushing lubricated by the pumped liquid itself.
Flanged vents, (threaded series A), provided with threaded connectors for controlling gauges.
Stainless steel protective rotor sleeve, stator sleeve and closing flange.
Ceramic thrust bearing, E.P.D.M. "O" rings and brass air outlet cap.
The two-pole asynchronous motor with wet rotors designed **for three-speed** operation, single-phase version, **for two-speed** operation, for three-phase version.
Thermal overload protection incorporated in the single phase version.
In the twin version an automatic clapet type valve and blank flange are provided.

Operating range
from 1 to 12 m³/h with head up to 11 metres.

Liquid temperature range
from -10°C to +110°C.

Pumped liquid characteristics clean, free from solids and mineral oils, not viscous, chemically neutral, close to the characteristics of water (max 30% glycol).

Maximum working pressure 10 bar (1000 kPa).

Protection level IP 44.

Insulation class F.

Cable grommet PG 11.

Installation with motor axis horizontal.

Only for extra EU markets. Please contact our sales network for more information.

BPH - BMH - DPH - DMH

WET ROTOR CIRCULATORS

Pump for circulating hot water in small closed and pressurised or open tank civil and industrial community heating systems.
Cast iron body and wet rotor motor.
Die-cast aluminium motor casing.
Flanged inlet and delivery mouths, fitted with threaded unions for pressure gauges.
Technopolymer impeller, tempered stainless steel driving shaft.
Stainless steel protective rotor sleeve and stator sleeve.
Four pole asynchronous motor for the BMH and DMH versions, two pole motor for the BPH and DPH versions.
The Single-phase circulator has been designed to work at three speeds - 230V, while the Three-phase circulator has been designed to work at two speeds - 230 V and at three speeds - 400 V.
Thermal overload protection incorporated in the single-phase version.
For the three-phase version the motor must be connected to the power supply through an external contactor.
An automatic clapet type valve is incorporated into the delivery mouth of the twin version in order to prevent water from recirculating while the unit is not working; a blank flange is also supplied standard if one of the two motors must be serviced.

Protection level
IP 44 three-phase - IP42 single-phase.
Operating range
from 1.5 to 78 m³/h with head up to 18 metres.
Liquid temperature range for three-phase version: from -10°C to +120°C (for the models BPH-DPH 150/340.65 T and BPH-DPH 150/360.80 T; BPH-DPH 150-180/280.50 T; BPH-DPH 180/340.65 T; BPH-DPH 180/360.80 T: from -10°C to +110°C).
For single-phase version: from -10°C to +110°C.
Characteristics of pumped liquid clean, free from solids and mineral oils, not viscous, chemically neutral, close to the characteristics of water (max. glycol 30%).
Maximum operating pressure 10 bar (1000 kPa).
Standard flanging DN 40, DN 50, DN 65, DN 80 in PN 6/PN 10 (4 holes).
Flanging on request DN 80 in PN 10/PN 16 (8 holes).
Installation with motor axis horizontal.
Cable grommet PG 11.

EVOPLUS SMALL SAN

ELECTRONIC CIRCULATORS FOR HEATING AND AIR-CONDITIONING SYSTEMS

Circulator for domestic hot water systems of the closed circuit pressurized type or open circuit type.
Bronze pump body.
Motor casing in die-cast aluminium.
Technopolymer impeller.
Ceramic motor shaft mounted on graphite bushings lubricated by the pumped liquid.
Stainless steel rotor sleeve, stator sleeve and closing flange.
Ceramic thrust ring, ethylene propylene sealing rings.
Synchronous motor with permanent magnet rotor.

Operating range
from 2 to 12 m³/h with head up to 11 meters.

Liquid temperature range
from -10 °C to 110 °C.

Pumped liquid clean, free from solids and mineral oils, not viscous, chemically neutral, close to the properties of water.

Maximum working pressure
16 bar (1600 kPA).

Protection rating IP 44.

Insulation class F.

Installation with horizontal motor shaft.

DAB WATER•TECHNOLOGY

EVOPLUS SAN

ELECTRONIC CIRCULATORS FOR HEATING AND AIR-CONDITIONING SYSTEMS

Circulator for domestic hot water systems of the closed circuit pressurized type or open circuit type.
Bronze pump body.
Motor casing in die-cast aluminium.
Technopolymer impeller.
Steel motor shaft mounted on ceramic bushings lubricated by the pumped liquid.
Stainless steel rotor sleeve and closing flange, stator sleeve in carbon fibre composite.
Ceramic thrust ring, ethylene propylene sealing rings. Synchronous motor with permanent magnet rotor.

Operating range from 4 to 42 m³/h with head up to 17 meters.

Liquid temperature range from -10 °C to 110 °C.

Pumped liquid clean, free from solids and mineral oils, not viscous, chemically neutral, close to the properties of water.

Maximum working pressure 16 bar (1600 kPA).

Protection rating IP 44.

Insulation class F.

Installation with horizontal motor shaft.

VS

WET ROTOR CIRCULATORS

Pump for hot water circulation in hot water domestic systems of the closed and pressurised or open tank type. Also suitable for solar power systems.
Single body formed of the bronze hydraulic unit. Die-cast aluminium motor casing. Technopolymer impeller. Alumina driving shaft mounted on graphite brushing lubricated by the pumped liquid itself.
Stainless steel protective rotor sleeve, stator sleeve and closing flange.
Ceramic thrust bearing, E.P.D.M. "O" rings.
The two-pole or four-pole asynchronous motor with wet rotor is self-protected for resistance. **No overload protection required.**

Operating range
from 0.5 to 3,6 m³/h with head up to 6 metres.

Liquid temperature range
from -10°C to +85°C (for sanitary use)
+110°C (for others use).

Pumped liquid characteristics clean, free from solids and mineral oils, not viscous, chemically neutral, close to the characteristics of water (max 30% glycol).

Maximum working pressure
10 bar (1000 kPa).

Protection level IP 44.

Insulation class F.

Cable grommet PG 11.

Installation with motor axis horizontal.

ALME / ALPE

ELECTRONIC IN-LINE PUMPS

Circulator for hot or cold water with in-line ports, suitable for installation directly on the pipes in civil and industrial heating air conditioning, refrigeration, and domestic water systems. Extremely versatile thanks to the use of the **MCE/C** inverter, the circulator performance is such as to allow automatic adaptation to meet the various requirements of the system, while keeping pressure differentials unchanged.
Pump body and motor support in cast iron.
2" M-GAS inlet and outlet. Impeller in technopolymer, carbon/ceramic mechanical seal.
Four-pole totally enclosed asynchronous motor with external cooling for version **ALME** and two pole motor for version **ALPE**.
Rotor mounted on oversized greased sealed-for-life ball bearings to ensure silent running and long life.
Constructed following the CEI 2-3 standards.

Operating range
from 1 to 8.4 m³/h with head up to 21 meters.

Liquid temperature range
From -15 °C to +120°C.

Liquid quality requirements clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral, characteristics similar to water – maximum glycol percentage 30 % (for different glycol percentages, please contact the Technical Assistance Service).

Installation fixed horizontally.

Maximum ambient temperature +40°C.

Maximum working pressure 10 bar (1000 kPa).

Protection rating IP 55.

Insulation class F.

ELECTRONIC IN-LINE PUMPS

Circulator for hot or cold water with in-line ports, suitable for installation directly on the pipes in civil and industrial heating air conditioning, refrigeration, and domestic water systems. Extremely versatile thanks to the use of the **MCE/C** inverter, the circulator performance is such as to allow automatic adaptation to meet the various requirements of the system, while keeping pressure differentials unchanged. Pump body and motor support in cast iron. PN 10 Flanged inlet and delivery mouths, fitted with threaded holes for pressure gauges. To facilitate interchangeability in existing installations, the pump is designed to accept PN 6 counterflanges. Impeller in technopolymer. Carbon/ceramic mechanical seal. The pumps are available both in the single version (**KLME-KLPE**) and in the twin version (**DKLME-DKLPE**). An automatic clapet type valve is incorporated into the delivery mouth of the twin version in order to prevent water from recirculating while the unit is not working. In addition, a set of blank flanges is supplied for use when maintenance of one of the two motors is necessary. The twin version makes it possible to alternate operation of the pumps when the back-up unit is requested, or simultaneous operation of the two pumps. Four-pole totally enclosed asynchronous motor with fan-over cooling for versions **KLME** and **DKLME** and two pole motor for versions **KLPE** and **DKLPE**. Rotor mounted on oversized greased sealed-for-life ball bearings to ensure silent running and long life. Integral thermal and current overload protection. Constructed following the CEI 2-3 standards.

Operating range
From 2 to 84 m³/h with head up to 23,4 meters.

Liquid temperature range
From -15 °C to +120°C.

Liquid quality requirements clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral, characteristics similar to water - maximum glycol percentage 30 % (for different glycol percentages, please contact the Technical Assistance Service).

Installation normally horizontal or vertical provided the motor is always above the pump.

Maximum ambient temperature +40°C.

Maximum working pressure 10 bar (1000 kPa).

Protection rating IP 55.

Insulation class F.

Standard flanging DN 40, DN 50, DN 65, DN 80 in PN 6/PN 10 (4 Holes).

CME / CM-GE / DCME / DCM-GE - 4 POLES

ELECTRONIC IN-LINE PUMPS

Circulation pumps with in-line ports, suitable for installation in heating and air conditioning, refrigeration, and domestic hot water systems.
Extremely versatile thanks to the use of the **MCE/C** inverter, they offer performance capable of adapting automatically to the system's various demands while keeping pressure differentials unchanged.
Available in single and twin version.
PN 16 flanged inlet and delivery mouths, fitted with threaded holes for pressure gauges.
Pump body and support in cast iron, impeller in cast iron or technopolymer depending on model (in bronze, on request, only from DN 65 to DN 150).
Stainless steel drive shaft.
Sealing device: standardised mechanical seal made to DIN 24960 in carbon / carborundum with O' rings in EPDM. 4-pole three-phase indication motor with external cooling.
Rotor running on ball bearings, oversized to ensure low noise and durability.
Constructed following the CEI 2-3 standards.

Operating range from 1.2 to 360 m^3/h with head up to 34 meters.

Liquid temperature range
from -10°C to + 130°C for DN 40 -50.
from -10°C to + 140°C for rest of the range.

Liquid quality requirements clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral and close to the characteristics of water.

Installation Fixed, horizontal or vertical provided the motor is always above the pump.

Maximum ambient temperature +40°C.

Maximum working pressure 16 bar.

Protection rating IP 55.

Insulation Class F.

Flanging PN 16.

Counter-flanges on request
DN 40 - DN 50 - DN 65 - DN 80 - DN 100 - DN 125 - DN 150; PN 16.

ELECTRONIC IN-LINE PUMPS

Circulation pumps with in-line ports, suitable for installation in heating and air conditioning, refrigeration and domestic hot water systems.
Extremely versatile thanks to the use of the **MCE/C** inverter, they offer performance capable of adapting automatically to the system's various demands while keeping pressure differentials unchanged.
Available in single and twin version.
PN 16 flanged inlet and delivery mouths, fitted with threaded holes for pressure gauges.
Pump body and support in cast iron, impeller in cast iron or tech-nopolymer depending on model (in bronze, on request, only from DN 65 to DN 150).
Stainless steel drive shaft.
Sealing device: standardised mechanical seal made to DIN 24960 in carbon / carborundum with O-rings in EPDM.
2 pole three-phase indication motor with external cooling.
Rotor running on ball bearings, oversized to ensure low noise and durability.
Constructed following the CEI 2-3 standards.

Operating range from 1.2 to 230 m³/h with head up to 56 meters.

Liquid temperature range
from -10°C to + 130°C for DN 40 -50.
from -10°C to + 140°C for rest of the range.

Liquid quality requirements clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral and close to the characteristics of water.

Installation Fixed, horizontal or vertical provided the motor is always above the pump.

Maximum ambient temperature +40°C.

Maximum working pressure 16 bar.

Protection rating IP 55.

Insulation Class F.

Flanging PN 16.

Counter-flanges on request DN 40 - DN 50 - DN 65 - DN 80 - DN 100 - DN 125 - DN 150; PN 16.

ALM / ALP

IN-LINE PUMPS

Circulating pumps with in-line **connections**, suitable for civil and industrial installations for heating, air-conditioning and hot water for **domestic use**.
Technopolymer impeller and carbon/ceramic mechanical seal.
Two-pole, asynchronous motor for the ALP version and four-pole for the ALM version.
Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version.
Three-phase motors should be protected with a suitable overload protection complying with the regulations in force.
Pump body and motor support in bronze.

Operating range
from 0,6 to 6,5 m³/h with head up to 7,7 metres.

Liquid temperature range
from +15°C to +120°C.

Pumped liquid characteristics clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised, chemically neutral, close to the characteristics of water.

Maximum ambient temperature + 40°C.

Maximum working pressure 10 bar (1000 kPa).

Protection level IP 55.

Insulation class F.

IN-LINE PUMPS

Pump body and motor support in cast iron.
PN10 flanged connections with threaded holes for control pressure gauges.
Technopolymer impeller and carbon/ceramic mechanical seal.
Four-pole, asynchronous motor for the KLM and DKLM versions and two-pole for the KLP and DKLP versions.
Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version.
Three-phase motors should be protected with a suitable overload protection complying with the regulations in force.
In the twin version there is a built-in automatic clapet valve on the delivery vent; the standard supply also includes a blank flange.

Operating range
from 2 to 67 m³/h with head up to 13.7 metres.

Liquid temperature range
from -15°C to +120°C.

Pumped liquid characteristics clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised, chemically neutral.

Maximum ambient temperature +40°C.

Maximum working pressure 10 bar (1000 kPa).

Protection level IP 55.

Insulation class F.

Standard flanging PN 10/PN 6.

Counter flanges either threaded or with welded collar as requested.

IE3 ≥ 0,75 kW

IN-LINE PUMPS

NEW

In-line pumps designed for conditioning, heating, water recirculation in the presence of thermal solar panels (solar collectors) and for the circulation of domestic hot water in commercial building service.
Pump body, motor support and fan cover in cast iron. Impeller in cast iron or technopolymer according to the models. CM2-G is equipped with a joint.
The CM2, CM2-G indicate single pumps, the DCM2, DCM2-G twin pumps. Delivery and suction ports in line and flanged.
All models have an air-cooled four-pole asynchronous motor.

Operating range
up to 36 m³/h with head up to 50 m.
Type of pumped liquid
clean, free of solids and abrasives, non-viscous, non-aggressive, non-crystallised
Glycol percentage (maximum) 50%
Liquid temperature range
from -15 °C to +140 °C
Maximum ambient temperature +50 °C
Maximum operating pressure
16 Bar (1600 kPa)
Flanging PN10 - PN16
Motor efficiency
IE2 up to 0,55 kW; IE3 ≥ 0,75 kW
Motor protection class IP 55
Motor insulation class F
Impeller material cast iron or technopolymer
Three phase power input
3x230 V 50 Hz / 3x400 V 50 Hz
Max rpm 2910
Type of installation
Fixed in horizontal or vertical position with motor in up position. Only in vertical position for motor from 7,5 kW.

IN-LINE PUMPS

NEW

In-line pumps designed for conditioning, heating and water recirculation in the presence of thermal solar panels (solar collectors) in commercial building service.
The pump body and the motor support are in cast iron, the impeller is in cast iron or technopolymer depending on the model.
In-line flanged ports. CP-G models equipped with coupling.
The pumps with the code CP and CP-G are single, those with the code DCP and DCP-G are twin pumps. All models have a air cooled two-pole motor.

Operating range
up to 36 m³/h with head up to 50 m.
Type of pumped liquid
clean, free of solids and abrasives, non-viscous, non-aggressive, non-crystallised
Glycol percentage (maximum) 50%
Liquid temperature range
from -15 °C to +140 °C
Maximum ambient temperature +50 °C
Maximum operating pressure
16 Bar (1600 kPa)
Flanging PN10 - PN16
Motor efficiency
IE2 up to 0,55 kW; IE3 ≥ 0,75 kW
Motor protection class IP 55
Motor insulation class F
Impeller material cast iron or technopolymer
Three phase power input
3x230 V 50 Hz / 3x400 V 50 Hz
Max rpm 2910
Type of installation
Fixed in horizontal or vertical position with motor in up position. Only in vertical position for motor from 7,5 kW.

CM / CM-G / DCM / DCM-G - 4 POLES

IN-LINE PUMPS

Circulating pumps with in-line connections, suitable for civil and industrial installations for heating, air-conditioning and hot water for domestic use. Pump body, motor support, impeller and fan cover in cast iron.
PN 16 flanged suction and delivery connections with threaded holes for control pressure gauges.
Carbon/ceramic mechanical seal.
Three-phase, four-pole, asynchronous motor with external ventilation.
To protect the motor it is advisable to use a thermal overload protection complying with the regulations in force.

Operating range
from 1,2 to 420 m³/h with head up to 41 metres.

Liquid temperature range
from -10°C to +140°C.

Pumped liquid characteristics clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

Maximum ambient temperature +40°C.
(on request up to 50° C)

Maximum working pressure 16 bar (1600 kPa).

Protection level IP 55.

Insulation class F.

PN 16 counter flanges on request.

IE3 ≥ 0,75 kW

[1] Star (⅄) starting is possible.
Blank counterflange supplied as standard for twin version.

CP / CP-G / DCP / DCP-G - 2 POLES

IN-LINE PUMPS

Circulating pumps with in-line connections, suitable for civil and industrial installations for heating, air-conditioning and hot water for domestic use.
Pump body and motor support in cast iron.
PN 16 flanged suction and delivery connections with threaded holes for control pressure gauges.
Technopolymer impeller and carbon/ceramic mechanical seal.
Three-phase, two-pole, asynchronous motor with external ventilation.
To protect the motor it is advisable to use a thermal overload protection complying with the regulations in force.

Operating range
from 3,6 to 420 m³/h with head up to 102 metres.

Liquid temperature range
from -10°C to +140°C.

Pumped liquid characteristics clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

Maximum ambient temperature +40°C.
(on request up to 50° C)

Maximum working pressure 16 bar (1600 kPa).

Protection level IP 55

Insulation class F.
PN 16 counter flanges on request.

IE3 ≥ 0,75 kW

K-HA

CENTRIFUGAL PRESSURE BOOSTING PUMPS

K-HA single impeller centrifugal pump is designed for water pressure boosting in households, flats (domestic properties) to provide additional pressure to hot and cold water taps and similar outlet points.
K-HA centrifugal pump is mainly for use in open vented systems (tanks), but may also be installed directly on the incoming water mains supply to feed a boiler, provided approval has been obtained from the local Water Company.
The pump is supplied with a 0,3 meter power cable.

Operating range
up to 4,2 m^3/h with head up to 22 m.

Liquid quality requirements clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallized, chemically neutral, close to the characteristics of water.

Liquid temperature range from 0°C to +100 °C

Ambient temperature from -10°C to +55 °C

Environment humidity ≤ 95%

Maximum operating pressure
4 bar (35° C liquid temperature)
2 bar (65° C liquid temperature)

Minimum automatic (flow switch) operating pressure 0,5 mwc

Minimum automatic (flow switch) operating flow 2,5 l/min

NOTES

TECHNICAL APPENDIX

TECHNICAL APPENDIX
EVOPLUS SMALL / EVOPLUS SMALL SAN
WET ROTOR ELECTRONIC CIRCULATORS

EVOPLUS CONSTRUCTION CHARACTERISTICS FOR SMALL COLLECTIVE SYSTEMS (ELECTRONIC DEVICE).

EVOPLUS circulators are controlled by a latest generation NPT technology IGBT device, for better efficiency and strength. The specific features are:

- Sensorless motor control
- Sine-wave PWM modulation
- High carrier frequency, to eliminate all audio band noise
- Dedicated 32 bit processor
- Optimised "space vector" algorithm

An intuitive and functional user interface guarantees ease of calibration by all users. The easy to read OLED display on the control panel, 4 simple navigation keys, an in-line cascade menu featuring the latest mobile technology trends, and a wide range of functions, mean that EVOPLUS circulators are truly revolutionary products. A reliable and sturdy construction, together with a modern and innovative design, complete the product, also in terms of aesthetic value.
This range is ready for the following remote commands through expansion modules:

Base Module

- Economy mode
- Circulator start/stop
- Presence/absence of system alarms
- Pump in operation notification

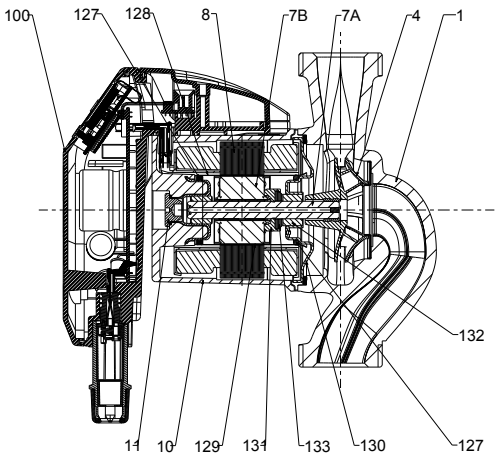
Multifunction Module*

- 2 x 0-10 V analogue signals
- 1 PWM signal
- 1 ΔT analogue signal from temperature sensor
- Connection to ModBus system management devices
  Optional LonBus with appropriate module
- Presence/absence of system alarms
- Pump in operation notification

*** Inputs available only if the associated function is active**

MATERIALS

N.	PARTS	MATERIALS
1	PUMP BODY	CAST IRON 250 UNI ISO 185 - CTF BRONZE (for the SAN version)
4	IMPELLER	TECHNOPOLYMER
7A	MOTOR SHAFT	ALUMINA
7B	ROTOR	STAINLESS STEEL LINER
8	STATOR	-
10	MOTOR CASING	DIE-CAST ALUMINIUM
127	SEAL RING	EPDM RUBBER
128	STATOR LINER	STAINLESS STEEL
130	CLOSING FLANGE	STAINLESS STEEL
131	THRUST RING SUPPORT	EPDM RUBBER
132	BUSHINGS	GRAPHITE



- Legend:
(example)

Electronic circulator — **EVOPLUS 40 180 X SAN M**

- Maximum head (dm)
- Centre distance (mm)
- **( )** = 1" ½ thread. **X** = 2" thread.
- **SAN** = sanitary water
- **M** = single-phase power input

Electronic circulator — **EVOPLUS B 120 / 250. 40 SAN M**

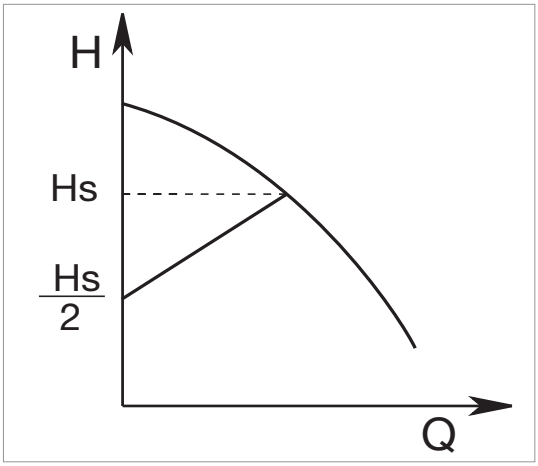
- **B** = single circulator **D** = twin circulator
- Maximum head (dm)
- Centre distance (mm)
- (DN) nominal diameter of the flanged ports
- **SAN** = sanitary recirculation version
- **M** = single-phase motor

TECHNICAL APPENDIX
EVOPLUS SMALL / EVOPLUS SMALL SAN
WET ROTOR ELECTRONIC CIRCULATORS

MODES OF OPERATION
All the functions listed below can be consulted by the users (including less experienced ones) by simply scrolling through the menu. The calibration and the modification of the parameters are protected, and can only be completed by expert users. The factory settings of the EVOPLUS range are for proportional differential pressure control mode in the curve that ensures the best energy efficiency index (EEI).

1 - ΔP-v proportional differential pressure adjustment mode

With ΔP-v adjustment mode, with the variation of the flow rate, the value of the delivery of the head also varies in a linear manner, from Hsetp to Hsetp/2.



This adjustment is particularly indicated for the following systems:

a. Two-pipe heating systems with thermostat valves and with:
- Head greater than 4 metres;
- Very long circuit piping;
- Valves with wide operating range;
- Differential pressure regulators;
- High pressure drops in those parts of the system carrying the entirety of the water flow rate;
- Low differential pressure.

b. Under-floor central heating systems with thermostatic valves and significant pressure drops in the boiler circuit.

c. Systems with primary circuit pumps with high pressure drops.

Example of set-up of the set-point with ΔP-v

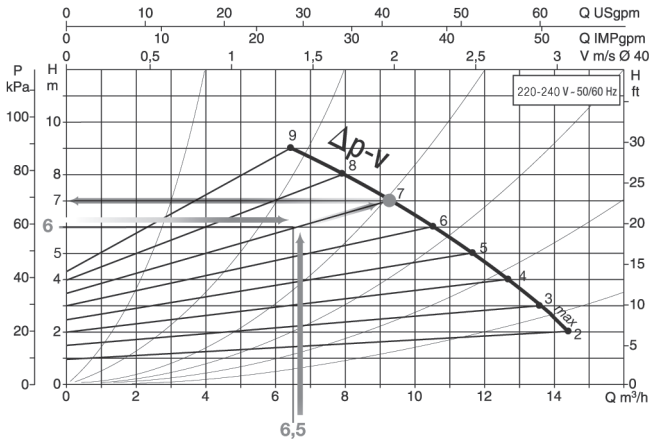
The following operating point is required:

Q = 6,5 m³/h

H = 6 m

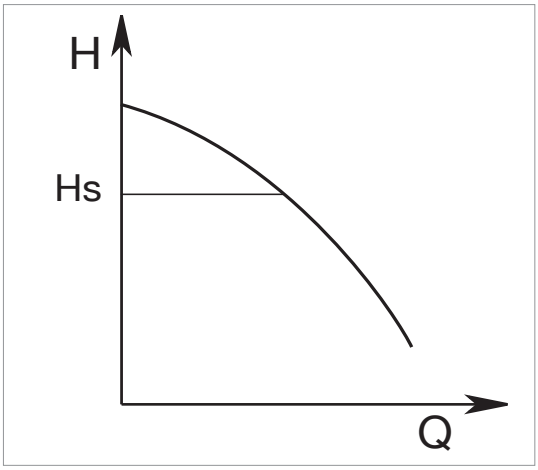
PROCEDURE:

1. In the graph, find the desired operating point, and then find the EVOPLUS curve closest to it (in this case the point lies precisely on the curve)
2. Follow the curve upwards until reaching the intersection with the limit curve of the circulator.
3. The head reading found at this limit point is the set-point head that must be entered to obtain the desired operating point.



2 - ΔP-c constant differential pressure adjustment mode

The ΔP-c adjustment mode keeps the differential pressure of the system constantly at the H setp value set, even in case of variation of the flow rate.



This adjustment is particularly indicated for the following systems:

a. Two-pipe heating systems with thermostat valves and with:
- Head lower than 2 metres;
- Natural circulation;
- Low pressure drops in those parts of the system carrying the entirety of the water flow rate;
- High differential temperature (central heating).

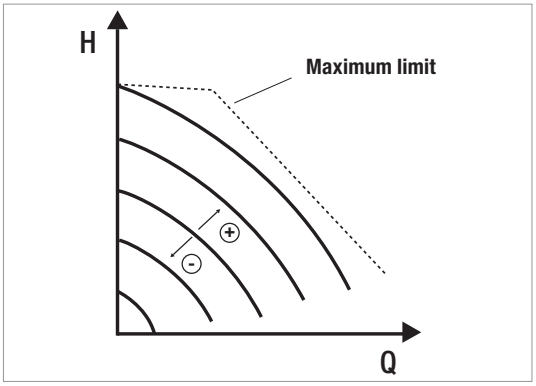
b. Under-floor heating systems with thermostat valves

c. Single-pipe heating systems with thermostat valves and calibration valves

d. Systems with primary circuit pumps with low pressure drops.

TECHNICAL APPENDIX
EVOPLUS SMALL / EVOPLUS SMALL SAN
WET ROTOR ELECTRONIC CIRCULATORS

3 - Constant curve adjustment modes



In this control mode, the circulator works based on constant speed characteristic curves.

The operation curve is selected by setting the rotation speed using a percentage factor.

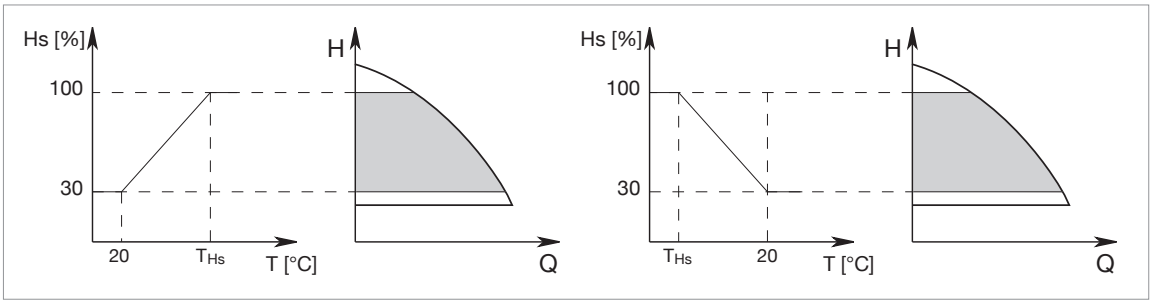
The 100 % value indicates the maximum limit curve.

The actual rotation speed may be affected by the power and differential pressure limitations of the actual circulator model.

The rotation speed may be set using the display, or either a 0-10 V or PWM external signal, using the appropriate multifunction module.

Control mode indicated for constant flow rate heating and air conditioning systems.

4 - Constant differential pressure control mode with proportional control based on the water temperature
(Function available with multifunction module)



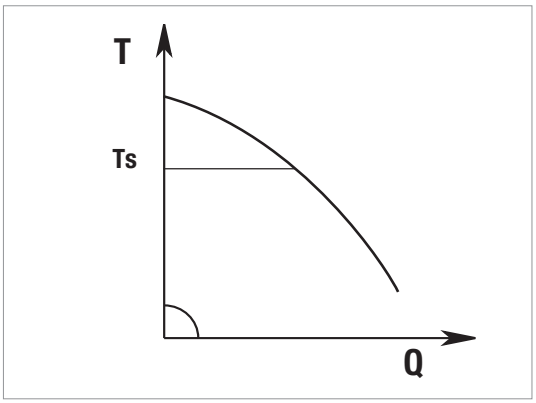
The circulator head set-point is reduced in accordance with the water temperature.
The liquid temperature can be set between 0 °C to 100 °C.

This adjustment is particularly indicated for the following systems:

a. - in variable flow rate systems (two-pipe central heating systems), in which a further reduction of circulator performance is provided in line with the lowering of the temperature of the circulating liquid, in case of reduced heating demand.

b. - in constant flow rate systems (single-pipe and under-floor central heating systems), where the performance of the circulator can only be adjusted by activating the temperature influence function.
It is set through the EVOPLUS control panel.

5 - ΔT-c constant differential pressure control mode
(Function available with multifunction mode) *



The ΔT-c control mode keeps the pumped liquid at constant temperature, changing the flow rate to the Tsetp settable value.

This adjustment is particularly indicated for the following systems:

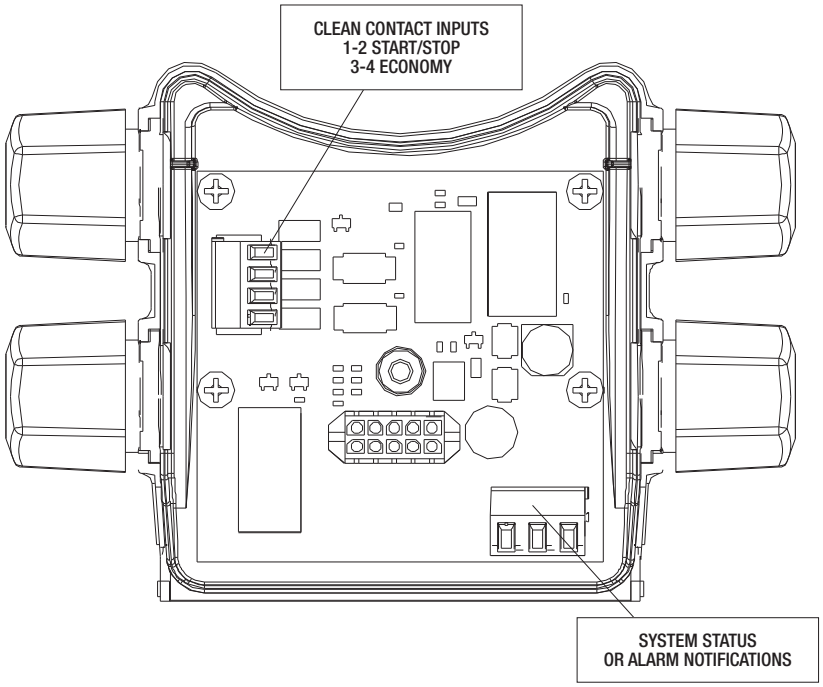
- Under-floor heating systems.
- Systems with primary circuit pumps.
- Systems with circuit pumps with heat exchanger.
- Solar energy systems with storage tanks.
- Solar panel swimming pool heating systems.

*** Adjustment during implementation.**

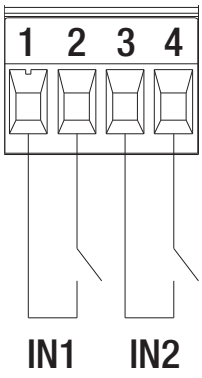
ECONOMY MODE

The economy function can be set directly on the control panel, by setting a reduction value (f.rid), the maximum value of which can be 50%.
In all the previously listed settings, the Hset value must be replaced with an Hset x f.rid.

BASE MODULE



Digital inputs



Clean contact inputs
1-2 START/STOP
3-4 ECONOMY

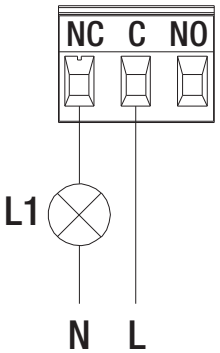
Input	Terminal no.	Type of contact	Associated function
IN1	1	Clean contact	**EXT:** If it is activated from the control panel, it will be possible to remotely control the switching on and off of the pump.
	2		
IN2	3	Clean contact	**Economy:** If it is activated from the control panel, it will be possible to remotely activate the set-point reduction function.
	4		

If the **EXT** and **Economy** functions have been activated using the control panel, the system will behave as follows:

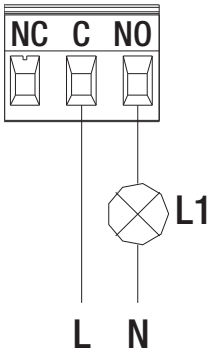
IN1	IN2	System status
Open	Open	Pump stopped
Open	Close	Pump stopped
Close	Open	Pump in operation with set-point set by the user
Close	Close	Pump in operation with reduced set-point

Digital outputs

System status or alarm notifications



The function associated to OUT1 is "Alarms Present"; L1 turns on when a system alarm is present, and turns off when no fault is detected.



The function associated with OUT1 is "Pump Status"; L1 turns on when the pump is in operation, and stops when the pump is idle.

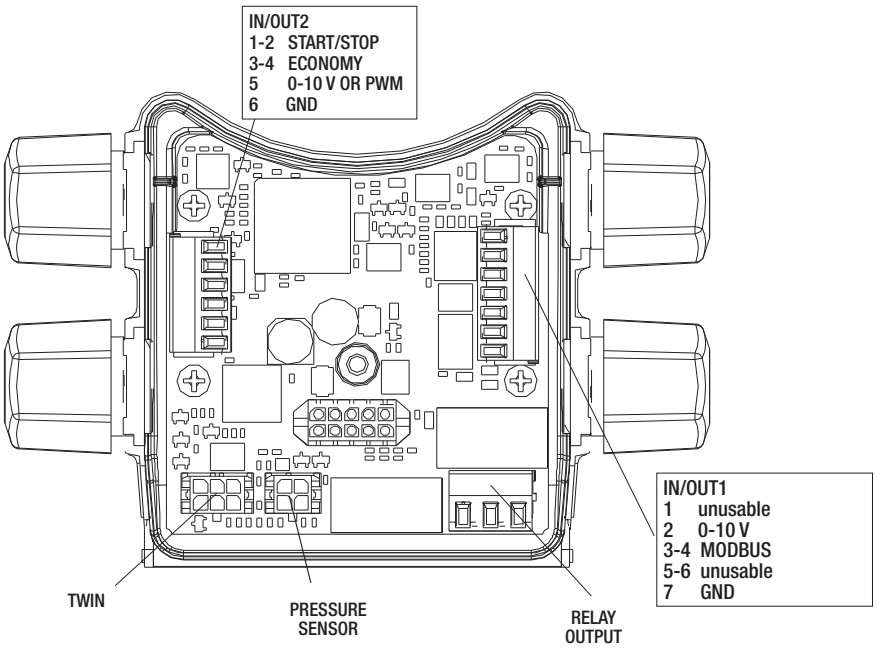
Out-put	Terminal no.	Type of contact	Associated function
OUT1	NC	NC	• Presence/absence of system alarms • Pump in operation/Pump stopped
	C	COM	
	NO	NO	

The OUT1 output is available on the 3-pole removable terminal box, where the type of contact is also shown (NC = Normally Closed, COM = Common, NO = Normally Open).

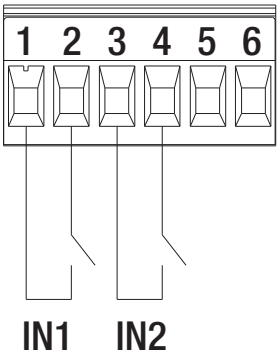
Characteristics of the output contacts	
Max sustainable voltage [V]	250
Max sustainable current [A]	5 - If resistive load 2,5 - If inductive load
Max cable section accepted [mm^2]	1,5

TECHNICAL APPENDIX
EVOPLUS SMALL / EVOPLUS SMALL SAN
WET ROTOR ELECTRONIC CIRCULATORS

MULTIFUNCTION MODULE



Digital inputs



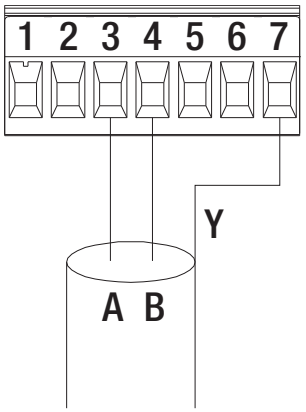
IN/OUT2
1-2 START/STOP
3-4 ECONOMY
5 0-10V, PWM and NTC
6 GND

Input	Terminal no.	Type of contact	Associated function
IN1	1	Clean contact	**EXT:** If it is activated from the control panel, it will be possible to remotely control the switching on and off of the pump.
	2		
IN2	3	Clean contact	**Economy:** If it is activated from the control panel, it will be possible to remotely activate the set-point reduction function.
	4		

If the **EXT** and **Economy** functions have been activated using the control panel, the system will behave as follows:

IN1	IN2	System status
Open	Open	Pump stopped
Open	Close	Pump stopped
Close	Open	Pump in operation with set-point set by the user
Close	Close	Pump in operation with reduced set-point

MODBUS

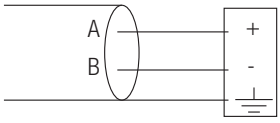


IN/OUT1
1 unusable
2 0-10 V
3-4 modbus
5-6 unusable
7 GND

The multifunction expansion module provides serial communication through an RS-485 input. The communication is established in accordance with the MODBUS specifications.
Using the MODBUS, it is possible to remotely set the circulator operating parameters, like the desired differential pressure, the control mode, etc. At the same time, the circulator can provide important information on the status of the system.

Modbus terminals	Terminal no.	Description
A	3	Terminal not inverted (+)
B	4	Terminal inverted (+)
Y	7	GND

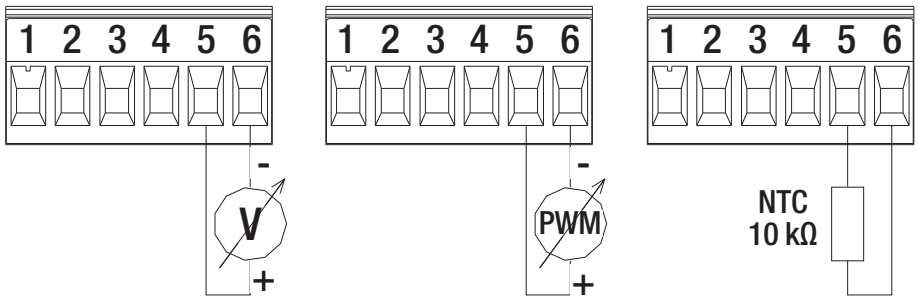
LONBUS



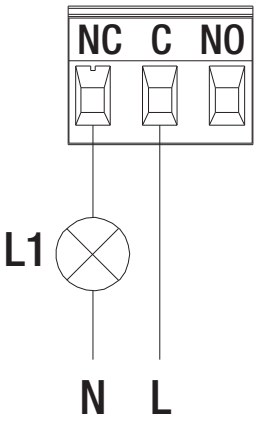
Gateway/ Evoplus connection

Using some modules available on the market, the circulator, and therefore its status, can also be made available to a LonWorks network. It will then be possible to change the parameters of the circulator by reading and amending the registers as indicated in the "Modbus Protocol instruction manual", available at the following address: "http://www.dabpumps.it/evoplus".

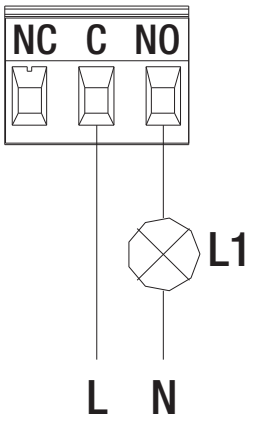
PWM AND NTC ANALOGUE INPUT



DIGITAL OUTPUTS



The function associated with OUT1 is "Pump Status"; L1 turns on when the pump is in operation, and stops when the pump is idle.



The function associated to OUT1 is "Alarms Present"; L1 turns on when a system alarm is present, and turns off when no fault is detected.

Output	Terminal no.	Type of contact	Associated function
OUT1	NC	NC	• Presence/absence of system alarms • Pump in operation/Pump stopped
	C	COM	
	NO	NO	

The OUT1 output is available on the 3-pole removable terminal box, where the type of contact is also shown (NC = Normally Closed, COM = Common, NO = Normally Open).

Characteristics of the output contacts	
Max sustainable voltage [V]	250
Max sustainable current [A]	5 - If resistive load 2,5 - If inductive load
Max cable section accepted [mm^2]	1,5

TECHNICAL APPENDIX
EVOPLUS / EVOPLUS SAN
WET ROTOR ELECTRONIC CIRCULATORS

EVOPLUS CONSTRUCTION CHARACTERISTICS COLLECTIVE SYSTEMS (ELECTRONIC DEVICE)*

EVOPLUS circulators are controlled by a latest generation NPT technology IGBT device, for better efficiency and strength. The specific features are:

- Sine-wave PWM modulation
- High carrier frequency to eliminate all audio band noise
- 2 dedicated 32 bit processors
  One for driving the motor;
  One for the user interface, enabling to perform the following functions:
  - Start/stop command
  - Economy command
  - 0-10 V analogue signal command
  - PWM signal command
  - 4-20 mA analogue signal command
  - ΔT temperature sensor signal command
  - Connection to ModBus system management devices. Optional LonBus with appropriate module.
- Optimised "space vector" algorithm
- Presence/absence of system alarms
- Pump in operation notification

*** Inputs only available if the associated function is active.**

An intuitive and functional user interface guarantees ease of calibration by all users. The easy to read OLED display on the control panel, three simple navigation keys, an in-line cascade menu featuring the latest mobile technology trends, and a wide range of functions, mean that EVOPLUS circulators are truly revolutionary products. A reliable and sturdy construction, together with a modern and innovative design, complete the product, also in terms of aesthetic value.

MATERIALS

N.	PARTS	MATERIALS
1	PUMP BODY	CAST IRON 250 UNI ISO 185 - CTF BRONZE (for the SAN version)
4	IMPELLER	TECHNOPOLYMER
7A	MOTOR SHAFT	STAINLESS STEEL
7B	ROTOR	STAINLESS STEEL LINER
8	STATOR	-
10	MOTOR CASING	DIE-CAST ALUMINIUM
127	SEAL RING	EPDM RUBBER
128	STATOR LINER	COMPOSITE AND CARBON FIBRE
130	CLOSING FLANGE	STAINLESS STEEL
131	THRUST RING SUPPORT	STAINLESS STEEL
132	BUSHINGS	ALUMINA

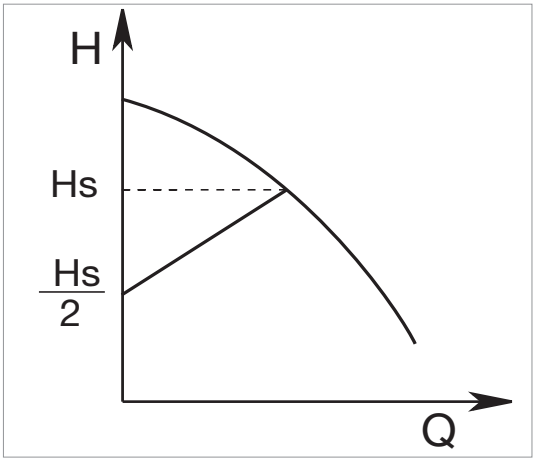
EVOPLUS / EVOPLUS SAN
WET ROTOR ELECTRONIC CIRCULATORS

MODES OF OPERATION
All the functions listed below can be consulted by the users (including less experienced ones) by simply scrolling through the menu. The calibration and the modification of the parameters are protected, and can only be completed by expert users. The factory settings of the EVOPLUS range are for proportional differential pressure control mode in the curve that ensures the best energy efficiency index (EEI).

1 - ΔP-v proportional differential pressure adjustment mode

With ΔP-v adjustment mode, with the variation of the flow rate, the value of the delivery of the head also varies in a linear manner, from Hsetp to Hsetp/2.



This adjustment is particularly indicated for the following systems:

a. Two-pipe heating systems with thermostat valves and with:
- Head greater than 4 metres;
- Very long circuit piping;
- Valves with wide operating range;
- Differential pressure regulators;
- High pressure drops in those parts of the system carrying the entirety of the water flow rate;
- Low differential pressure.

b. Under-floor central heating systems with thermostatic valves and significant pressure drops in the boiler circuit.

c. Systems with primary circuit pumps with high pressure drops.

Example of set-up of the set-point with ΔP-v

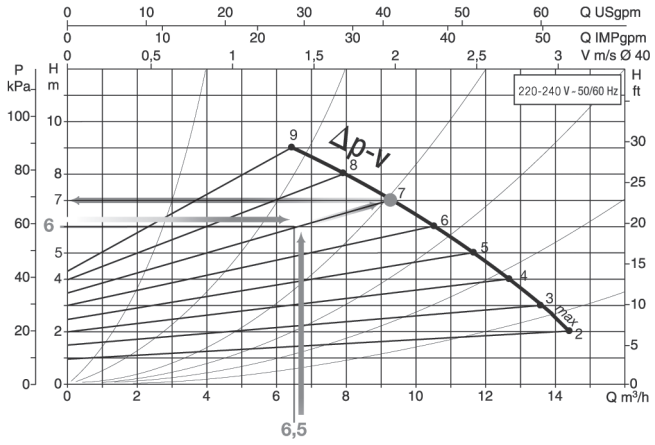
The following operating point is required:

Q = 6,5 m³/h

H = 6 m

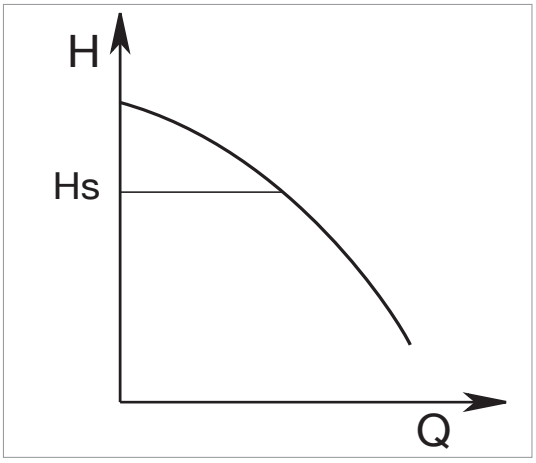
PROCEDURE:

1. In the graph, find the desired operating point, and then find the EVOPLUS curve closest to it (in this case the point lies precisely on the curve)
2. Follow the curve upwards until reaching the intersection with the limit curve of the circulator.
3. The head reading at this limit point is the set-point head that must be entered to obtain the desired operating point.



2 - ΔP-c constant differential pressure adjustment mode

The ΔP-c adjustment mode keeps the differential pressure of the system constantly at the H setp value set, even in case of variation of the flow rate.



This adjustment is particularly indicated for the following systems:

a. Two-pipe heating systems with thermostat valves and with:
- Head lower than 2 metres;
- Natural circulation;
- Low pressure drops in those parts of the system carrying the entirety of the water flow rate;
- High differential temperature (central heating).

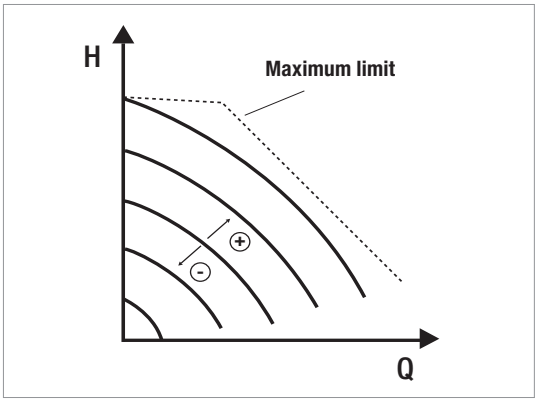
b. Under-floor heating systems with thermostat valves

c. Single-pipe heating systems with thermostat valves and calibration valves

d. Systems with primary circuit pumps with low pressure drops.

TECHNICAL APPENDIX
EVOPLUS / EVOPLUS SAN
WET ROTOR ELECTRONIC CIRCULATORS

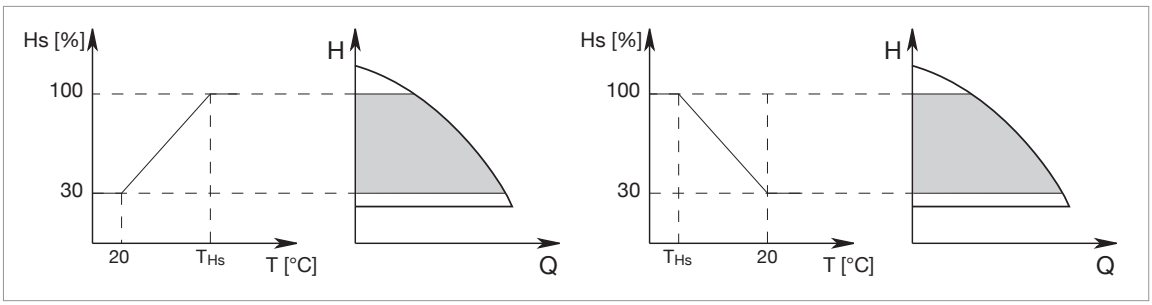
3 - Constant curve adjustment modes



In this control mode, the circulator works based on constant speed characteristic curves.
The operation curve is selected by setting the rotation speed using a percentage factor.
The 100 % value indicates the maximum limit curve.
The actual rotation speed may be affected by the power and differential pressure limitations of the actual circulator model.
The rotation speed may be set using the display, or either a 0-10 V or PWM external signal.

Control mode indicated for constant flow rate heating and air conditioning systems.

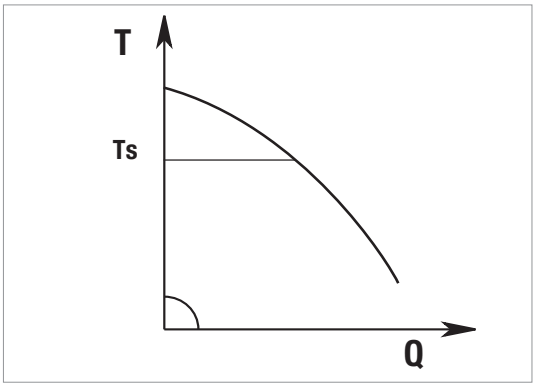
4 - Constant differential pressure control mode with proportional control based on the water temperature



The circulator head set-point is reduced in accordance with the water temperature.
The liquid temperature can be set between 0 °C to 100 °C.

This adjustment is particularly indicated for the following systems:
a. - in variable flow rate systems (two-pipe central heating systems), for which a further reduction of the circulator performance levels is provided in accordance with the lowering of the temperature of the circulating liquid, in case of reduced heating demand.
b. - in constant flow rate systems (single-pipe and under-floor central heating systems), where the performance of the circulator can only be adjusted by activating the temperature influence function.
It is set through the EVOPLUS control panel.

5 - ΔT-c * constant differential temperature adjustment mode



The ΔT-c control mode keeps the pumped liquid at constant temperature, changing the flow rate to the Tsetp settable value.

This adjustment is particularly indicated for the following systems:
- Under-floor heating systems.
- Systems with circuit pumps with heat exchanger.
- Solar energy systems with storage tanks.
- Solar panel swimming pool heating systems.

* Adjustment during implementation.

ECONOMY MODE
The economy function can be set directly on the control panel, by setting a reduction value (f.rid), the maximum value of which can be 50%. In all the previously listed settings, the Hset value must be replaced with an Hset x f.rid.

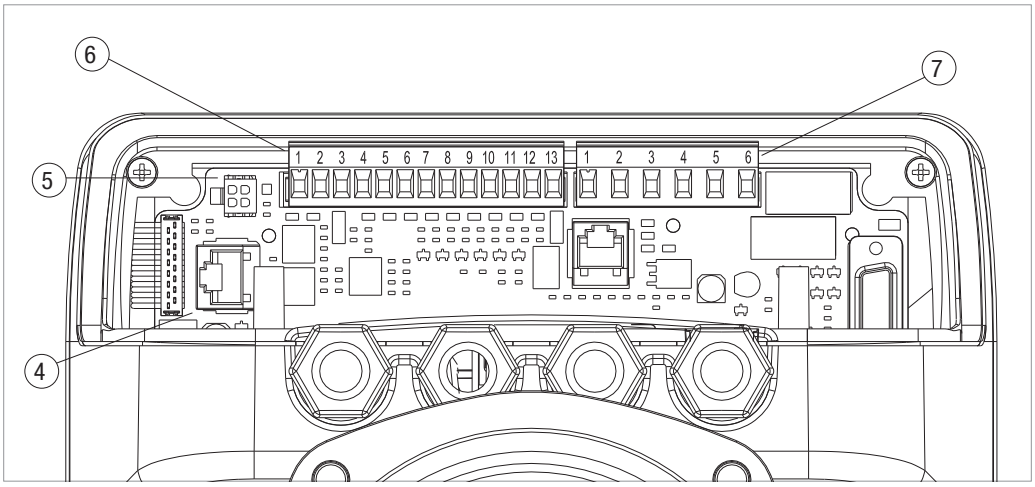
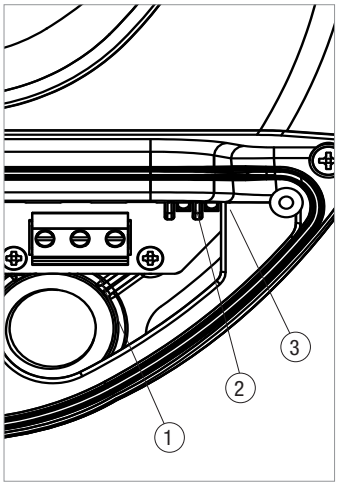
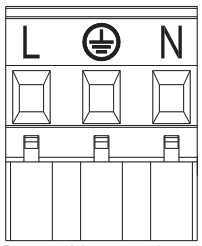
CONNECTION DIAGRAM





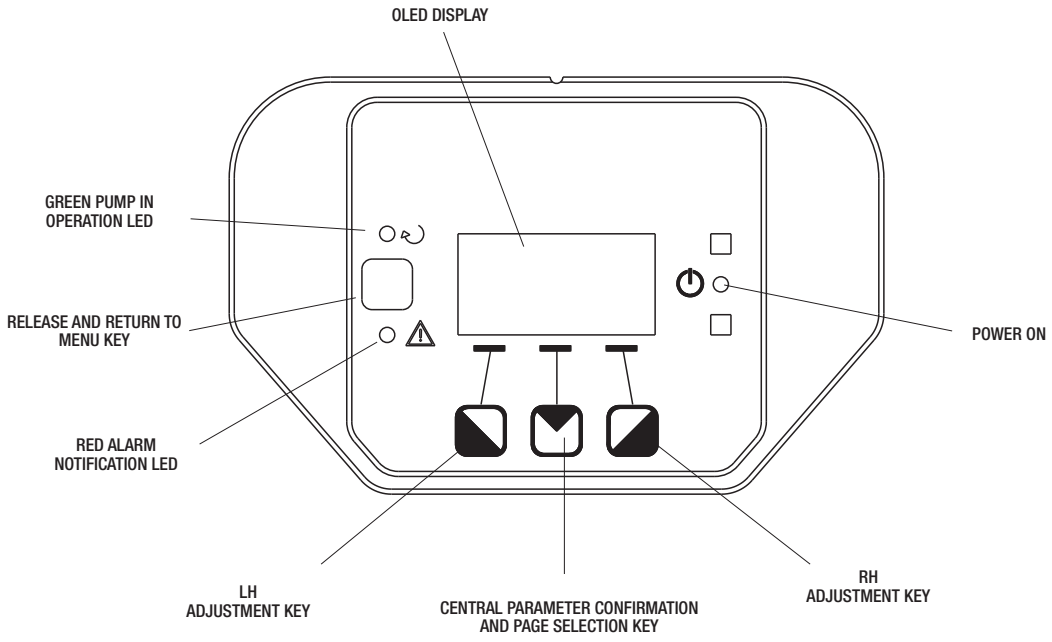
1	Removable terminal box for the connection of the power input line: 1x220-240 V, 50/60 Hz
2	Auxiliary LED
3	High voltage LED
4	Connector for twin circulators
5	Connector for pressure and temperature sensor on the circulator (as standard)
6	Removable 13-pole terminal box for the connection of MODBUS systems and inputs
7	Removable 6-pole terminal box for system status and alarm notification

POWER INPUT CONNECTION



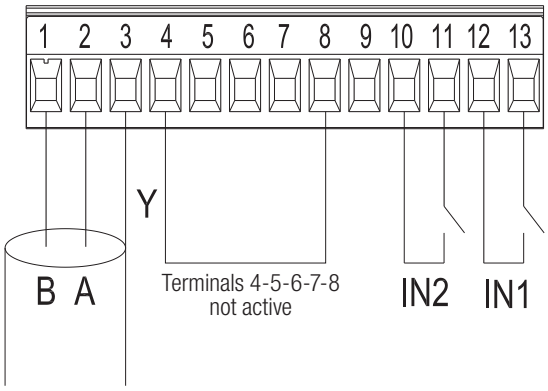
Removable power input terminal box

USER INTERFACE



TECHNICAL APPENDIX
EVOPLUS / EVOPLUS SAN
WET ROTOR ELECTRONIC CIRCULATORS

Digital inputs



Input	Terminal no.	Type of contact	Associated function
IN1	12	Clean contact	**EXT:** If it is activated from the control panel, it will be possible to remotely control the switching on and off of the pump.
	13		
IN2	10	Clean contact	**Economy:** If it is activated from the control panel, it will be possible to remotely activate the set-point reduction function.
	11		

If the **EXT** and **Economy** functions have been activated using the control panel, the system will behave as follows:

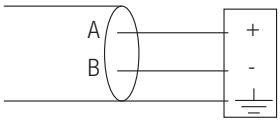
IN1	IN2	System status
Open	Open	Pump stopped
Open	Close	Pump stopped
Close	Open	Pump in operation with set-point set by the user
Close	Close	Pump in operation with reduced set-point

MODBUS

EVOPLUS circulators provide serial communication through an RS-485 input. The communication is established in accordance with the MODBUS specifications. Using the MODBUS, it is possible to remotely set the circulator operating parameters, like the desired differential pressure, the temperature influence, the control mode, etc. At the same time, the circulator can provide important information on the status of the system.

Modbus terminals	Terminal no.	Description
A	2	Terminal not inverted (+)
B	1	Terminal inverted (+)
Y	3	GND

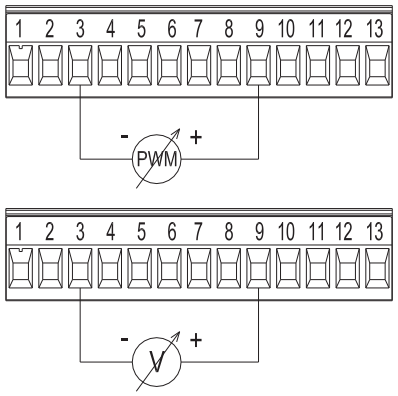
LONBUS



Gateway/ Evoplus connection

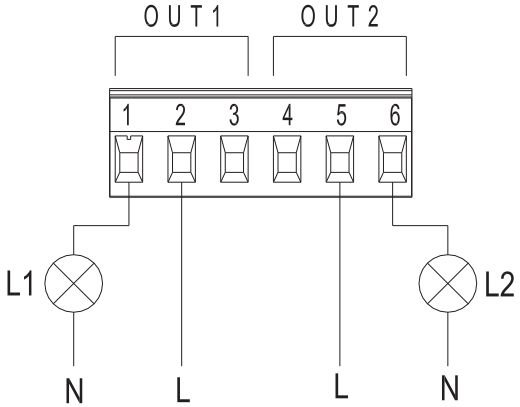
Using some modules available on the market, the circulator, and therefore its status, can also be made available to a LonWorks network. It will then be possible to change the parameters of the circulator by reading and amending the registers as indicated in the "Modbus Protocol instruction manual", available at the following address: "http://www.dabpumps.it/evoplus".

ANALOGUE AND PWM INPUT



Connection diagram for the external 0-10 V and PWM signals. The 2 signals share the same terminals of the terminal box, and therefore are mutually exclusive.

Digital outputs



Light L1 comes on when the system includes an alarm, and goes off when no faults are detected, while light L2 comes on when the pump is in operation, and goes off when the pump is stopped.

OUTPUT	TERMINAL NO.	TYPE OF CONTACT	ASSOCIATED FUNCTION
OUT1	1	NC	Presence/absence of system alarms
	2	COM	
	3	NO	
OUT2	4	NC	Pump in operation/Pump stopped
	5	COM	
	6	NO	

Outputs OUT1 and OUT2 are available on the 6-pole removable terminal box, where the type of contact is also shown (NC = Normally Closed, COM = Common, NO = Normally Open).

CHARACTERISTICS OF THE OUTPUT CONTACTS	
Max sustainable voltage [V]	250
Max sustainable current [A]	5 - If resistive load 2,5 - If inductive load
Max cable section accepted [mm^2]	1,5

INDEX - MULTISTAGE SELF-PRIMING AND CENTRIFUGAL PUMPS

JET - JETINOX - JETCOM

SELF-PRIMING CENTRIFUGAL PUMPS

JET

JETINOX

JETCOM

Self-priming centrifugal pump with excellent suction capacity even when there are air bubbles. Particularly suitable for water supply in domestic installations, small-scale agriculture, gardening and wherever self- priming operation is necessary.
Jet: cast iron pump body.
Jetinox: stainless steel pump body.
Jetcom: technopolymer pump body.
Motor support in cast iron, technopolymer impeller, diffuser, Venturi tube and sand guard. Stainless steel adjustment rings.
Carbon/ceramic mechanical seal. Asynchronous motor closed and cooled by external ventilation. Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version. For the protection of the three-phase motor it is advisable to use a suitable overload protection complying with the regulations in force.

Operating range two-poles from 0.4 to 10.5 m³/h with head up to 62 metres.

Liquid temperature range
from 0°c to +35°C for domestic use.
from 0°C to +40°C for other use.

Pumped liquid characteristics clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

Maximum ambient temperature +40°C.

Maximum working pressure
6 bar (600 kPa) for Jet and Jetcom.
8 bar (800 kPa) for Jetinox.

Protection level
IP 44 (IP 55 terminal board protection).

Insulation class F.

IE3 ≥ 0,75 kW

M - T = Single-phase (M) and Three-phase (T)

DP

PUMPS FOR DEEP SUCTION

DP 82-102

DP 151-251

Self-priming centrifugal pump for suction up to 27 metres, reached by means of an ejector.
Cast iron pump body and motor support.
Technopolymer impeller and diffusers.
Stainless steel adjustment rings.
Carbon/ceramic mechanical seal.
Cast iron ejector body, technopolymer Venturi tube and brass nozzle.
Asynchronous motor closed and cooled by external ventilation.
Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version.
For the protection of the three-phase motor it is advisable to use a suitable overload protection complying with the regulations in force.

Operating range from 0.15 to 4.3 m^3/h.

Liquid temperature range
from 0°C to +40°C for other uses.
from 0°C to +35° C for domestic use.

Pumped liquid characteristics clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

Maximum ambient temperature +40°C.

Maximum working pressure
6 bar (600 kPa) for DP 82 - DP 102.
8 bar (800 kPa) for DP 151 - DP 251.

Protection level IP 44.

Insulation class F.

IE3 ≥ 0,75 kW

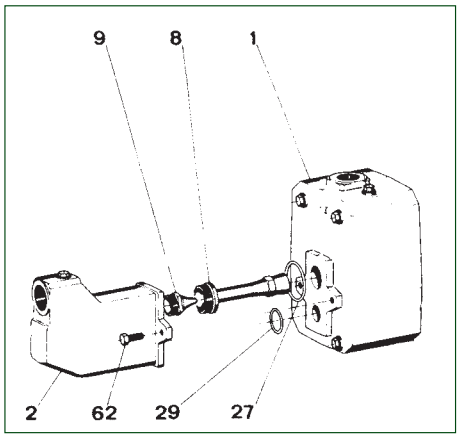
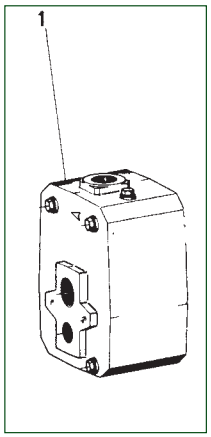
EJECTORS E 25	109200020	12
EJECTORS E 30	109200010	12

Don't provided with pump, to be ordered separately.

INSTRUCTIONS FOR CONVERSION





Conversion from DP 151-251 to JET 151-251
Screw the nozzle (9) into place on the ejector's body (2) and the Venturi tube (8).
Put the O-rings (27) and (29) in their respective places and fix the ejector body (2) to the pump body (1) using the two screws (62).

MODEL	CODE
EJECTOR JET 151 ASS.Y	R00009981
EJECTOR JET 251 ASS.Y	R00009983

Conversion from JET 151-251 to DP 151-251
Loosen and remove the two screws (62) connecting the ejector body (2) to the pump body (1).
Save the O-rings (27) and (29), the Venturi tube (8) and the nozzle (9).

GARDENJET - GARDEN INOX - GARDEN COM

SELF-PRIMING CENTRIFUGAL PUMPS

GARDENJET

GARDEN-INOX

GARDEN-COM

Portable self-priming centrifugal electropump for gardening, vegetable gardens, washing and hobbies.
Equipped with a handle for easy transport and 2-metre power cable type H07 RN-F complete with plug and switch.
Compact and easy to install, self-priming so that it can take up water from tanks, wells or streams, tolerating air bubbles and water with small particles of sand.
Gardenjet: Cast iron pump body and die-cast aluminium motor support.
Garden-com: Technopolymer pump body and die-cast aluminium motor support.
Garden-inox: Stainless steel pump body. Die-cast aluminium motor support.
Technopolymer impeller, diffuser and Venturi tube.
Stainless steel seal disc and pressure discs.
Carbon/ceramic mechanical seal.
Induction motor, closed and cooled with external ventilation.
Rotor mounted on oversized greased sealed-for-life ball bearings to ensure silent running and long life.
Built-in thermal and current overload protection and a capacitor permanently in circuit.
Manufactured according to CEI 2-3 and CEI 61-69 standards (EN 60335-2-41).

Motor protection IP 44.

Terminal box protection IP 55.

Insulation class F.

Standard voltage
Single-phase 220-240 V/50 Hz.

Operating range
From 0.4 to 5.4 m^3/h with head up to 54 metres.

Liquid quality requirements clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallize neutral, close to the characteristics of water.

Liquid temperature range
From 0°C to +35°C for domestic use (EN 60335-2-41).
From 0°C to +40°C for other uses.

Maximum ambient temperature +40°C.

Maximum suction depth 8 metres.

Maximum operating pressure
8 bar (800 kPa).
6 bar (600 kPa) only for technopolymer models (JETCOM).

Installation
Fixed or portable in a horizontal position.
Special executions on request: other voltages and/or frequencies.

EURO - EUROINOX - EUROCOM

MULTISTAGE CENTRIFUGAL PUMPS

EURO

EUROINOX

EUROCOM

Multistage horizontal centrifugal pump, featuring extremely silent running suitable for domestic use for water supply and pressurisation, irrigation of gardens and vegetable gardens, and moving water in general.
Euro: pump body in 200 UNI ISO 185 cast iron.
Euroinox: stainless steel pump body.
Eurocom: technopolymer pump body.
Motor support in die-cast aluminium, seal holder in AISI 304 steel.
Mechanical seal in carbon/ceramic.
Rotor shaft in AISI 304 steel.
Rotors, diffuser bodies and diffusers in technopolymer.
Adjustment rings in stainless steel.

Protection level of motor IP 44.
Protection level of terminal board IP 55.
Insulation class F.
Operating range from 10 to 120 l/min. with a head of up to 72 m.
Pumped liquid characteristics clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallised, chemically neutral and close to the characteristics of water.
Liquid temperature range
From 0°C to +35°C C for domestic use (EN 60335-2-41).
From 0°C to +40°C for other uses.
Maximum ambient temperature +40°C.
Maximum operating pressure 8 bar (800 kPa).
Euroinox self-priming other uses.
Maximum ambient temperature +40°C.
Maximum operating pressure 8 bar (800 kPa).
Euroinox self-priming.

IE3 ≥ 0,75 kW

MULTI INOX

SELF-PRIMING HORIZONTAL MULTISTAGE PUMPS

Self-priming multistage pumps ideal for water supply in domestic and garden applications.
High performances.
Available with 3 - 4 - 5 **impellers in AISI 304 stainless steel**.
Materials resistant to corrosion and oxidation.
Motor with thermal overload protection.
Double insulation between motor and hydraulic section.
Optimal resistance to low temperatures.
Supplied complete with power cable and plug.

Liquid temperature range
From 0°C to +35°C (for domestic use) (EN 60335-2-41).
From 0°C to +40°C (for other uses).

JET M-P - JETINOX M-P - EUROINOX M-P

CENTRIFUGAL PUMPS FITTED

EUROINOX M-P

JET 151-251 T-P

SINGLE-PHASE VERSION
Self-priming pump equipped with gauge, pressure switch, power supply cable with plug and three-way brass fitting for connecting to a tank.

THREE-PHASE VERSION
Self-priming electropump equipped with gauge, pressure switch, overload cutout and three-way brass fitting for connecting to a tank.

Operating range
From 0.4 to 10.5 m³/h with head up to 62 metres.

Liquid quality requirements clean, free from solid or abrasive contaminants, not viscous, not aggressive, not crystallised and chemically neutral, close to the properties of water.

Liquid temperature range from 0°C to +35°C for domestic use (EN 60335-2-41).
For other use: from 0°C to +40°C .

Maximum ambient temperature +40°C.

Maximum operating pressure 8 bar (800 kPa).

Installation fixed in a horizontal position.

Special executions on request
Different frequencies and/or voltage.

Motor protection rating IP 44.

Terminal block protection rating IP 55.

Insulation class F.

Standard input voltage
Single phase 220/240 V - 50 Hz.
Three phase 230/400 V - 50 Hz.

IE3 ≥ 0,75 kW

JET - JETINOX - EUROINOX WITH CONTROL D

AUTOMATIC ON / OFF PRESSURIZATION SYSTEMS

NEW

JET WITH CONTROL D

JETINOX WITH CONTROL D

EUROINOX WITH CONTROL D

Self-priming pumps (Jet/Jetinox) or multi-impeller self-priming pumps (Euroinox) suitable for domestic use for water supply and pressurization, irrigation of gardens, or movement of water in general. Automatic operation via CONTROL-D, with integrated dry-running protection.

CONTROL-D

Electronic controller for the command and protection of domestic pumps. Automatic on and off. Dry-running protection with fault led signaling and automatic reset. Possibility of manual reset via reset button. Anti-lock function.

Flow rate (range) up to 80 l/min

Head 72 m

Type of pumped liquid clean, free from solid or abrasive substances, non-viscous, non-aggressive, non-crystallized and chemically neutral.

Liquid temperature (range)

from 0 to +35°C for domestic use (EN 60335-2-41);
from 0 to +40°C for other use

Operation pressure (maximum)

6 bar (600 kPa) Jet;
8 bar (800 kPa) Jetinox - Euroinox.

Motor protection class

IP 44 (IP 55 to the terminal);
IP 65 Control-D

Motor insulation class F.

AQUAJET - AQUAJETINOX

SELF-PRIMING AUTOMATIC BOOSTER

Automatic water lifting units, suitable for domestic use, small installations for civil, agricultural, industrial use, washing and hobby applications.
The unit is equipped with a JET or JETINOX type self-priming electropump, vessel, pressure switch for automatic operation, pressure gauge, fitting kit between pump and motor, all pre-assembled.
Tank: horizontal, 20 litres capacity type, inner single diaphragm high-grade butyl membrane and virgin polypropylene liner, complete with stands at the bottom and brackets for fixing the pump to the top.

Operating range
Up to 5.4 m³/h with head up to 61 metres.

Liquid temperature range
From 0°C to +35°C for domestic use.
From 0°C to +40°C for other use.

Pumped liquid characteristics clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

Maximum ambient temperature +40°C.

Maximum working pressure 8 bar (800 kPa).

Protection level
IP 44 (IP 55 terminal board protection).

Insulation class F.

TANK WITH **5 YEARS** OF GUARANTEE

NBB

MOUNTING KIT FOR WATER COLLECTION AND PRESSURIZATION

NBB is the solution for a domestic pressurizing system.
The basic concept is the modularity of its components such as: the NBB TANK KIT, the submerged or the surface pump, the inverter (in case the pump is without integrated electronics) and an assembling kit including the expansion tank (where this is not integrated in the pump itself). In all its different configuration the NBB is characterized by its compact dimension, great comfort and, in the version with inverter, also by an important aspect in terms of energy saving.

NBB TANK KIT consists of:

- 280 Lt. tank suitable for potable water compliant with the European norms EN1717 e EN13077
- Equipped with Filling valve and overflow valve
- Protection grid

Choosing the ADDITIONAL TANK KIT, consisting of a 280 liter tank, the junction elbow plus gasket and a belt, it's possible to double the capacity of the system. In addition to the NBB it is necessary to chose the assembling kit corresponding to the type of pump (or pump with inverter) to be utilized. The pump to be installed, as well as the inverter, are not included in the kit and must be order separately. The installation kit comprehends all the accessories necessary for the installation of the pump (or the inverter) to the NBB TANK KIT. For the PULSAR and EUROINOX installation kits also a 4 liter expansion tank is included.

Operating range
From 10 to 120 litres/min. with head up to 72 m.

Liquid temperature range
For domestic use: from 0°C to +35°C.

Liquid quality requirements
Suitable for potable water pursuant to EN1717 and EN13077 European standards.

Maximum ambient temperature +40°C.

Max. operational pressure
8 bar (800 kPa) for surface pump configurations.

Max. inlet pressure 6 bar.

Protection rating
IP44 for surface pumps.
IP68 for submerged pumps.

Insulation class F.

ACTIVE SWITCH

RAIN WATER SYSTEM

Active Switch is a complete and pre-assembled system for using rainwater in one or two-family houses.
The system comprises a recyclable polyethylene tank, an automatic pump Active EI 30/50 M series and a three-way automatic valve assembled on suction port of the pump.
The system has been designed to be wall-mounted.
Supplied with wall bracket and float switch, with 20 mt of cable, as a standard

Working ambient temperature min +5°C - max +40°C.
Max. Flow 80 l/min.
Max. Head 42,2 m.
Liquid temperature range from +5°C up +35°C.
Max. Working pressure of the system 6 bar (600kPA).
Max. Pressure of main supply line 4 bar (400kPA).
Max. Height of working uses 15 meters.
Potable water connector 3/4".
Pump suction and delivery ports 1".

AQUAPROF

RAIN WATER SYSTEM

Aquaprof is a complete and pre-assembled system for using rainwater in one or two-family houses.
The system comprises a recyclable polyethylene console, a completely automatic electronic control unit, three-way automatic valve and electropump Eurolnox 30/50 M or Eurolnox 40/50 M series.
Supplied with wall bracket as a standard and float switch with 20 mt of cable for Aquaprof Basic version, or probe sensor level with 20 mt of cable for Aquaprof TOP.

Protection Level IP 42.
Working ambient temperature min. +5°C - max. +40°C.
Max. Flow 80 lt/min.
Max. Head 42,2 m. (Aquaprof 30/50). 57,7 m. (Aquaprof 40/50).
Liquid temperature range from + 5°C up to +35°C.
Max. Working pressure of the system 6 bar (600kPA).
Max. Pressure of main supply line 4 bar (400kPA).
Max. Height of working uses 15 meters.
Potable water connector 3/4".
Pump suction and delivery ports 1".

EBOX

ELECTRONIC PROTECTION AND CONTROL PANEL

EBox plus D

EBox basic

ebox

EBOX BASIC

Electronic control panel for the protection and automatic operation of one or two single-phase submersible or pressurization pumps for domestic applications. Compatible with all pump models with current between 1 and 12 A with power up to 2,2 kW, as shown in the product compatibility table.
Available with 3" display (D versions) which guide the installer during the initial installation settings, monitor the status of the pumps and sensors, set the start/stop levels and view the error list. It is also possible to take advantage of the Dconnect service, which allows you to monitor and control the systems remotely, on a smartphone, PC or tablet. The service is available only by purchasing the DConnect Box.

EBOX PLUS

Electronic control panel for the protection and automatic operation of one or two submersible or pressurization pumps, both single-phase and three-phase, installed in residential building service or commercial building service. Thanks to the possibility of regulating the current, the panel is compatible with all pump models supplied with current between 1 and 12 A with power up to 5,5 kW as shown in the product compatibility table.
Available with 3" display (D versions) which guide the installer during the initial installation settings, monitor the status of the pumps and sensors, set the start/stop levels and view the error list. It is also possible to take advantage of the Dconnect service, which allows you to monitor and control the systems remotely, on a smartphone, PC or tablet. The service is available only by purchasing the DConnect Box.

Nominal tension of power supply
Ebox plus 1x 230 V / 3 x 230 V - 3 x 400 V (automatic selection).
Ebox basic 1x 230 V.
Frequency 50 - 60 Hz.
Maximum use of power
Ebox plus 5,5 kWatt + 5,5 kWatt.
Ebox basic 2,2 kWatt + 2,2 kWatt.
Maximum use of current 12 A + 12 A.
Starting capacitor
KIT supplied as an accessory.
Limits of use ambient temperature
-10° C + 40° C.
Limits of storage temperature
-25° C + 55° C.
Relative humidity to the air 90% a 20° C.
Max altitude max 1000 s.l.m.
Degree of protection IP 55.
Reference standard for the construction of the panels EN 60335-1.

DISPLAY

Thanks to the configuration wizard, installation of display versions is much simpler.

Management is also much easier, thanks to the status always being visible and to a range of additional functions, such as the anti-seizing of drainage pumps, the alarm log, the language selection, and the password protected settings.

SMART PRESS

ON/OFF CONTROLLER

The SMART PRESS controls starting and stopping of the pump.
This device offers dry run protection for the pump.
It is advisable to use an expansion vessel.

SMART PRESS has an adjustable minimum restart pressure and with high flow rates, pressure losses are low.
All the SMART PRESS models have a MANUAL AND AUTOMATIC RESTART.

INDEX - SWIMMING POOL, POND AND SALT WATER PUMPS

SWIMMING POOL PUMPS

SALT WATER PUMPS

POND PUMPS

ESWIM - EPRO

ELECTRONIC SWIMMING POOL PUMP

Electronic pumps with variable frequency drive for swimming pools and fish farms suitable for filtering salt or chlorine water in residential building service and commercial building service.
The pumps are quiet, programmable and equipped with a large inspectable pre-filter.
ESwim 150 and ESwim 150 SVRS have a 12-pin control card which makes them compatible with any control panel, both analog and digital. Lid of the pre-filter in transparent polycarbonate and in antioxidant material for an easy visual inspection. Permanent magnet synchronous motor, brushless. The motor is cooled by the pumped liquid, it is without cooling fan so the noise level is only 45 dB. Bayonet lid closure for ESwim, lid closure with wing screws for EPro. It is possible to remote control the pumps via 0-10 V, 4-20 mA and PWM signal.
Thanks to the variable frequency drive, the pumps can operate at constant speed or with constant flow (without the use of sensors) to optimize performance and minimize energy consumption. The control panel has 4 buttons with 8 programmable speeds and status and alarm signalling LEDs. There is a menu for weekly and seasonal programming. The SVRS version is equipped with a software function that disables pump suction if an obstruction is detected. "SVRS" is an acronym that means Safety Vacuum Release Systems.

SUITABLE ALSO FOR SALT WATER

Flow rate maximum
150 versions: 32 m³/h.
300 versions: 42,6 m³/h.

Head up to
150 versions: 16 m.
300 versions: 26 m.

Type of pumped liquid
Clean or slightly dirty water with suspended solid bodies, long fibers; particularly aggressive water with high percentages of chlorine / bromine and PHMB (Polyhexamethylene Biguanide) or water treated with chlorine electrolysis process.

Maximum % of glycol 6,5 - 8,4.

Max. supported liquid temperature +40°C.

Maximum ambient temperature +50°C.

Maximum operating pressure bar / kPa
150 versions: 2,5 bar.
300 versions: 2,8 bar.

Class of protection
150 versions: IP 55.
300 versions: IP 56.

Motor insulation class F.

Impeller/s material Techopolimer.

ENERGY STAR

NSF Certified to NSF/ANSI Standard 50

EUROSWIM

SWIMMING POOL CENTRIFUGAL PUMPS

SUITABLE ALSO FOR SALT WATER

High efficiencyself-priming centrifugal pumps with built-in large capacity prefilter. Extremely quiet running and great reliability, developed for water circulation and filtration in domestic and residential swimming pools. Suitable also for special applications that call for handling of aggressive liquids, in fish farms, agriculture and industry. Pump body in fibreglass reinforced technopolymer. Strainer cover in clear antioxidant polycarbonate to guarantee constant visibility through time. Nylon strainer. Impeller in fibreglass-reinforced technopolymer developed to ensure total coverage and isolation of the motor shaft from the pumped liquid. Diffuser in reinforced technopolymer. Mechanical seal in carbon / alumina / NBR / AISI 316. Pump body O-rings in NBR, threaded fasteners and reinforcing rings in AISI 304. Butterfly drain plugs that can be removed and refitted without tools.
Asynchronous continuous duty 2-pole motor (S1) with generous range of power ratings from 0.5 HP to 3 HP, single phase and three-phase (see technical specifications). Motor casing in die cast aluminium with electrophoresic surface treatment to prevent oxidation even in aggressive environmental conditions. Baseplate supplied as standard with rubber mounts to reduce vibration transmission.
Single phase version with integral thermal and overcurrent protection and permanent split capacitor (PSC), assembled inside the terminal box for all versions.

Motor and terminal box protection rating IPX5.

Insulation class F.

Ball bearings
Water-proof,sealed,resistant to water and humidity. Motor construction to EN 60335-2-41 standards.

Standard voltage Single phase 220-240V 50Hz. Three-phase 230/400V 50Hz.

Operating range
Up to 42 m³/h with pressure head of up to 22 m.

Pumped fluid
Clean water or water slightly contaminated with suspended particulate, long fibre; highly aggressive water with high percentage contents of chlorine/ bromine and PHMB (Polyhexamethylene Biguanide) or water treated with chlorine electrolytic process.

Liquid temperature range up to 60°C.

Maximum ambient temperature +50°C

Maximum operating pressure 2,5 bar.

Installation fixed or portable in horizontal position.

Special executions on request
Alternative voltages and/or frequencies.

Fittings on request 2"/50 - 63 kit (two fittings + O-ring - see "Accessories").

Reference standard IEC – 60364.

IE3 ≥ 0,75 kW

60 dB

EUROPRO HIGH FLOW

SWIMMING POOL CENTRIFUGAL PUMPS

Self-priming, high-performance centrifugal pumps, with built-in large capacity prefilter. 2 or 4 pole motor completely isolated from the water. Extremely quiet and highly reliable, developed for the circulation and filtration in large swimming pool filtration systems. Also suitable for particular applications that require handling of **seawater** thanks to the mechanical seal made of AISI 316.
Prefilter body, pump body, volute, volute cover and pump body lid are made of polypropylene, resistant to chemical products found in swimming pools and reinforced with fibreglass. Prefilter basket made of polyetylene. Prefilter lid made of transparent polycarbonate with four knobs locking system.
Closed asynchronous motor with external ventilation with 2 or 4 poles depending on the model, with a wide capacity range from 3 to 15 Hp. Terminal box with IP55 Degree of protection.

Operating range
Up to 190 m3/h with head up to 22 m.

Standard Voltage
3 x 230-400V 50 Hz up to 4 kW.
3 x 400-690V 50 Hz over 4 kW.

Insulation class F.

Temperature range of the liquid up to 40°C.

Pumped Liquid Clean or slightly dirty water or a little aggressive (PolyHexamethylene Biguanide) or water treated with chlorine electrolysis process.

Maximum ambient temperature 40°C.

Installation in horizontal position.

Special executions on request
Other frequencies and/or voltages.

IE3 ≥ 0,75 kW

CAST IRON PREFILTERS

FOR MONOBLOC NORMALISED CENTRIFUGAL ELECTROPUMPS

PREFILTER

New range of cast iron prefilters complying with DIN 2501, with connection from DN 65 to DN 200.
They are provided with 3 or 4 closing knobs depending on the model, to ensure perfect sealing of the cap.
Vessel and prefilter cap in cast iron, basket in stainless steel AISI 316.

The new range of prefilters allows the use of monobloc normalised centrifugal pumps series NKM-G/NKP-G, from DN 40 to DN 150, for water circulation in large filtration systems.
The same filters can be used with normalised base pumps with joint (KDN) or with inverter MCE.

PREFILTER + PUMPS

Monobloc centrifugal pumps with joint to which a prefilter has been applied on suction to make them ideal for water circulation in large filtration systems.
The pump and prefilter are sold separately.
Single-stage spiral body in cast iron complying with DIN-EN 733 (ex DIN2455), cast iron support, flanges complying with DIN 2533.
Cast iron impeller,closed and dynamically balanced with compensation of the axial thrust through balancing holes. Pump shaft in stainless steel AISI 304, **carbon /silicon carbide mechanical seal with O-Rings in Viton.**
Closed type asynchronous motor with external ventilation, constructive shape B3/B5, with two poles for NKP and four poles for NKM.
Vessel and prefilter cap in cast iron, basket in stainless steel AISI 316.

Rotation speed 1450-2900 1/min.

Operating range
From 1 to 440 m^3/h with head up to 24 metres.

Pumped fluid Clean water or slightly dirty or slightly aggressive, on condition that in the last case the compatibility of the materials of which the pump is made is demonstrated, and that the power of the motor installed is suitable for the specific weight and viscosity of the fluid.

Range of temperature of the fluid
From -10°C to + 140°C.

Maximum environment temperature +40°C.

Installation in horizontal position.

TOP Version
Bronze impeller and cataphoresis treatment.

EUROCOVER

SUBMERSIBLE SWIMMING POOL PUMPS

Totally automatic submersible electric pump, with wide support base specially designed to increase stability and to offer the possibility to operate also in positions which are not perfectly perpendicular to the ground.
Suitable for use during the winter period above the pool covers, to remove rainwater and avoid damage to the cover due to the excessive weight of the accumulated water. Electric pump made of resistant thermoplastic material. Motor, shaft, bolts and screws in stainless steel.
Triple interposed ring seal with oil prechamber.
Incorporated float for automatic operation.
Submersible with continuous duty asynchronous motor.
Stator positioned in stainless steel enclosure with cap to cover wiring and capacitor.

Protection rating IP68

Insulation class F

Input voltage 230V - 50Hz single phase
Supplied with 10m cable and Schuko plug / 10 m rope for positioning on sheets
Multi-hose fitting with clapet valve

Operating range
From 0.5 to 6 m^3/h with head up to 6.5 m

Liquid temperature range
From 0 to 35 °C (EN 60335-2-41)

Installation fixed or portable in vertical position (max. inclination 10°)

Particle size 5 mm

Automatic start/stop start 55 mm - stop 35 mm

JETCOM SP - EUROCOM SP

SWIMMING POOL CENTRIFUGAL PUMPS

Self-priming centrifugal (Jetcom) or multistage (Eurocom) pump with excellent suction capacity even when there are air bubbles. Suitable for use with water containing small sand impurities. Especially suitable for water supplies in domestic systems: handling of aggressive water in general with chlorine contents (swimming pools). Pump body in technopolymer.
Support and seal-carrier in AISI 316 STAINLESS STEEL.
Carbon/ceramic mechanical seal.
Rotor shaft in AISI 316 STAINLESS STEEL.
Impellers, diffuser, Venturi tube, and sand guard in technopolymer.
Clearance rings in stainless steel.
Continuous duty asynchronous motor.
Built-in motor overload cut out and a capacitor permanently on in the single-phase version.
Protection for the three-phase version is the responsibility of the user.

Motor protection level IP 44

Terminals protection level IP 55

Insulation class F

Standard voltage 220/240V - 50 Hz single-phase
230/400V - 50 Hz three-phase

Operating range from 10 to 80 l/min with head of up to 58 m depending on the model

Liquid quality requirements clean, free of solid or abrasive contaminants, swimming pool water (containing chlorine).

Liquid temperature range
from 0°C to +35°C for domestic use
(EN 60335-2-41)
from 0°C to +40°C for other uses.

Maximum ambient temperature +40°C

Maximum operating pressure 6 bar (600 kPa)

Installation fixed or portable in horizontal position

IE3 ≥ 0,75 kW

MULTI 4 SW

SELF-PRIMING HORIZONTAL MULTISTAGE PUMPS

Is a self-priming multistage surface pump specifically constructed to pump salt water. Low noise and high pressure performance. **Available with 4-Noryl impeller.**
Anti-corrosive and rust-proof materials.
Motor with thermic overload protection.
Double sealing system between motor and hydraulic part. High resistance to frost and icing.
Supplied with power cable with plug, and self-sealing fitting.
Supplied complete with power cable and plug.

Operating range
capacity up to 90 l/min; head up to 46 m.

Liquid temperature range
from 0 °C to +35 °C for domestic use.
from 0 °C to +40 °C for other uses.

Pumped liquid
Designed to specifically pump salt water.

Maximum suction capacity 8 metres.

Maximum ambient temperature +40 °C.

Protection class IPX4.

Insulation class F.

Installation fixed or portable, horizontal position.
Special versions on requests: alternative voltages and/or frequencies.

NOVA SALT W

SUBMERSIBLE PUMPS

The Nova Salt W M-A is a multi-purpose submersible pump specifically constructed for use in **salt water.**
Anti-corrosive and rust-proof materials.
Motor casing, shaft, screws and nuts made of stainless steel AISI 316.
Cable with tin plated conductors.
Motor with thermic overload protection.
Wear resistant shaft and impeller.
Excellent cooling of the motor that enables the pump to operate even when it is partially submersible.
Manual and Automatic version with start/ stop float switch.
Supplied with power cable with plug and self-sealing fitting.

Operating range
from 1 to 7.5 m³/h with head up to 6 metres.

Liquid temperature range
from 0 °C to +35 °C for domestic use.

Pumped liquid dirty water, without fibre, including salt water.

Max. immersion depth 7 metres.

NOVAPOND

SUBMERSIBLE PUMPS

The models NovaPond are submersible pumps specially designed for the recirculation of water in garden ponds, to create waterfalls or other water features. They are designed to pump clean water containing solid particles with a maximum diameter of 10 mm.
Suitable for continuous operation.
Designed for horizontal or vertical installation.
Environmentally safe.
Materials resistant to corrosion and oxidation.
Motor with thermal overload protection.
Adjustable suction filter to enable transit of solid particles with a diameter from 5 mm to 10 mm.
Supplied with power cable and plug, and self-sealing coupling.

Operating range
From 1 to 14 m^3/h with head up to 9.4 metres.
Suitable for continuous operation.

Liquid temperature range
From 0°C to +35°C.

Pumped liquid
Clean water, without fibres and with particles with maximum diam. 10 mm.

Max. immersion depth 7 metres.

INDEX - CENTRIFUGAL PUMPS

KPS - KPF

PERIPHERAL PUMPS

KPS

KPF

Peripheral centrifugal pump, reduced encumbrance, able to generate high heads, it is suitable for domestic use and small industrial uses.
Pump body and motor support in brass for the KP 60 version, in cast iron for the KPS 30 and KP 38 versions.
Brass impeller.
Mechanical seal in carbon/ceramic.
Asynchronous, closed motor, cooled by external ventilation.
Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version.
For the protection of the three-phase motor it is advisable to use a suitable overload protection complying with the regulations in force.

Operating range
From 1 to 50 l/min. with head up to 107 metres.

Liquid temperature range
From 0°C to +35°C for domestic use.
From -10°C to +50°C for other uses.

Pumped liquid characteristics clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

Maximum ambient temperature +40°C.

Maximum working pressure
10 bar (6 bar for KPS-KPF 30/16).

Protection level IP 44

Insulation class F.

IE3 ≥ 0,75 kW

[1] KPS-fitted: Pump fitted with a pressure gauge, pressure switch, power supply cable with plug and five-way fitting for connection to a tank.

KE SINGLE IMPELLER

SINGLE IMPELLER CENTRIFUGAL PUMPS WITH INVERTER MCE/P

Single impeller centrifugal pump suitable for pressure booster systems and domestic, civil, industrial and agricultural systems.
Particularly versatile thanks to the use of the **MCE/P** inverter, this pump guarantees the automatic adjustment of its performance to the various system requirements, while maintaining constant the differential pressure.
Pressure sensor included.
Pump body and motor support in cast iron.
Technopolymer impeller for the KE 36/200, KE 40/200 and KE 55/200 versions; cast iron impeller for the other pumps.
Carbon/ceramic mechanical seal.
Asynchronous, closed motor cooled by external ventilation.
Motor shaft mounted on generously sized ball bearings to ensure silent running and long life.

Operating range
From 6 to 100 m^3/h with head up to 60 meters.

Liquid temperature range
From -10°C to +50°C for the KE 36/200 and KE 40/200 versions, from -15°C to +110°C for other pumps.

Pumped liquid clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral, close to the properties of water.

Installation normally horizontal or vertical provided the motor is always above the pump.

Maximum ambient temperature +40°C.

Maximum working pressure
KE 36/200, KE 40/200, KE 55/200:8 bar (800 kPa)
KE 40/400, KE 50/400, KE 30/800, KE 40/800, KE 50/800, KE 20/1200, KE 25/1200, KE 35/1200: 10 bar (1000 kPa).

Protection rating IP 44.

Terminal box protection rating IP 55.

Insulation class F.

KE TWIN IMPELLERS

TWIN IMPELLERS CENTRIFUGAL PUMPS WITH INVERTER MCE/P

Twin impeller centrifugal pump, suitable for pressure booster systems and domestic, civil, industrial and agricultural systems.
Particularly versatile thanks to the use of the **MCE/P** inverter, this pump guarantees the automatic adjustment of its performance to the various system requirements, while maintaining constant the differential pressure.
Pressure sensor included.
Pump body and motor support in cast iron.
Technopolymer impeller.
Carbon/ceramic mechanical seal.
Asynchronous, closed motor cooled by external ventilation.
Motor shaft mounted on generously sized ball bearings to ensure silent running and long life.

Operating range
From 2 to 30 m^3/h with head up to 95 meters.

Liquid temperature range
From -10 °C to 50 °C: for KE 35/40, KE 45/50, KE 55/100.
From -15 °C to 110 °C: for KE 55/50, K 66/100, K 90/100, K 70/300, K 80/300, K 70/400, K 80/400.

Pumped liquid clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral, close to the properties of water.

Installation normally horizontal or vertical provided the motor is always above the pump.

Maximum ambient temperature +40°C.

Maximum working pressure
KE 35/40: 6 bar (600 kPa)
KE 45/50, KE 55/50: 8 bar (800 kPa)
KE 55/100, KE 66/100: 10 bar (1000 kPa)
KE 90/100, KE 70/300, KE 80/300 KE 70/400, KE 80/400: 12 bar (1200 kPa).

Protection rating IP 44.

Terminal box protection rating IP 55.

NKM-GE / NKP-GE WITH MCE/P

ENBLOC CENTRIFUGAL PUMPS WITH INVERTER

Enbloc electric centrifugal pumps with coupling, designed for a wide range of applications such as:

- Homes;
- Apartment blocks;
- Camp sites;
- Swimming pools;
- Farms;
- Well water supply;
- Irrigation for greenhouses, gardens, agriculture;
- Re-use of rainwater;
- Industrial systems.

Highly versatile pumps thanks to the use of the **MCE/P** inverter, to guarantee performance able to automatically adapt to the various system requirements, while maintaining constant pressure. Spiral single-stage body in cast iron according to DIN-EN 733 (ex DIN 24255), cast iron support, flanges according to DIN 2533 and DIN 2532 for DN 200. Cast iron impeller, sealed and dynamically balanced with compensation of the axial thrust via balancing holes, operating (on request) on interchangeable wear rings. Pump shaft in AISI 304 stainless steel. Seal: standardised mechanical seal according to DIN 24960 in carbon/silicon carbide with O-rings in EPDM. Asynchronous, closed motor cooled by external ventilation, construction design B3/B5, 2-pole for NKPGE and 4-pole for NKM-GE.
Rotor mounted on generously sized ball bearings to ensure silent and durable operation.

Speed of rotation 1450 - 2900 1/min.

Operating range
From 1 a 450 m^3/h head up to 72 meters.

Liquid temp. range from -10°C to +80°C.

Pumped liquid clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral and close to the characteristics of water.

Installation normally horizontal or vertical provided the motor is always above the pump.

Max. ambient temperature +40°C.

Maximum operating pressure
16 bar - 1600 kPa (for DN 200 max. 10 bar).

Protection rating IP 55.

Insulation class F.

Flanging PN 16 DIN 2533.

Special versions on request
Pumps for liquids other than water.
Other voltages and/or frequencies.
Inverter modulation with 0-10V signal.

IE3 ≥ 0,75 kW

STANDARDISED CENTRIFUGAL PUMPS ON SKID WITH INVERTER

Standardised centrifugal pumps on skid with elastic coupling, electronics designed for a wide range of applications such as:

- Homes;
- Apartment blocks;
- Camp sites;
- Swimming pools;
- Farms;
- Well water supply;
- Irrigation for greenhouses, gardens, agriculture;
- Re-use of rainwater;
- Industrial systems.

Highly versatile pumps thanks to the use of the DAB **MCE/P** inverter, to guarantee performance able to automatically adapt to the various system requirements, maintaining constant pressure. Pressure sensor included. Spiral single-stage body in cast iron according to DIN-EN 733 (ex DIN 24255), cast iron seal cover and motor support, flanges according to DIN 2533 (DIN 2532 for DN 200). Cast iron impeller, sealed and dynamically balanced with axial thrust compensation via balancing holes, operating (on request) on interchangeable wear rings. Pump shaft in stainless steel mounted on two generously sized ball bearings, permanently lubricated and housed in a special chamber inside the support. Standard seal: standardised mechanical seal according to DIN 24960 in carbon/silicon carbide with O-rings in EPDM. On request, packing seals are available, with hydraulic lubrication ring and gland in two easily removable parts. Sealed, asynchronous motor cooled by external ventilation; 2-pole or 4-pole. Rotor mounted on generously sized ball bearings to ensure silent and durable operation. Electrical protection: according to standards transposed into the ELECTROMAGNETIC COMPATIBILITY DIRECTIVE EEC 89/336 and subsequent amendments, LOW VOLTAGE DIRECTIVE EEC 73/23 and subsequent amendments and standards CEI 2-3.

Construction design B3.

Speed of rotation 1450 - 2900 1/min.

Operating range
From 1 a 440 m^3/h with head up to 70 meters.

Liquid temp. range from -10°C to +140°C.

Pumped liquid clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral, characteristics similar to water.

Max. ambient temperature +40°C.

Maximum operating pressure
16 bar - 1600 kPa (per il DN 200 max 10 bar).

Protection rating IP 55.

Thermal category F.

Flanging
PN 16 DIN 2533.
PN 10 DIN 2532 per DN 200.

Installation fixed horizontally.

IE3 ≥ 0,75 kW

KVCE 30-50-80-120

MULTISTAGE CENTRIFUGAL PUMPS WITH VERTICAL AXIS WITH INVERTER MCE/P

Vertical multistage centrifugal pump suitable for small and medium consumption water systems.
Particularly versatile thanks to the use of the **MCE/P** inverter, this pump guarantees the automatic adjustment of its performance to the various system requirements, while maintaining constant the differential pressure.
Suitable for booster sets, feeding of drip and spray irrigation systems and washing systems.
Innovative and sturdy design.
Discharge/suction body in technopolymer and IN-LINE suction and discharge ports with threaded metal insert.
Impellers, diffuser bodies and diffusers in technopolymer, entirely stainless.
Pump liner, wear rings and seal plate in AISI 304 stainless steel.
Mechanical seal in carbon/ceramic, mounted on motor shaft extension in stainless steel AISI 303.
Asynchronous, closed motor cooled by external ventilation.
Motor shaft mounted on oversized greased sealed-for-life ball bearings to ensure silent running and long life.
Construction to CEI 2-3 and CEI 61-69 (EN 60335-2-41).

Protection rating IP 55.

Insulation class F.

Standard voltage
Single-phase 1x220-240 V / 50/60 Hz.
Three-phase 3x400 V / 50 Hz.

Operating range
From 1 to 12 m³/h with head up to 107 meters.

Pumped liquid clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral, close to the properties of water.

Liquid temperature range
From 0°C to +35°C for domestic use (Safety standards EN 60335-2-41).
From 0°C to +40°C for other uses.

Maximum ambient temperature +40°C.

Maximum working pressure 12 bar (1200 kPa).

Installation fixed, in a vertical position.

NKVE 1-3-6-10-15-20 S

MULTISTAGE CENTRIFUGAL PUMPS WITH VERTICAL AXIS WITH INVERTER MCE/P

The image of the product is purely indicative.

Vertical multi-impeller centrifugal pumps in AISI 304 stainless steel (versions 1 S, 3 S, 6 S, 10 S, 15 S, 20 S) or in cataphoresis cast iron (NKVE 32, 45, 65, 95) with joint and with MCE-P variable frequency drive installed as standard, designed for pressurization activities in commercial building service, usable also in agriculture in irrigation systems and washing systems.
Impellers, diffusers and pump liner made of AISI 304 stainless steel (AISI 316 stainless steel available on request - X version).
Centre distance between the two in-line ports designed to maximize interchangeability.
Starting from 5,5 kW models, the mechanical seal can be removed without removing the motor.
Mechanical seals for aggressive liquids and different connections (round, oval, Victaulic, clamp, flanges).
All models in stainless steel AISI 316 - version X - are certified for use with drinking water (WRAS and ACS certifications).
Coupled by means of a removable rigid joint to high energy efficiency IE3 electric motors.
DConnect compatible (with DConnect Box supplied separately).

Operating range (flow rate and head)
1 m³/h to 30 m³/h with head up to 320 m.

Type of pumped liquid Clean, free of solids and abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

Maximum % of glycol 30%.

Min. and max. supported liquid temperature
-30 °C to +120 °C (EPDM).
-15 °C to +120 °C (Viton/FKM).

Maximum ambient temperature +50° C.

Maximum operating pressure bar / kPa
25 bar / 2500 kPa.

Class of protection IP 55.

Motor insulation class F.

Impeller/s material
AISI 304 stainless steel for NKV S.
AISI 316 stainless steel for NKV X (only on request).

Single phase power input 1x230 V up to 2,2 kW.

Three phase power input
380 - 415 V at 50 Hz from 3 kW.

Possible type of installation Vertical position.

Special versions on request
Yes, available with different types of mechanical seals for aggressive liquids and connections (round, oval, Victaulic, clamp flanges), **with parts in contact with the liquid in AISI 316 stainless steel (X versions)**, other voltages and frequencies, ATEX version.

WRAS APPROVED PRODUCT | ATTESTATION DE CONFORMITÉ SANITAIRE ACS | **IE3 ≥ 0,75 kW** | D+ CONNECT | PAGE 9 | MCE/P PAGE 43 | ACCESSORIES PAGE 235

HIGH EFFICIENCY

The new NKVE pumps are supplied with IE3 class motors and comply with the highest energy efficiency standards on the water handling market.

PERFORMANCE FOR EVERY NEED

max ambient temp. 50°C
Q max 30 m³/h
H max 320 m

They offer incredible application flexibility thanks to a complete performance range and the ability to work with ambient temperatures up to 50°C.

ROBUSTNESS AND RELIABILITY

All parts in contact with liquids are made of AISI 304 stainless steel (AISI 316 X versions).
DAB construction quality guarantees solidity and greater resistance to wear and tear.

THE EASIEST REPLACEMENT EVER

In addition, the new range has been designed to simplify replacement thanks to the standard flanges and standard centre distances.

NKVE 15 / 10 S 110 E1 IE3

NKVE 32-45-65-95

MULTISTAGE CENTRIFUGAL PUMPS WITH VERTICAL AXIS WITH INVERTER MCE/P

The image of the product is purely indicative.

Vertical multi-impeller centrifugal pumps in AISI 304 stainless steel (versions 1 S, 3 S, 6 S, 10 S, 15 S, 20 S) or in cataphoresis cast iron (NKVE 32, 45, 65, 95) with joint and with MCE-P variable frequency drive installed as standard, designed for pressurization activities in commercial building service, usable also in agriculture in irrigation systems and washing systems.
Impellers, diffusers and pump liner made of AISI 304 stainless steel (AISI 316 stainless steel available on request - X version).
Centre distance between the two in-line ports designed to maximize interchangeability.
Starting from 5,5 kW models, the mechanical seal can be removed without removing the motor.
Mechanical seals for aggressive liquids and different connections (round, oval, Victaulic, clamp, flanges).
All models in stainless steel AISI 316 - version X - are certified for use with drinking water (WRAS and ACS certifications).
Coupled by means of a removable rigid joint to high energy efficiency IE3 electric motors.
DConnect compatible (with DConnect Box supplied separately).

Operating range
From 1 m^3/h to 120 m^3/h with head up to 320 m.

Type of pumped liquid Clean, free of solids and abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral.

Maximum % of glycol 30%.

Min. and max. supported liquid temperature
From -30 to +120°C (EPDM).
From -15°C to +120°C (Viton/FKM).

Class of protection IP 55.

Motor insulation class F.

Impeller/s material
AISI 304 stainless steel.
AISI 316 for NKV X only on request.

Single phase power input 1x230 V up to 2,2 kW.

Three phase power input
380 - 415 V at 50 Hz from 3 kW.

Possible type of installation Vertical position.

Special versions on request
Yes, available with different types of mechanical seals for aggressive liquids and connections (round, oval, Victaulic, clamp flanges), **with parts in contact with the liquid in AISI 316 stainless steel (X versions)**, other voltages and frequencies, ATEX version.

WRAS APPROVED PRODUCT | ACS ATTESTATION DE CONFORMITÉ SANITAIRE | **IE3 ≥ 0,75 kW** | D+ CONNECT

NKM-GE / NKP-GE WITH MCE/C

ENBLOC CENTRIFUGAL PUMPS WITH INVERTER

Enbloc electric centrifugal pumps with coupling, designed for a wide range of applications such as:
- Circulation of hot water for heating.
- Circulation of cold water for air conditioning.
- Circulation of cold water for cooling.

Highly versatile pumps thanks to the use of the **MCE/C** inverter, to guarantee performance able to automatically adapt to the various system requirements, while maintaining constant differential pressure. Spiral single-stage body in cast iron according to DIN-EN 733 (ex DIN 24255), cast iron support, flanges according to DIN 2533 and DIN 2532 for DN 200. Cast iron impeller, sealed and dynamically balanced with compensation of the axial thrust via balancing holes, operating (on request) on interchangeable wear rings.
Pump shaft in AISI 304 stainless steel. Seal: standardised mechanical seal according to DIN 24960 in carbon/silicon carbide with O-rings in EPDM. Asynchronous, closed motor cooled by external ventilation, construction design B3/B5, 2-pole for NKPGE and 4-pole for NKM-GE. Rotor mounted on generously sized ball bearings to ensure silent and durable operation.

Speed of rotation 1450 - 2900 1/min.

Operating range
From 1 a 450 m³/h head up to 72 meters.

Liquid temp. range from -10°C to +140°C.

Pumped liquid clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral and close to the characteristics of water.

Installation normally horizontal or vertical provided the motor is always above the pump.

Max. ambient temperature +40°C.

Maximum operating pressure
16 bar - 1600 kPa (for DN 200 max. 10 bar).

Protection rating IP 55.

Insulation class F.

Flanging PN 16 DIN 2533.

Special versions on request
Pumps for liquids other than water.
Other voltages and/or frequencies.
Inverter modulation with 0-10V signal.

IE3 ≥ 0,75 kW

KDNE WITH MCE/C

STANDARDISED CENTRIFUGAL PUMPS ON SKID WITH INVERTER

Standardised centrifugal pumps on skid with elastic coupling, electronics designed for a wide range of applications such as:
- Circulation of hot water for heating.
- Circulation of cold water for air conditioning.
- Circulation of cold water for cooling.

Highly versatile pumps thanks to the use of the DAB MCE/C inverter, to guarantee performance able to automatically adapt to the various system requirements, while maintaining constant differential pressure.
Spiral single-stage body in cast iron according to DIN-EN 733 (ex DIN 24255), cast iron seal cover and motor support, flanges according to DIN 2533 (DIN 2532 for DN 200). Cast iron impeller, sealed and dynamically balanced with axial thrust compensation via balancing holes, operating (on request) on interchangeable wear rings. Pump shaft in stainless steel mounted on two generously sized ball bearings, permanently lubricated and housed in a special chamber inside the support.
Standard seal: standardised mechanical seal according to DIN 24960 in carbon/silicon carbide with O-rings in EPDM. On request, packing seals are available, with hydraulic lubrication ring and gland in two easily removable parts.
Sealed, asynchronous motor cooled by external ventilation; 2-poles or 4-poles. Rotor mounted on generously sized ball bearings to ensure silent and durable operation. Electrical protection: according to standards transposed into the ELECTROMAGNETIC COMPATIBILITY DIRECTIVE EEC 89/336 and subsequent amendments, LOW VOLTAGE DIRECTIVE EEC 73/23 and subsequent amendments and standards CEI 2-3.

Construction design B3.

Speed of rotation 1450 - 2900 1/min.

Operating range from 1 a 440 m^3/h with head up to 70 meters.

Liquid temp. range from -10°C to +140°C.

Pumped liquid clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral, characteristics similar to water.

Max. ambient temperature +40°C.

Maximum operating pressure 16 bar - 1600 kPa (per il DN 200 max 10 bar).

Protection rating IP 55.

Thermal category F.

Flanging
PN 16 DIN 2533.
PN 10 DIN 2532 per DN 200.

Installation fixed horizontally.

Special versions on request.

IE3 ≥ 0,75 kW

KI

AISI 304 STAINLESS STEEL SINGLE IMPELLER CENTRIFUGAL PUMPS

Axial suction AISI 304 stainless steel single impeller centrifugal pump for pressurization in civil and industrial environments (cold and hot liquids, and coolants), of thermal waters, and for industrial washing systems.
The standard construction materials ensure higher resistance to oxidation (rust) and therefore to erosion, and most of all operation at high temperatures (90°C).
Other possibilities of use are: in propylene glycol (V version) and ethylene glycol (E version) chiller systems; in industrial washing systems using cold water, hot water, and coolants; with moderately oily or aggressive liquids (V and VS version).

Operating range
Up to 10 m^3/h with head up to 32 metres.

Pumped liquid clean, free of solids and abrasives, not viscous, not crystallised and chemically neutral, with properties similar to water.

Liquid temperature range from -10 °C to +90 °C.

Maximum ambient temperature +40 °C.

Maximum operating pressure 8 bar (800 kPa).

Protection class IP 55.

Insulation class F.

Standard voltage 220-230 V/50 Hz single-phase, 230-400 V/50 Hz three-phase.

Installation fixed horizontal or vertical position, provided that the motor is always above the pump.

Special executions on request
Special mechanical seals:
V version Alox Ceramic/Carbon/FKM: for oily liquids (up to 110°C) and propylene glycol.
VS version SiC/SiC/FKM: for oily liquids (up to 110°C) and abrasive particles.
Version E SiC/Carbon/EPDM: water up to 120°C and ethylene glycol.

IE3 ≥ 0,75 kW

K SINGLE IMPELLER

SINGLE IMPELLER CENTRIFUGAL PUMPS

K 35/1200 T

Single impeller centrifugal pump suitable for domestic, civil, industrial and agricultural installations and for decanting, mixing and irrigating uses.
Cast iron pump body and motor support.
Technopolymer impeller.
Stainless steel driving shaft.
Carbon/ceramic mechanical seal.
Asynchronous, closed motor, cooled by external ventilation.
Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version.
For the protection of the three-phase motor it is advisable to use a suitable overload protection complying with the regulations in force.

Operating range from 1,8 to 96 m^3/h with head up to 62 metres.

Pumped liquid characteristics clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised, chemically neutral and close to the characteristics of water.

Liquid temperature range
From -10°C to +50°C for K 20/41, K 30/70, K 30/100, K 36/100, K 12/200, K 36/200, K 40/200.
From -15°C to +110°C for the other pups.

Maximum operating range
K 20/41, K 30/70, K 30/100, K 36/100, K 12/200, K 14/400: **6 bar (600 kPa).**
K 36/200, K 40/200, K 55/200, K 11/500, K 18/500, K 28/500: **8 bar (800 kPa).**
K 40/400, K 50/400, K 30/800, K 40/800, K 50/800, K 20/1200, K 25/1200, K 35/1200: **10 bar (1000 kPa).**

Maximum ambient temperature +40°C.

Protection level IP 44.

Terminal board protection level IP 55.

Insulation class F.

IE3 ≥ 0,75 kW

K TWIN IMPELLERS

TWIN IMPELLERS CENTRIFUGAL PUMPS

K 35/40 M

K 70/300 T

Twin impeller centrifugal pump designed for use in pressurisation units for water supply systems for domestic, civil and industrial use.
Suitable for sprinkling irrigation and other water supply applications.
Cast iron pump body and motor support.
Technopolymer impeller.
Stainless steel driving shaft.
Carbon/ceramic mechanical seal.
Asynchronous, closed motor, cooled by external ventilation.
Built-in thermal and current overload protection and a capacitor permanently on in the single-phase version.
For the protection of the three-phase motor it is advisable to use a suitable overload protection complying with the regulations in force.

Operating range
From 1,2 to 30 m³/h with head up to 97 metres.

Pumped liquid characteristics clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised, chemically neutral and close to the characteristics of water.

Liquid temperature range
From -10°C to +50°C for K 35/40, K 45/50, K 35/100, K 40/100, K 55/100.
From -15°C to +110°C for K 55/50, K 66/100, K 90/100, K 70/300, K 80/300, K 70/400, K 80/400.

Maximum operating range
K 35/40, K 35/100, K 40/100: **6 bar (600 kPa).**
K 45/50, K 55/50: **8 bar (800 kPa).**
K 55/100, K 66/100: **10 bar (1000 kPa).**
K 90/100, K 70/300, K 80/300 K 70/400, K 80/400: **12 bar (1200 kPa).**

Maximum ambient temperature +40°C.

Protection level IP 44.

Terminal board protection level IP 55.

Insulation class F.

IE3 ≥ 0,75 kW

KC / KCV

CENTRIFUGAL PUMPS FOR AIR CONDITIONING

KC

KCV

Pumping of water or other not aggressive not explosive liquids that do not contain solid particles or fibre.
Especially suitable for handling water and glycol solutions in air conditioning circuits.

PLUS

VERSATILE: thanks to the high quality construction materials and oversized motors, the KC and KCV series of pumps can be used in surroundings with temperatures up to 65°C and a glycol percentage of as much as 40% in the handled liquid.

RELIABLE: all components are sized to guarantee a working life of at least 50,000 duty hours (with the exception of the bearings and mechanical seals, the manufacturers of which guarantee an average life of 25,000 hours in the most severe duty conditions).

RUST PROOF: all components in contact with the liquid are made of thermoplastic (polypropylene or reinforced Noryl) and the pump shaft is made of AISI 304 stainless steel.

FLEXIBLE: facility to rotate the pump body in steps of 90° for greater installation flexibility.

Complete hydraulic section (pump body, seal holder flange, impeller, diffuser) made of fibreglass reinforced technopolymer, shaft extension in contact with liquid in AISI 304 stainless steel, mechanical seal in silicon carbide/graphite.

O-rings in EPDM Externally cooled asynchronous motor for continuous duty (S1), 2 poles.

Maximum ambient temperature 65°C.

Motor protection rating IP55.

Insulation class
F (copper wire with class H insulation).

Standard input voltage
Three-phase 230-400 V/50 Hz.
Sealed, water resistant and humidity resistant ball bearings Motor construction to EN 60335-2-41.

Operating range from 3 to 45 m^3/h.

Maximum head 24 m.

Maximum working pressure 6.5 bar.

Liquid temperature range from -10 to +55°C.

Maximum glycol contents up to 40%.

Installation fixed or portable in horizontal position.

Pumped liquid
Maximum ambient temperature: 65 °C.

Special versions on request
Alternative voltages and/or frequencies.

IE3 ≥ 0,75 kW

NKM-G / NKP-G

STANDARDISED ENBLOC CENTRIFUGAL PUMPS

Enbloc centrifugal electric pumps with integral shaft designed for a wide range of applications, such as:

- Water supply
- Circulation of hot water for central heating.
- Circulation of cold water for air conditioning and refrigerating.
- Transfer of liquids in agriculture, horticulture and industries.
- Implementation of pumping systems

Pump construction characteristics:

Single-stage, cast iron spiral body made to DIN-EN 733 (formerly DIN 24255), cast iron support, flanges in accordance with DIN 2533. Cast iron impeller, encased and dynamically balanced with compensation of the axial thrust by means of balancing holes, operating (on request) with interchangeable consumable rings. AISI 304 stainless steel pump shaft.

Seal: standardised mechanical seal made to DIN 24960 in carbon / carborundum with O' rings in EPDM.

Motor construction characteristics

Closed, asynchronous motor with external ventilation, 2 poles for NKP and 4 poles for NKM. Rotor mounted on oversized ball bearings to ensure silent running and long life. We recommend using overload protection for the motor, in accordance with current norms. In the case of liquids denser than water, the motors must be proportionally more powerful.

Built to IEC 2-3 standards.

Protection level IP 55.

Insulation level F.

Standard voltage 230/400 V 50 Hz up to 2,2 Kw included 400 V Δ 50 Hz over 2,2 Kw.

Speed of rotation 1450 - 2900 1/min.

Operating range
From 1 to 105 m^3/h with head up to 96 metres.

Characteristics of pumped liquid clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral and close to the characteristics of water.

Liquid temperature range
From -10°C to +140°C.

Maximum ambient temperature +40°C.
(on request up to 50° C)

Maximum operating pressure 16 bar - 1600 kPa.

Flanging PN 16 DIN 2533.

Installation normally horizontal or vertical provided the motor is always above the pump.

Special versions on request
Pumps for liquids other than water.
Other voltages and/or frequencies.

IE3 ≥ 0,75 kW

ACCESSORIES PAGE 235

STANDARDISED CENTRIFUGAL PUMPS

End suction, centrifugal electric pumps with coupling designed for a wide range of applications such as:
- Supplying water.
- The circulation of hot water for central heating.
- The circulation of cold water for air conditioning and refrigerating.
- The transfer of liquids in agriculture, horticulture and industries.
- The implementation of pumping systems.

These can be connected to a two or four poles electric motor with a coupling and mounted on a pressed metal bedplate in accordance with UNI EN 23661.
Single-stage, cast iron spiral body made to DIN-EN 733 (formerly DIN 24255), cast iron seal holder cover and motor support, flanges in accordance with DIN 2533 (DIN 2532 for DN 200).
Impeller in cast iron, encased and dynamically balanced with compensation of the axial thrust by means of balancing holes, operating (on request) with interchangeable consumable rings.
Stainless steel pump shaft supported by two large maintenance-free greased ball bearings, housed inside a special chamber of the support.
Standard seal: standardised mechanical seal made to DIN 24960 in carbon/carborundum with O' rings in EPDM. Packing on request with hydraulic lubricating ring.

Speed of rotation 1450 - 2900 1/min.

Operating range
from 1 to 500 m^3/h with a head of up to 100 metres.

Pumped liquid clean, without solid or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral, close to water characteristics.

Liquid temperature range
from -10°C to +140°C.

Maximum ambient temperature +40°C.
(on request up to 50° C)

Maximum working pressure
16 bar - 1600 kPa (for DN 200 max. 10 bar).

Flanging
PN 16 DIN 2533 - PN 10 DIN 2532 for DN 200.

Installation normally horizontal.

Special versions on request pumps for liquids other than water.
Other voltages and/or frequencies.

IE3 ≥ 0,75 kW

ACCESSORIES PAGE 235

KDN OVERSIZE

STANDARDISED CENTRIFUGAL PUMPS

Single-stage centrifugal pump body with axial suction port, radial discharge port and horizontal shaft components.
The KDN pumps have dimensions and nominal performances according to EN 733 (10 bar) but are designed for 16 bar operation wherever the shaft seal type allows it.
The suction and discharge flanges are according to EN 7005 PN 10 or 16. All pumps are dynamically balanced according to ISO 1940 class 6.3 and impellers are hydraulically balanced. Pump and motor are mounted on a common baseplate in accordance with EN 23 661 in all-welded steel. Oversizes have profile base frames. Due to the pump design the complete bearing assembly including impeller and shaft seal can be dismantled without removing the pump body from the pipe system (back-pull-out design).
Asynchronous, closed and cooled with external ventilation, 2, 4 or 6 poles motors.

Electrical protection: in compliance with the EEC 89/336 ELECTROMAGNETIC COMPATIBILITY directive and subsequent amendments, EEC 73/23 LOW VOLTAGE directive and subsequent amendments and CEI 2-3 standards.

Flow Max. 2200 m³/h.
Head Max. 158 m.
Liquid temperature from -25°C to +140°C.
Operating pressure Max. 16 bar.
Motor construction B3.
Protection level IP 55.
Insulation class F.
Supply voltage Three-phase 230-400V 50 Hz up to 2.2 kW included 400V Δ 50 Hz over 2.2 kW.
Special versions on request
Other voltages and/or frequencies.
IE3 motor efficiency class available on request. Please contact our sales network for a price quotation.

Complete electric pump or liquid end only is available - Please contact our sales network for a price quotation

MULTISTAGE CENTRIFUGAL PUMPS WITH VERTICAL AXIS

KVC

KVCX

Vertical multistage centrifugal pump suitable for use in small and medium water supply installations.
Suitable for pressurization units, surge tank supply, rain irrigation and crop-dusting systems, fire-fighting and washing systems, conveyance of condensate and cooling water.
Innovative and robust design.
Technopolymer discharge/suction bodies and in-line suction and discharge ports with threaded metal insert.
Impellers, diffuser bodies and diffusers in technopolymer, fully rust-proof.
Stainless steel AISI 303 pump jacket, adjustment rings and seal disk.
Silicon carbide/Carbon graphite mechanical seal, fitted on the AISI 303 stainless-steel drive shaft extension.
Asynchronous, closed motor cooled by external ventilation.
Rotor mounted on oversized greased sealed-for-life ball bearings to ensure silent running and long life.
Built-in thermal and current overload protection and a capacitor permanently on in the singlephase version.
Protection for the three-phase version is the responsibility of the user.
Built in CEI 2-3/CEI 61/69 (EN 60335-2-41) standards.

Level of protection IP 55.

Insulation class F.

Standard voltage
Single-phase 220-240 V / 50 Hz.
Three-phase 230-400 V / 50 Hz.

Operating range
From 50 to 200 litre/min. with head up to 113 m.

Pumped liquid clean, free from solids or abrasive substances, not viscous, not aggressive, not crystallised and chemically neutral and close to the characteristics of water.

Liquid temperature range
From 0°C to +35°C for domestic use (EN 60335-2-41 safety standards).
From 0°C to +40°C for other uses.

Maximum ambient temperature +40°C.

Maximum working pressure 12 bar (1200 kPa).

Installation fixed, in vertical or horizontal position. Providing that the motor is positioned above the pump.

Special versions on request
Other voltages and/or frequencies.

NKV 1-3-6-10-15-20 S

MULTISTAGE CENTRIFUGAL PUMPS WITH VERTICAL AXIS

The image of the product is purely indicative.

Multi-impeller vertical centrifugal pumps in AISI 304 stainless steel with coupling, designed for pressurization activities, water circulation in heating and conditioning systems in civil and commercial building service, in agriculture and in irrigation systems, in washing systems. All parts in contact with the liquid are in AISI 304 stainless steel (on request in AISI 316 stainless steel, for X versions). Standardized flanges and standard-sized center distances to facilitate pump replacement. Removable cartridge mechanical seal, it is removable without removing the motor, starting from models of 5,5 kW. Mechanical seals are available for aggressive liquids. The pumps are certified for the use with drinking water (WRAS and ACS certifications). Coupled by with a removable rigid coupling to standard two-pole motors IE3 at 50 Hz of 0,75 kW and IE2 of 0,37 kW.

Operating range
1 m³/h to 28 m³/h with head up to 240 m.

Pumped liquid Clean, free of solids and abrasives, not viscous, not aggressive, not crystallised and chemically neutral.

Maximum glycol content 30%.

Supported liquid temperature
-30 °C to +120 °C (EPDM).
-15 °C to +120 °C (Viton/FKM).

Maximum ambient temperature +50° C.

Maximum operating pressure bar / kPa
25 bar / 2500 kPa.

Motor protection class IP 55.

Motor insulation class F.

Impeller/s material
AISI 304 stainless steel for NKV S.
AISI 316 stainless steel for NKV X (only on request).

Single-phase power supply
Contact our sales network.

Three phase power input
220 - 240 / 380 - 415 V at 50 Hz, up to 2.2 kW.
380 - 415 V at 50 Hz, 3 kW.

Possible type of installation Vertical position.

Special versions on request
Available with different types of mechanical seals for aggressive liquids and connections (round, oval, Victaulic, clamp flanges), **with parts in contact with the liquid in AISI 316 stainless steel (X versions)**, other voltages and frequencies.

WRAS APPROVED PRODUCT | ACS ATTESTATION DE CONFORMITÉ SANITAIRE | **IE3 ≥ 0,75 kW**

ACCESSORIES PAGE 235

HIGH EFFICIENCY

The new NKV pumps are supplied with IE3 class motors and comply with the highest energy efficiency standards on the water handling market.

PERFORMANCE FOR EVERY NEED

max ambient temp. 50°C

Q max 30 m³/h

H max 320 m

They offer incredible application flexibility thanks to a complete performance range and the ability to work with ambient temperatures up to 50°C.

ROBUSTNESS AND RELIABILITY

All parts in contact with liquids are made of AISI 304 stainless steel (AISI 316 X versions).
DAB construction quality guarantees solidity and greater resistance to wear and tear.

THE EASIEST REPLACEMENT EVER

In addition, the new range has been designed to simplify replacement thanks to the standard flanges and standard centre distances.

NKV 15 / 10 S 110 E1 IE3

- NKV 15 — NOMINAL FLOW RATE (m³/h)
- 10 — NUMBER OF STAGES/IMPELLERS
- S — MATERIALS*: S=AISI 304 ; X=AISI 316
- 110 — MOTOR POWER P2 KW X 10 (110 = 11KW)
- E1 — **Type of mechanical seal (E1=STANDARD)**
  E1=BQGE=Carbon/Silicon carbide/AISI 316/EPDM
  E2=QQGE=Silicon Carbide/Silicon Carbide/AISI 316/EPDM
  V3=QQGV=Silicon Carbide/Silicon Carbide/AISI 316/FKM-Viton

VERSION WITH SPECIAL MECHANICAL SEALS

(1) **Mech. seal SPECIAL type E2 =** SIC - SIC - EPDM = Silicon Carbide/Silicon Carbide/AISI 316/EPDM
(2) **Mech. seal SPECIAL type V3 =** SIC - SIC - VITON = Silicon Carbide/Silicon Carbide/AISI 316/FKM
(3) **Mech. seal SPECIAL type V4 =** SIC - CAR - VITON = Silicon Carbide/Carbon/AISI 316/FKM
(4) **Mech. seal SPECIAL type E5 =** WC - WC - EPDM = Tungsten Carbide/Tungsten Carbide/AISI 316/EPDM

NKV 32-45-65-95

MULTISTAGE CENTRIFUGAL PUMPS WITH VERTICAL AXIS

The image of the product is purely indicative.

Vertical multi-impeller centrifugal pumps in AISI 304 stainless steel with coupling, designed for pressurization activities, water circulation in heating and conditioning systems in civil and commercial building service, in agriculture and in irrigation systems and in washing systems.
The pump body and the upper flange are in cataphorized cast iron, the impellers, the diffusers and the pump jacket are in AISI 304 stainless steel (on request in AISI 316 stainless steel -version X-).
The pumps are particularly versatile thanks to the spacing of the in-line ports designed to maximize interchangeability.
Mechanical seal with silicon-graphite carbide cartridge that can be disassembled without removing the motor, starting from 5,5 kW models.
Mechanical seals for aggressive liquids are available on request.
Connections: round flanges in cast iron or in AISI 316.
All models in AISI 316 stainless steel - version X - are certified for use with drinking water (WRAS and ACS certifications).
The pump is coupled by means of a removable rigid joint to a high energy efficiency IE3 electric motors.

Operating range
20 m^3/h to 115 m^3/h with head up to 300 m.

Pumped liquid Clean, free of solids and abrasives, not viscous, not aggressive, not crystallised and chemically neutral.

Maximum glycol content 30%.

Supported liquid temperature
-30 °C to +120 °C (EPDM).
-15 °C to +120 °C (Viton/FKM).

Maximum ambient temperature +50° C.

Maximum operating pressure bar / kPa
NKV 65, 95: 25 bar / 2500 kPa.
NKV 32, 45: 32 bar / 3200 kPa.

Motor protection class IP 55.

Motor insulation class F.

Impeller/s material
AISI 304 stainless steel.
AISI 316 for NKV X only on request.

Single-phase power supply
Contact our sales network.

Three phase power input
220 - 240 / 380 - 415 V at 50 Hz, up to 2.2 kW.
380 - 415 V at 50 Hz, 3 kW.

Special versions on request
Available with different types of mechanical seals for aggressive liquids. Connections: round flanges in cast iron or AISI 316 stainless steel. Parts in contact with liquid in AISI 316 stainless steel (X versions). Other voltages and frequencies.

WRAS APPROVED PRODUCT

ATTESTATION DE CONFORMITÉ SANITAIRE ACS

Available on request separately from the pump. Used to level the pump during installation so as to make up for the difference in centreline heights between the pump and the motor.
The kit comprises two shims with dimensions A (width), B (length), H (height) shown in the table.
The shims with a height of over 20 mm are supplied complete with screws, nuts and washers in order to fix them to the pump and motor.

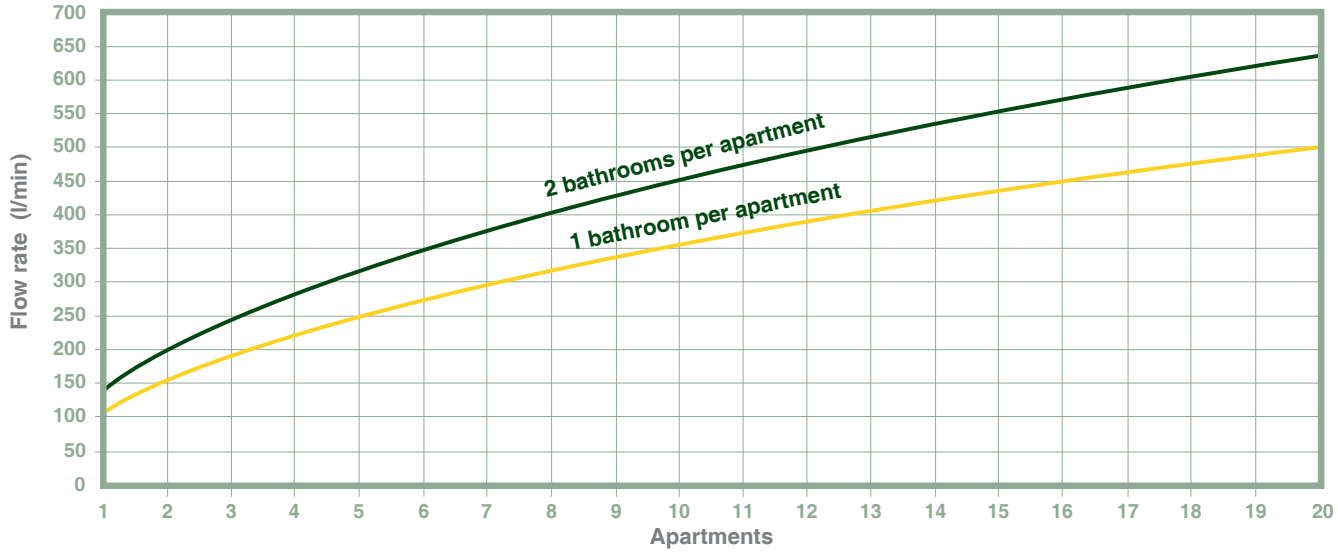
INDEX - SUBMERSIBLE PUMPS

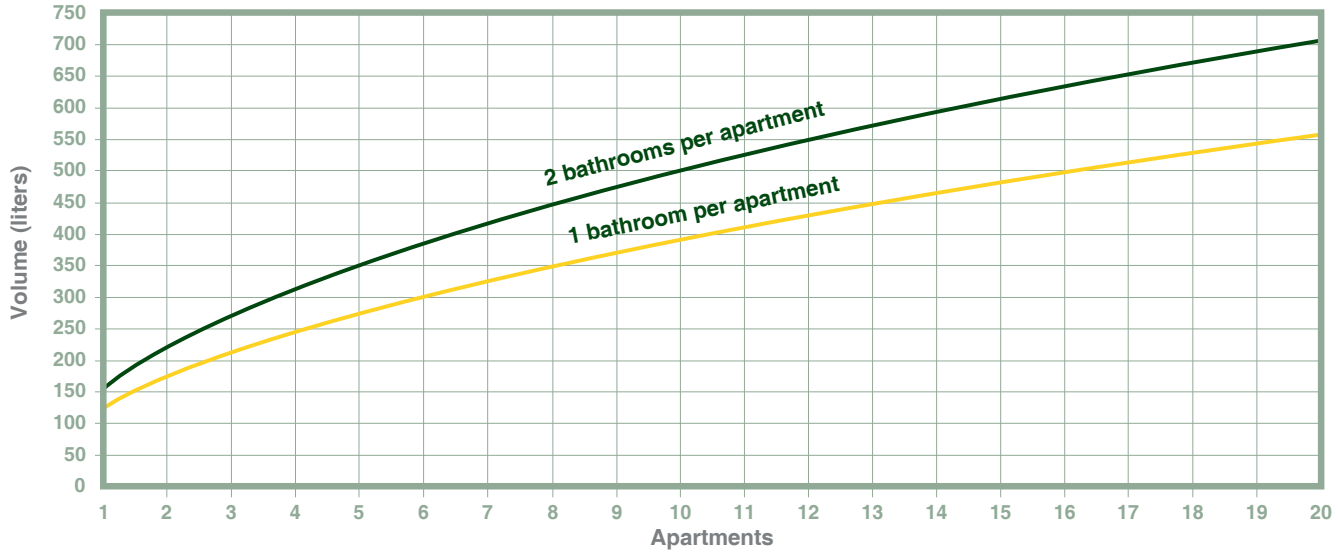
WHICH PUMP DO YOU NEED? FOLLOW THESE STEPS:

CALCULATION OF THE FLOW RATE

Flow rate curves in relation to the number of apartments.



Stated working volume in the storage tank



EXAMPLE OF SIZING

EXAMPLE	CALCULATION	INDICATIVE SELECTION OF PUMP AND TANK
2 APARTMENTS 2 BATHROOMS EACH 	*Indicative pump flow rate* = **200 l/min** *Approximate volume of the tank* = **250 liters**	 **FEKA VS 550 + FEKAFOS 280**
5 APARTMENTS 2 BATHROOMS EACH 	*Indicative pump flow rate* = **325 l/min** *Approximate volume of the tank* = **350 liters**	 **2x FEKA VS 1000 + FEKAFOS 280 DOUBLE*** * pump will make more starts
15 APARTMENTS 2 BATHROOMS EACH 	*Indicative pump flow rate* = **550 l/min** *Approximate volume of the tank* = **625 liters**	 **2x FEKA FXV 25.11 + FEKAFOS 550 DOUBLE*** * pump will make more starts

The selection was based only on the required flow rate and not on the head, as the head depends on the installation (diameter of piping, distance between tank and ground, ...).
The head must be calculated in order to ensure correct sizing

WARNING: the calculations and tables shown on these pages are based on our experience and can never replace the calculations made by a qualified technician: they are therefore only intended to give a general, non-binding indication for planning purposes.

NOVA

SUBMERSIBLE PUMP FOR CLEAR WATER

NOVA M-A

NOVA M-NA

Submersible pump for draining drainage water and rain water in domestic and residential applications It is available in automatic version with built-in float switch, or in manual start version.
Its typical application is to empty garages and floors to prevent flooding.
It can also be used for emptying tanks or cisterns and as a portable pump in emergency situations where water needs to be drained from flooded rooms.
The Nova range has been redesigned on the occasion of the forty years of marketing, making it even more reliable, resistant and ergonomic. It has a new treated cable and a new, more compact and efficient motor. The pump body, the impeller and the suction grid are in technopolymer, the motor shaft is in AISI 431 stainless steel, suitable for lightly salty water.
The impeller is treated to prevent corrosion.
Nova is robust and reliable, also thanks to the triple ring seal in oil bath and the submersible continuous duty asynchronous motor.
The stator is inside a hermetic stainless steel casing and the rotor is mounted on oversized ball bearings.
Built-in thermal protection in all single-phase versions.
Maximum dry run time: 1 minute.
In compliance with European standard EN 60335-2-41, the 10-meter power cable is mandatory for the pump in external use.
Minimum draught depth:

- NOVA 180 M A: 90 mm
- NOVA 180 M NA: 8 mm
- NOVA 200 M NA: 8 mm
- NOVA 300 M A: 100 mm
- NOVA 300 M NA: 13 mm
- NOVA 600 M A: 150 mm
- NOVA 600 M NA: 30 mm

Operating range
From 1 to 16 m^3/h with prevalence up to 10,2 m.
Pumped liquid Clean water, rainwater.
Free passage
NOVA 180 and 200: 5 mm;
NOVA 300 and 600: 10 mm.
Liquid temperature range
From 0°C to +35°C for domestic use;
From 0°C to +50°C for other use.
Outlet 1" 1/4 GAS.
Outlet direction Horizontal or vertical.
Impeller Vortex in technopolymer.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Power cable type H05RN-F.
Maximum immersion depth
2 or 7 m depending on the length of the cable.
Possible type of installation
Fixed or mobile in vertical position.

NOVA UP

SUBMERSIBLE PUMP FOR CLEAR WATER

NOVA UP M-A

NOVA UP M-NA

Vertical delivery draining pump, available in automatic or manual version, with removable filter for suction of particles up to 2/3 mm in domestic and residential applications; these features make it a robust pump and increase its versatility of installation.
Technopolymer pump body, impeller, cover and suction grid.
Stainless steel motor, rotor shaft, and bolts and screws.
Threefold seal with interposed rings with oil pre-chamber.
Submersible continuous duty asynchronous motor.
Stator enclosed in airtight stainless steel casing.
The rotor is mounted on oversized permanently lubricated ball bearings.
Built-in thermal-amperometric protection and permanently connected capacitor.
Minimum draught depth:

- NOVA UP 300 M-A 120 mm
- NOVA UP 300 M-NA 60 mm
- NOVA UP 600 M-A 165 mm
- NOVA UP 600 M-NA 70 mm

Operating range
From 1 to 15 m³/h with prevalence up to 10 m.
Pumped liquid Clear water, rainwater.
Free passage 10 mm.
Liquid temperature range
From 0°C to +35°C for domestic use.
Outlet 1" 1/4 GAS.
Outlet direction Vertical.
Impeller Vortex in techopolymer.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Maximum immersion depth 7 m.
Power cable type H05RN-F.
Possible type of installation
Fixed or mobile in vertical position.

NOVA UP MAE

SUBMERSIBLE PUMPS WITH ELECTRONIC FLOAT FOR CLEAR WATER

NOVA UP MAE

NOVA UP MAE

Electronic draining pump with adjustable vertical delivery with removable filter for suction of particles up to 2/3 mm.
It's available in automatic or manual version.
The probe adjustment slider allows to change the pump on-off level, a feature that increases installation versatility.
The vertical delivery and the electronic float switch make it a suitable pump for use in small sumps.
Technopolymer pump body, impeller, cover and suction grid. Stainless steel motor, rotor shaft, and bolts and screws.
Threefold seal with interposed rings with oil pre-chamber.
Submersible continuous duty asynchronous motor.
Stator enclosed in airtight stainless steel casing. The rotor is mounted on oversized permanently lubricated ball bearings. Built-in thermal-amperometric protection and permanently connected capacitor.
Minimum draught depth:

- NOVA UP 300 M-AE: 60 mm
- NOVA UP 600 M-AE: 70 mm

Operating range
From 1 to 15 m³/h with prevalence up to 10 m.
Pumped liquid Clear water, rainwater.
Free passage 10 mm.
Liquid temperature range
From 0°C to +35°C for domestic use.
Outlet 1" 1/4 GAS.
Outlet direction Vertical.
Impeller Vortex in techopolymer.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Maximum immersion depth 7 m.
Power cable type H05RN-F.
Possible type of installation
Fixed or mobile in vertical position.

VERTY NOVA

SUBMERSIBLE PUMPS WITH INTEGRATED FLOAT FOR CLEAR WATER

Submersible pumps suitable for pumping clean water, specially designed for small sumps (minimum 20 cm x 20 cm).
Pump with built-in float for use in domestic and residential applications.
Made of corrosion and oxidation resistant materials.
Low start level (10-15 mm in manual mode).
Operation mode selector: manual or automatic.
Easy access to the float for cleaning, thanks to the removable cover.
Motor with thermal overheating protection.
Very efficient motor cooling, allowing the pump to also be used only partially submerged.
Fitted with power input cable with plug, check valve and 4-level connector.

Operating range
From 1 to 10 m^3/h with prevalence up to 9 m.
Pumped liquid Clear water, rainwater.
Free passage 5 mm.
Liquid temperature range
From 0°C to +35°C for domestic use.
Outlet 1" 1/4 GAS.
Outlet direction Vertical.
Impeller Vortex in technopolymer.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Power cable type H05RN-F.
Maximum immersion depth 7 m.
Possible type of installation
Fixed or mobile in vertical position.

FEKA

SUBMERSIBLE PUMPS FOR CLEAR WATER, GRAY WATER AND RAINWATER

FEKA M-A

FEKA M-NA

Submersible pumps suitable for draining and lifting effluent wastewater and rainwater in residential building service.
The pumps are suitable for fixed or mobile installations and is available in the automatic version with built-in float switch or in the manual version without float.
They can be used for draining flooded basements, cellars and garages, and to prevent flooding when installed in rainwater wells.
They can also be used as a portable pumps in emergencies, to drain water out of flooded rooms where there is mud, leaves or detritus.
The Feka pumps have been redesigned on the occasion of the forty years of marketing, making them even more reliable, resistant and ergonomic.
The pump body, the impeller and the suction grid are in technopolymer, the motor shaft is in AISI 431 stainless steel, suitable for lightly salty water.
Robust and reliable, they have a triple ring seal in oil bath and an asynchronous submersible motor with continuous service.
Stator inserted in a hermetic stainless steel casing and rotor mounted on oversized ball bearings. Cable and impeller nut treated to prevent corrosion. Built-in thermal protection in all single-phase versions. New, more efficient and compact motor.
Maximum dry run time: 1 minute.
In compliance with European standard EN 60335-2-41, the 10-meter power cable is mandatory for the pump in external use.
Minimum draught depth:

- FEKA 300 M A: 150 mm
- FEKA 300 M NA: 30 mm
- FEKA 600 M A: 175 mm
- FEKA 600 M NA: 35 mm

Operating range
From 1 to 16 m^3/h with prevalence up to 7,5 m.
Pumped liquid
Clear and rainwater, gray waters.
Free passage 25 mm.
Liquid temperature range
From 0°C to +35°C for domestic use.
Outlet 1" 1/4 GAS.
Outlet direction Horizontal or vertical.
Impeller Vortex in technopolymer.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Power cable type H05RN-F.
Maximum immersion depth 7 m.
Possible type of installation
Fixed or mobile in vertical position.

FEKA BVP

SUBMERSIBLE PUMPS FOR GRAY WATER AND RAINWATER

Powerful submersible pumps for draining and emptying, for use in domestic and residential applications.
The use of corrosion and oxidation resistant materials makes them suitable for pumping dirty water.
Motor with thermal overheating protection.
Wear-resistant motor shaft and impeller.
Very efficient motor cooling, allowing the pump to also be used only partially submerged.
Automatic version with float switch for automatic pump start and stop, or manual version.
Fitted with power input cable with plug, 3-level connector.
Check valve to be purchased separately.

Operating range
From 1 to 18 m³/h with prevalence up to 12 m.
Pumped liquid
Clear water, rainwater, gray water.
Free passage 38 mm.
Liquid temperature range
From +0°C to +35°C for domestic use.
Outlet 1" 1/2 GAS.
Outlet direction Horizontal or vertical.
Impeller Open in technopolymer.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Power cable type H05RN-F.
Maximum immersion depth 7 m.
Possible type of installation
Fixed or mobile in vertical position.

DRENAG 1000 - 1200

SUBMERSIBLE PUMPS FOR CLEAR, RAINWATER AND SANDY WATER FROM CONSTRUCTION SITES

Submersible pumps suitable for draining rainwater, ground water, sandy construction site water and generally for all types of non aggressive waste waters. The pump body, impeller, motor flange, filter, disc, motor casing, casing with handle and cable compartment cover are made of AISI 304 stainless steel. They have an insulating rubber-coated handle and an AISI 316 stainless steel motor shaft. Drenag pumps have a double mechanical seal with interposed oil chamber (non-toxic oil) in carbon/alumina on the motor side, and silicon silicon/carbon on the pump side. The motor is dry-running, asynchronous, sealed and cooled by the pumped liquid. The rotor is mounted on sealed permanently lubricated ball bearings, oversized and selected for quiet operation and durability. They have thermo-overload protection as standard and a permanently connected capacitor in the single-phase version. The single-phase version can be supplied with float for automatic operation. Power input cable with Schuko plug for the single-phase version. The maximum ambient temperature for using Drenag is +40°C with the motor above water.

Operating range
From 3 to 24 m³/h with prevalence up to 14,2 m.
Pumped liquid
Clear water, rainwater, groundwater, sandy construction site waters, not aggressive waters.
Free passage 10 mm.
Liquid temperature range
From 0°C to +35°C for domestic use;
From 0°C to +50°C for other use.
Outlet 1" 1/2 GAS.
Outlet direction Vertical.
Impeller Vortex in technopolymer.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Power cable type H05RN-F.
Maximum immersion depth 7 m.
Possible type of installation
Fixed or mobile in vertical or horizontal position.

FEKA VS

SUBMERSIBLE PUMPS FOR WASTE WATER AND RAINWATER

FEKA VS

Submersible centrifugal pumps made of stainless steel with vortex impeller made of microcast steel.
They are suitable for lifting sewage water and in general waste water containing solids with a maximum diameter of 50 mm.
Insulating rubber covered handle. AISI 316 stainless steel motor shaft.
They have double mechanical seal with interposed oil chamber (non-toxic oil) in carbon-alumina on the motor side, and silicon carbide/silicon carbide on the pump side.
The seal cover, motor casing, pump body, cover and handle are made of stainless steel.
They are fitted with dry, asynchronous and waterproof motor, cooled by the pumped liquid. Rotor running on permanently lubricated ball bearings, oversized and selected to ensure low noise and durability.
Thermal-overload protection provided as standard for the single-phase version, while for the three-phase version it is the responsibility of the user.
Permanently connected capacitor in the single-phase version.
Construction according to CEI 2-3 / CEI 61-69 (EN 60335-2-41).
The maximum ambient temperature for using Feka VS is +40°C with the motor above water.
Continuous service with liquid temperature +35°C and completely submerged pump.

Operating range
From 3 to 32 m^3/h with prevalence up to 14 m.
Pumped liquid
Non-aggressive sewage water, rainwater.
Free passage 50 mm.
Liquid temperature range
From 0°C to +35°C for domestic use;
From 0°C to +50°C for other use.
Outlet 2" GAS.
Outlet direction Horizontal.
Impeller Vortex in stainless steel.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Power cable type H05RN-F.
Maximum immersion depth 7 m.
Possible type of installation
Fixed or mobile in vertical position.

FEKA VS GRINDER

SUBMERSIBLE PUMPS WITH SHREDDER FOR SEWAGE

NEW

FEKA VS GRINDER MA

FEKA VS GRINDER M-NA

Submersible pump with grinder designed for the lifting and transfer of waste water from drains in domestic applications.
The pump is certified to European Union standard EN 12050-1, which applies to lifting systems for waste water containing faecal matter in buildings and building sites.
Thanks to the grinder, the pump is suitable for installations with small diameter pipes or that require high pressures.
The grinding system is made of AISI 630 stainless steel.
Insulating rubber covered handle.
AISI 316 stainless steel motor shaft. It has a double mechanical seal with interposed oil chamber (non-toxic oil) in carbon-alumina on the motor side, and silicon carbide/silicon carbide on the pump side.
The seal cover, motor casing, cover and handle are made of stainless steel.
The pump body and the base are made of cast iron.
It's fitted with dry, asynchronous and waterproof motor, cooled by the pumped liquid.
Rotor running on permanently lubricated ball bearings, oversized and selected to ensure low noise and durability.
Thermal-overload protection provided as standard for the single-phase version, while the three-phase version has thermal protection that can be connected to a control panel.
Permanently connected capacitor in the single-phase version.
Construction according to CEI 2-3 / CEI 61-69 (EN 60335-2-41).

Operating range
From 0 to 14,4 m^3/h with prevalence up to 25 m.
Pumped liquid
Sewage water, gray water.
Liquid temperature range
From 0°C to +40°C.
Outlet
1" 1/2 GAS;
DN 32 and DN 40.
Outlet direction
Horizontal and vertical with curve kit accessory.
Impeller Vortex in cast iron, there is a shredder.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Power cable type H07RN8-F.
Maximum immersion depth 7 m.
Possible type of installation
Fixed or mobile in vertical or horizontal position.

DRENAG FX

SUBMERSIBLE PUMPS FOR DRAINAGE OF SANDY WATER AND WATER FROM CONSTRUCTION SITE

DRENAG FX

Submersible pump for draining drainage water from civil and commercial building drains and ground water or rainwater. It's suitable for applications requiring high head.
The pump is certified according to EN 12050-2 waste water regulation. Suitable for fixed installations with a coupling device or mobile if placed directly on the bottom of the tank.
The reduced dimensions and the threaded and flanged delivery port make it ideal for replacements. Open impeller and anti-wear rubber disc for use even in the presence of abrasive particles.
Double mechanical seal in silicon carbide completely protected in an oil chamber and not in contact with the pumped liquid.
Motor shaft in AISI 431 stainless steel for P2 < 1,2 kW and AISI 304 for P2 > 1,5 kW, resin-fastened cable gland.
The reduced dimensions and the delivery ports both flanged and threaded make it ideal for replacements.
Designed for fast maintenance thanks to a construction solution that provides easy access to the main components of the pump.
Single-phase versions with integrated capacitor, available with float for automatic operation (MA) with powers up to 1,5 kW.
In the three-phase versions, protection is the responsibility of the user. Maximum dry run time: 10 min.
ATEX version available for use in potentially explosive environments (ATEX certifications: II2G Ex db IIB T4 GB).
Special options available on request: cable lengths (20 m or 50 m), frequency (60Hz), different voltages.

Operating range
Up to 30,9 m³/h with prevalence up to 32 m.
Pumped liquid
Clear and rainwater, gray waters and sandy construction site waters.
Free passage 10 mm.
Liquid temperature range
+50°C (+60°C for short time);
+40°C for ATEX version.
Outlet
1" 1/2 GAS;
DN 32 and DN 40.
Outlet direction
Horizontal or vertical with turn accessory kit 1" 1/2.
Impeller Open in cast iron.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Power cable type H07RN8-F.
Maximum immersion depth 7 m.
Possible type of installation
Mobile if put on the ground, fixed on the coupling device.

GRINDER FX

SUBMERSIBLE PUMPS WITH SHREDDER FOR SEWAGE

GRINDER FX

Submersible pump with grinder designed for the lifting and transfer of waste water from drains in civil and commercial applications.
It's certified to European Union standard EN 12050-1, which applies to lifting systems for waste water containing faecal matter in buildings and building sites. Pump suitable for fixed installations with coupling device or mobile if placed directly on the bottom of the tank.
Thanks to the grinder, the pump is suitable for installations with small diameter pipes or that require high pressures. The grinding system is made of AISI 630 stainless steel.
Double mechanical seal in silicon carbide completely protected in an oil chamber and not in contact with the pumped liquid. AISI 304 stainless steel motor shaft.
Resin-coated quick-connect cable gland. Ideal pump for replacements, due to its small footprint and both flanged and threaded delivery ports.
Designed to allow quick maintenance, thanks to a construction solution that provides easy access to the main components of the pump.
Single-phase versions with integrated capacitor, available with float for automatic operation (MA) with powers up to 1,5 kW. In the three-phase versions, protection is the responsibility of the user. Maximum dry run time: 10 min. ATEX version available for use in potentially explosive environments (ATEX certifications: II2G Ex db IIB T4 GB).
Special options available on request: cable lengths (20 m or 50 m), frequency (60Hz), different voltages.

Operating range
Up to 19,8 m³/h with prevalence up to 33 m.
Pumped liquid
Waters loaded with filamentous bodies, paper or textile material.
Liquid temperature range
+50°C (+60°C for short time);
+40°C for ATEX version.
Outlet
1" 1/2 GAS;
DN 32 e DN 40.
Outlet direction
Horizontal or vertical with turn accessory kit 1" 1/2.
Impeller Vortex in cast iron, there is a shredder.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Power cable type H07RN8-F.
Maximum immersion depth 7 m.
Possible type of installation
Mobile if put on the ground, fixed on the coupling device.

FEKA FXV

SUBMERSIBLE PUMPS FOR SEWAGE WATER

FEKA FXV

Submersible pump for draining waste water in civil and commercial applications. It's certified to European Union standard EN 12050-1, which applies to lifting systems for waste water containing faecal matter in buildings and building sites.
Pump suitable for fixed installations with coupling device or mobile if placed directly on the bottom of the tank.
Thanks to its high-efficiency super vortex impeller with integral free passage, Feka FXV is suitable for use with fluids containing long-fibre coarse solids, gases and slurries. AISI 304 motor shaft and resin-coated cable gland with quick coupling. Feka FXV can deliver high flow rates.
Double mechanical seal in silicon carbide completely protected in an oil chamber and not in contact with the pumped liquid.
Resin-coated quick-connect cable gland. Ideal pump for replacements, due to its small footprint and both flanged and threaded delivery ports.
Designed to allow quick maintenance, thanks to a construction solution that provides easy access to the main components of the pump.
Single-phase versions with integrated capacitor, available with float for automatic operation (MA) with powers up to 1,5 kW.
In the three-phase versions, protection is the responsibility of the user. Maximum dry run time: 10 min. ATEX version available for use in potentially explosive environments (ATEX certifications: II2G Ex db IIB T4 GB). Special options available on request: cable lengths (20 m or 50 m), frequency (60Hz), different voltages.

Operating range
From 0 to 59,7 m^3/h with prevalence up to 18,5 m.
Pumped liquid
Waters loaded with filamentous bodies, paper or textile material in the presence of domestic or civil waste, gray water, sewage water.
Free passage
FXV 20 : 50 mm, FXV 25 : 65 mm.
Liquid temperature range
+50°C (+60°C for short time);
+40°C for ATEX version.
Outlet
FXV20 2" GAS and DN 50;
FXV25 DN 65.
Outlet direction
Horizontal or vertical with 2" curve accessory kit for FXV20 and 2" 1/2 curve accessory kit for FXV25.
Impeller Vortex in cast iron.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Power cable type H07RN8-F.
Maximum immersion depth 7 m.
Possible type of installation
Mobile if put on the ground, fixed on the coupling device.

FEKA FXC

SUBMERSIBLE PUMPS FOR WASTE WATER

FEKA FXC

Submersible pump for lifting and redirecting waste water in civil and commercial applications.
Certification according to the EN 12050-2 waste water standard. FXC is suitable for effluents and waste water without long fibres, rainwater and ground water.
The pump is also suitable for draining areas subject to flooding, when high flow rates are required. Suitable for fixed installations with a coupling device, or mobile installations if placed directly on the bottom of the tank.
Channel impeller with a free passage of 50 millimetres and anti-seizing system. Double mechanical seal in silicon carbide completely protected in an oil chamber not in contact with the pumped liquid. Motor shaft in AISI 304 stainless steel, resin-coated cable gland, quick-coupling power input cable.
The reduced dimensions and the delivery ports both flanged and threaded make it ideal for replacements.
Designed for fast maintenance thanks to a construction solution that provides easy access to the main components of the pump. Single-phase versions with integrated capacitor, available with float for automatic operation (MA) with powers up to 1,5 kW. In the three-phase versions, protection is the responsibility of the user.
Maximum dry run time: 10 min. ATEX version available for use in potentially explosive environments. (ATEX certifications: II2G Ex db IIB T4 GB). Special options available on request: cable lengths (20 m or 50 m), frequency (60Hz), different voltages.

Operating range
From 0 to 71,4 m³/h with prevalence up to 19,3 m.
Pumped liquid
Waste water, gray water, rainwater and sandy construction site water.
Free passage 50 mm.
Liquid temperature range
+50°C (+60°C for short time);
+40°C for ATEX version.
Outlet
FXC20: 2" GAS and DN 50
FXC25: DN 65
Outlet direction
Horizontal or vertical with 2" curve accessory kit for FXC20 and 2" 1/2 curve accessory kit for FXC25
Impeller Channel in cast iron.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Power cable type H07RN8-F.
Maximum immersion depth 7 m.
Possible type of installation
Mobile if put on the ground, fixed on the coupling device.

REPLACEMENT TABLE

NOVA - FEKA - DRENAG FX - GRINDER FX - FEKA FXV - FEKA FXC

The closest alternative to hydraulic performance is suggested in the tables of the individual pump models.
The suggested models are chosen by averaging the performance over the entire operating range of the individual pumps, **for the precise work points and for the best solution, we suggest you to referring to the technical catalogue or to our DNA (DAB Navigator Application).**
In case of replacement, **the absorption and the calibration of the electrical panel should be evaluated.**
We also recommend checking **the overall dimensions** of the pump with the existing system.

SUBMERSIBLE PUMPS FOR SEWAGE

Submersible pumps suitable for pumping waste water and sewage from private and commercial dwellings and municipal sewer networks, in accordance with European standard EN 12050-1.
With full free passage cast iron vortex impeller with new anti-clogging profile, suitable for use with fluids containing long fibre solids, gases and slurries.
Double cartridge mechanical seal as standard in SiC/SiC silicon carbide on the hydraulics side and SiC/C silicon carbide on the motor side, independent of the rotation direction.
Discharge flange available in DN65, DN80, DN100 versions according to EN 1092-1. High efficiency three-phase asynchronous motor with squirrel cage rotor, efficiency class IE3.
Suitable for use with liquids with pH between 6.5 and 12.
Maximum number of starts per hour: 20.
S1 motor for fully submerged continuous operation or S3 for discontinuous operation with minimum immersion levels.
Water infiltration sensor in oil chamber, capable of indicating water infiltrations through the mechanical seal (Optional).
Overtemperature sensors in the motor windings with intervention threshold at 150°C.
Long-life lubricated bearings for a calculated minimum useful life of 50,000 hours.
Stainless steel motor shaft, designed with high fatigue strength.
Nominal power from 1.1 kW to 11 kW. ATEX version available for use in potentially explosive environments.
Maximum installation depth: 20 metres (with cable of appropriate length). For use at liquid temperatures above +40°C, please contact the sales office.

Operating range
From 4,3 to 280 m^3/h with prevalence up to 41 m.
Pumped liquid
Waste water, gray water, dirty water, pretreated waste water, clarified waste water.
Free passage 65 mm, 80 mm o 100 mm depending on the model.
Liquid temperature range
From 0° to +40°C.
Outlet
DN 65, DN 80, DN 100 depending on the model.
Outlet direction
Horizontal and for DN65 also vertical with 2" 1/2 curve kit accessory.
Impeller Vortex in cast iron.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Power cable type 10m 07RN8-F.
Maximum immersion depth 7 m.
Possible type of installation
Fixed by means of a coupling device or free in vertical position by means of a base.

PANELS PAGE 286
ACCESSORIES PAGE 275

ENERGY EFFICIENCY IE3

NEW IE3 MOTORS

The new **IE3 premium efficiency motors** drastically reduce energy operation costs.
Given the low running temperatures, it is guaranteed their operation up to 40°C, for higher temperatures please contact the sales department.
Thermal protection is standard and they have an insulation class equal to F.

PATENTED DAB PATENTED

SINGLE-UNIT CARTRIDGE SEAL

A single-unit cartridge seal is a great advantage for maintenance of the pump as allows the removal and insertion of the seals in less time, having a total guarantee to carry out properly.
It's an **exclusive patent DAB:** a double mechanical seal Sic-Sic with opposite faces, independent from the rotation direction of shaft, with Viton elastomers and leap seal.

EN 12050-1

NEW NO-CLOGGING VORTEX IMPELLER

The guarantee of operation comes before efficiency.
A new design of the Vortex impellers and the total solid handling are respectively the two guarantees to have no-clogging issues.

Compliant with EN 12050-1

All models are available with 230V power input voltage and Y/D or DOL start-up.
ATEX pumps are also available in IECEX version: code and price on request.

FKC

SUBMERSIBLE PUMPS FOR SEWAGE

Submersible pumps suitable for pumping dirty water, pre-treated sewage, activated sludge and clarified waste water from both private and commercial dwellings, in accordance with European standard EN 12050-1.
It has an open, two-blade, cast-iron channel impeller, making it suitable for use with dirty liquids containing solids free of long fibres with a tendency to lint. Ideal where a high flow rate is required.
Double cartridge mechanical seal as standard in SiC/SiC silicon carbide on the hydraulics side and SiC/C silicon carbide on the motor side, independent of the rotation direction.
Discharge flange available in DN65, DN80, DN100 versions according to EN 1092-1. High efficiency three-phase asynchronous motor with squirrel cage rotor, efficiency class IE3.
Suitable for use with liquids with pH between 6.5 and 12. Maximum number of starts per hour: 20.
S1 motor for fully submerged continuous operation or S3 for discontinuous operation with minimum immersion levels. Water infiltration sensor in oil chamber, capable of indicating water infiltrations through the mechanical seal (Optional).
Overtemperature sensors in the motor windings with intervention threshold at 150°C.
Long-life lubricated bearings for a calculated minimum useful life of 50,000 hours.
Stainless steel motor shaft, designed with high fatigue strength.
Nominal power from 1.1 kW to 11 kW.
ATEX version available for use in potentially explosive environments.
Maximum installation depth: 20 metres (with cable of appropriate length).
For use at liquid temperatures above +40°C, please contact the sales office.

Operating range
From 4,3 to 280 m^3/h with prevalence up to 41 m.
Pumped liquid
Waste water, gray water, dirty water, pretreated waste water, clarified waste water.
Free passage 50 mm, 80 mm o 100 mm depending on the model.
Liquid temperature range
From 0° to +40°C.
Outlet DN 65, DN 80, DN 100, DN 150 depending on the model.
Outlet direction
Horizontal and for DN65 also vertical with 2" 1/2 curve kit accessory.
Impeller Channel in cast iron.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Power cable type 10m 07RN8-F.
Maximum immersion depth 7 m.
Possible type of installation
Fixed by means of a coupling device or free in vertical position by means of a base.

EFFICIENZA ENERGETICA IE3

NEW IE3 MOTORS

The new **IE3 premium efficiency motors** drastically reduce energy operation costs.
Given the low running temperatures, it is guaranteed their operation up to 40°C, for higher temperatures please contact the sales department.
Thermal protection is standard and they have an insulation class equal to F.

PATENTED DAB PATENTED

SINGLE-UNIT CARTRIDGE SEAL

A single-unit cartridge seal is a great advantage for maintenance of the pump as allows the removal and insertion of the seals in less time, having a total guarantee to carry out properly.
It's an **exclusive patent DAB:** a double mechanical seal Sic-Sic with opposite faces, independent from the rotation direction of shaft, with Viton elastomers and leap seal.

EN 12050-1

NEW SINGLE CHANNEL HYDRAULICS

The new high efficiency single-channel hydraulic has been designed especially for continuous wastewater operations with high flow demand and low fibre content.

Compliant with EN 12050-1

Power input: 3x400V DOL direct start-up, 3x400V Y/D star-delta start-up.
All models are available with 230V power input voltage and Y/D or DOL start-up.
ATEX pumps are also available in IECEX version: code and price on request.

FEKA 6200/ 6300/ 8100/ 8200/ 8300

SUBMERSIBLE PUMPS FOR SEWAGE WATER

FEKA 6000

SINGLE CHANNEL IMPELLER

THREE VANE IMPELLER

FEKA 8000

Cast-iron submersible pumps with single-channel (6000 version) and three-channel (8000 version) ring impeller.
They are suitable for sewage water, grey waste water, and other general waste water.
They are generally used in systems for lifting or transferring water from cesspools containing solids up to 108 mm in size.
The cover, motor body, hydraulic body and impeller are made of cast iron.
Double mechanical seal: carbon/steel in oil chamber on the motor side, silicon/silicon on the pump side.
Dry motor, asynchronous type, watertight.
The rotor is mounted on ball bearings that guarantee silent operation and durability.
Available in the standard version: water sensor for the oil chamber and thermal protection housed in the motor windings.
Maximum immersion depth 20 metres (with cable of appropriate length).

Operating range
From 36 to 780 m^3/h with prevalence up to 28 m.
Pumped liquid
Sewage water, drainage water, non aggressive waters.
Free passage
Feka 6000 series: 95 mm or 108 mm depending on the model; Feka 8000 series: 80 mm.
Liquid temperature range
From 0° to +40°C.
Outlet
Feka 6000 series: DN 150
Feka 8000 series: DN 200
Outlet direction Horizontal.
Impeller Channel in cast iron.
Motor protection degree IP 68.
Motor insulation thermal classification F.
Power cable type H07RN-F.
Maximum immersion depth 7 m.
Possible type of installation
Fixed if used with a coupling device or free in vertical position if used on the base.

GENIX

AUTOMATIC COLLECTOR AND LIFTING UNIT

GENIX

GENIX WL

Indispensable in cases where sewage water from toilet, showers, wash basins or bidets cannot be expelled by gravity.
This is a lifting station that collects and pumps waste water through a small size pipe to the closest public sewer system.
The GENIX models are characterized by the connection for the drainage of sewage water from the WC in the front.
The GENIX WL version differs from the lateral WC attachment, specifically designed for applications with wall-hung sanitary or when there is not enough space behind the toilet. With the 110 model, in addition to a toilet, a further user can also be connected, like the sink. With the 130 model, in addition to the WC it is also possible to connect three additional utilities, such as sink, shower, bidet or bathtub.
A characteristic of the proposed models is their silent operation, further improved in the Comfort versions. The pump is powerful and reliable; the grinder is made of nickel-plated stainless steel.
These components make it durable and virtually maintenance-free.
In the event of a blockage, the extraordinary maintenance required is a clean and hassle-free operation: it is in fact possible, without removing the product, to drain the excess water into a basin and remove the motor assembly. The installation kit is complete with adaptable connections to different pipe diameters with quick connection and integrated non-return valves. Available as accessories an acoustic anti-flooding alarm and an extension adapter tube, to adapt the GENIX to pre-existing installations.

Operating range
Liquid temperature from 0°C to +50°C.
Waste water as regulated by EN 12050-3.
Motor protection degree IP 44.
Motor insulation thermal classification B.
Capacity
Approved for flushing from 6 to 9 liters according to EN12050-3.
Drive Automatic.
Homologation VDE-GS, LGA, VDE-EMC.

GENIX VT

AUTOMATIC COLLECTOR AND LIFTING UNIT

Indispensable in cases where waste water from sinks, showers, washing machines and dishwashers cannot be expelled by gravity. This is a lifting station that collects and pumps waste water through a small size pipe to the closest public sewer system.
In the 110 model it is possible to connect a unit with a high drain such as a sink. With the 130 model, it is possible to connect up to three units even with a low drain such as shower, bidet or bathtub.
The models on offer are characterised by quiet operation and reliability, guaranteed by a powerful motor that allows operation even at high temperatures up to 90°C. In the event of blockage, the extraordinary maintenance required is a clean and hassle-free operation: it is in fact possible, without removing the product, to drain the excess water into a basin and remove the motor assembly.
The installation kit is complete with adaptable connections to different pipe diameters with quick connection and integrated non-return valves. Available as accessories an acoustic anti-flooding alarm, and an extension adapter tube, to adapt the GENIX VT to pre-existing installations.

Operating range
Liquid temperature from 0°C to +75 °C up to 90°C for 30 minutes.
Motor protection degree IP 44.
Drive Automatic.
Homologation LGA.

NOVABOX

AUTOMATIC COLLECTOR AND LIFTING UNIT

Units for the collection and lifting of domestic waste water from bath, sink, shower, and washing machine in basements, or below the sewer network in general.
They consist of a NOVA 300 pump with 5 metre power input cable and plug fitted on a technopolymer plate, 30 litre technopolymer tank, check valve on the delivery.
The lifting unit is delivered ready for use.

Operating range
From 1 to 7,2 m³/h with head up to 6.9 m.

Liquid temperature range
From 0°C to +50°C, up to 90°C for 3 minutes.

Pumped liquid
Clear water, waster water from domestic use.

Motor protection degree IP 68.

Motor insulation class F.

FEKABOX - FEKAFOS RANGE

example

SELLING POINT
Certification according to European law 12050-1 to guarantee the watertight seal from odours and leaks
Light, but resistant to chemical and mechanical stress
Designed for easy installation and maintenance of the pump thanks to the lifting device
Tightening of the lid without the use of screws
The tank material is environmentally friendly, 100% recyclable
Designed with floats and a supplementary floating overflow alarm
The only one on the market that offers a complete professional solution with double pump also for domestic installations where space and cost are contained (FEKAFOS DOUBLE)

FEKABOX 110 - 200

AUTOMATIC COLLECTING AND PUMPING STATION FOR ONE PUMP

Automatic collection and lifting stations.
Ideal for the collection and pumping into the sewer network of grey water and domestic drain water of various nature, rainwater and infiltration drains, drains from garages or basements.
The pump installed inside the tank allows the water to be pumped into the sewer when the same cannot be reached by gravity.
Polyethylene tank with plastic cover with seal, ready for the use of only one single-phase automatic pump with float, which must be ordered separately, without the need for a control panel.
The tank offers numerous possibilities for connecting inlet, outlet and ventilation pipes, allowing correct use even in limited spaces.

Fekabox is available in three versions:
- Fekabox 110, with effective capacity of 110 litres, not compatible with the alarm system, inside which it is possible to install the following pumps: FEKA 600 MA, FEKA VS 550-750 MA.
- Fekabox 200, with effective capacity of 200 litres, inside which it is possible to install the following pumps: FEKA VS 550-750-1000-1200 M-A.
- Fekabox 200 FX, with effective capacity of 200 litres, inside which it is possible to install the following pumps: GRINDER FX MA, DRENAG FX MA, FEKA FXV 20 MA, FEKA FXC 20 MA.

COMPONENTS INCLUDED WITH FEKABOX 110:
- Complete pump installation kit.
- Cable gland for single pump.
- 2" F x 1 x 1/4 M fitting for FEKA 600.

COMPONENTS INCLUDED WITH FEKABOX 200:
- 2" PP lifting device and anti-rotation bracket for FEKA VS.
- Cable gland for single pump.
- FEKA VS float cable stop kit.

COMPONENTS INCLUDED WITH FEKABOX 200 FX:
- DA-050 cast iron lifting device.
- Cable gland for single pump.

Operating range
From 1 to 24 m^3/h with prevalence to 9 m for Fekabox 110, 15 m for Fekabox 200.

Pumped liquid
Fekabox 110: black waste water, clear water, rainwater, gray water. Liquids compatible with the EN12050-2 standard.
Fekabox 200, Fekabox 200 FX: soiled waters with filamentous bodies, groundwater, rainwater, clear water, waste water and river or lake water.

Liquid temperature range
From 0°C to +50°C for Fekabox 110;
From 0°C to +45°C for Fekabox 200.

Possible type of installation
Inside or outside the building. Based on the floor, underground or housed.

Tank capacity
Fekabox 110: 110 litres
Fekabox 200: 200 litres

Tank material LLDPE.

FEKAFOS 280

AUTOMATIC COLLECTING AND PUMPING STATION FOR ONE PUMP

Collection tanks for domestic waste water from various types of drains or rainwater and infiltration drains, for installations located below the sewer network, such as garages or basements, when the same cannot be reached by gravity.
The pump installed inside the tank allows the water to be pumped into the sewer network. The tank offers numerous possibilities for connecting inlet, outlet and ventilation pipes, allowing correct use even in limited spaces.
A grinding pump for breaking down foreign bodies can also be installed inside, capable of grinding foreign bodies contained in the liquid and eject them to long distances.
The FEKABOX range is ready for the use of one single-phase non-automatic pump, or a three-phase pump without float, which must be ordered separately, in conjunction with the control panel.

COMPONENTS INCLUDED:
- DSD2" lifting device and rotation prevention bracket for FEKA VS.
- 4 cable glands for single pump and floats.
- FEKA VS float cable stop kit.
- 2 floats and alarm float support.

Operating range
From 1 a 48 m³/h with prevalence up to 23 m.
Pumped liquid
Waste water with filamentous bodies, dirty water, ground water, rainwater, gray water and river or lake water.
Liquids compatible with EN 12050-1, EN 12050-2.
Liquid temperature range
From 0°C to +45°C.
Possible type of installation
Inside or outside the building.
Based on the floor, underground or housed.
Tank capacity 280 litres.
Tank material LLDPE.

FEKAFOS 280 DOUBLE

AUTOMATIC COLLECTING AND PUMPING STATION FOR TWO PUMPS

Collection tanks for domestic waste water from various types of drains or rainwater and infiltration drains, for installations located below the sewer network, such as garages or basements, when the same cannot be reached by gravity.
The pump installed inside the tank allows the water to be pumped into the sewer network.
The tank offers numerous possibilities for connecting inlet, outlet and ventilation pipes, allowing correct use even in limited spaces.
A grinding pump for breaking down foreign bodies can also be installed inside, capable of grinding foreign bodies contained in the liquid and eject them to long distances.
The FEKABOX range is ready for the use of one or two single-phase non-automatic pumps, or three-phase without float, which must be ordered separately, in conjunction with the control panel.

COMPONENTS INCLUDED:
- 2 DSD2" lifting devices and rotation prevention bracket for FEKA VS.
- 6 cable glands for double pump and floats.
- 2 FEKA VS float cable stop kits.
- 3 floats and alarm float support.

Operating range
From 1 to 36 m³/h with prevalence up to 25 m.
Pumped liquid
Waste water with filamentous bodies, dirty water, ground water, rainwater, gray water and river or lake water.
Liquids compatible with EN 12050-1, EN 12050-2.
Liquid temperature range
From 0°C to +45°C.
Possible type of installation
Inside or outside the building.
Based on the floor, underground or housed.
Tank capacity 280 litres.
Tank material LLDPE.

FEKAFOS 550 DOUBLE

AUTOMATIC COLLECTING AND PUMPING STATION FOR TWO PUMPS

Automatic collection and lifting stations, used for the collection and pumping of civil and industrial waste water into the sewer network. They consist of a high density 550 litre polyethylene tank with 2 covers suitable to be walked on (maximum weight 100 kg), fitted with hermetic seals that prevent gases and liquids from escaping. Supplied with 2 lifting devices (DSD2), to facilitate pump maintenance.
The FEKABOX range is ready for the use of one or two single-phase non-automatic pumps, or three-phase without float, which must be ordered separately, in conjunction with the control panel.

COMPONENTS INCLUDED:
- 2 DSD2" lifting devices and rotation prevention bracket for FEKA VS.
- 6 cable glands for double pump and floats.
- 2 FEKA VS float cable stop kits.
- 3 floats and alarm float support.

Operating range
From 1 to 32 m^3/h with prevalence up to 23 m.
Pumped liquid
Waste water with filamentous bodies, dirty water, ground water, rainwater, gray water and river or lake water.
Liquids compatible with EN 12050-1, EN 12050-2.
Liquid temperature range
From 0°C to +45°C.
Possible type of installation
Fixed to the floor if inside, buried if outside.
Not suitable for vehicles, but walkable up to 100 kg.
Tank capacity 550 litres.
Tank material LLDPE.

FEKAFOS MAXI 1200-3600

AUTOMATIC COLLECTING AND PUMPING STATION FOR TWO PUMPS

Automatic collection and lifting stations suitable for lifting drainage and rain water, as well as civil and industrial waste water. They consist of a cylindrical polyethylene monobloc, and an appropriately shaped bottom for the housing of the pumps and for avoiding water stagnation. The upper rectangular opening has polyethylene covers with locking system and smell prevention seals. Tank available in capacities from 1200 l to 3600 l. The tank may also be supplied with valve operation chamber with two gate valves and two check valves. The station is ready for the use of two sewage water pumps, or non-automatic single-phase draining pumps, or three-phase pumps with delivery diameter from DN50 to DN80. The pumps must be ordered separately in combination with the control panel.
For DN50 tanks, the coupling foot is included with Feka VS (accessory 109530080).
To use the FX model with these tanks, accessory 60196199 must be purchased separately.
For DN65 tanks, the coupling foot is included with FX and FK (accessory 60167993).
For DN80 tanks, the coupling foot is included with FX and FK (accessory 60167994).

Operating range
From 2 to 100 m³/h with prevalence up to 40 m.

Pumped liquid
Waste water with filamentous bodies, dirty water, ground water, rainwater, gray water and river or lake water.
Liquids compatible with EN 12050-1, EN 12050-2.

Liquid temperature range
From 0°C to +50°C.

Possible type of installation
Inside or outside a building, fixed to the floor, underground, walkable, drive-over with a special accessory.

Tank material LLDPE.

NOVAIR

SUBMERSIBLE AERATOR

Submerged aerator designed for the aeration of sewage in small purification systems.
Further uses are in the oxygenation of garden ponds and fresh water fish farms.
Thanks to its design, Novair ensures optimal oxygenation of purification systems by creating a large and dense cloud of fine bubbles.
The fluid-dynamic study was particularly focused on the profile of the blade of the impeller, to make sure that its start would not damage the micro-organisms in the liquid. Due to its installation in a vertical position, the aerator body is fitted with a support base.
From a technical point of view, the cooling of the motor is ensured by large contact surfaces between the motor casing and the liquid.
In addition to being resin-coated to ensure operation even in the presence of moisture and possible seepage, the wiring of the power input cable has been made easier to simplify maintenance activities and the replacement of the same.
The steel motor shaft with ceramic treated bushing in the area of the seal rings guarantees high wear resistance and extended product life. Technopolymer pump body, wiring cover, and impellers.
Complete with gasket and 90° barb bend for vertical inlet.

Operating range
Air flow between 2 and 17 m^3/h for a depth of 20 to 90 cm.

Pumped liquid
Gray water, clear water, waste water without suspended solid bodies.

Liquid temperature range
From 0°C to +35°C for domestic use.
Compatible with the EN 60335-2-41.

Motor protection degree IP 68.

Motor insulation thermal classification F.

Power cable type
H07RNF8-F of 2 m, 5 m and 10 m, with SCHUKO plug option.

ELECTRONIC PROTECTION AND CONTROL PANEL

Ebox plus D

Ebox basic

ebox

EBOX BASIC

Electronic control panel for the protection and automatic operation of one or two single-phase submersible or pressurization pumps for domestic applications. Compatible with all pump models with current between 1 and 12 A with power up to 2,2 kW, as shown in the product compatibility table.
Available with 3" display (D versions) which guide the installer during the initial installation settings, monitor the status of the pumps and sensors, set the start/stop levels and view the error list. It is also possible to take advantage of the Dconnect service, which allows you to monitor and control the systems remotely, on a smartphone, PC or tablet. The service is available only by purchasing the DConnect Box.

EBOX PLUS

Electronic control panel for the protection and automatic operation of one or two submersible or pressurization pumps, both single-phase and three-phase, installed in residential building service or commercial building service. Thanks to the possibility of regulating the current, the panel is compatible with all pump models supplied with current between 1 and 12 A with power up to 5,5 kW as shown in the product compatibility table.
Available with 3" display (D versions) which guide the installer during the initial installation settings, monitor the status of the pumps and sensors, set the start/stop levels and view the error list. It is also possible to take advantage of the Dconnect service, which allows you to monitor and control the systems remotely, on a smartphone, PC or tablet. The service is available only by purchasing the DConnect Box.

Nominal tension of power supply
Ebox plus 1 x 230 V / 3 x 230 V - 3 x 400 V (automatic selection).
Ebox basic 1x 230 V.
Frequency 50 - 60 Hz.
Maximum use of power
Ebox plus 5,5 kWatt + 5,5 kWatt.
Ebox basic 2,2 kWatt + 2,2 kWatt.
Maximum use of current 12 A + 12 A.
Starting capacitor KIT supplied as an accessory.
Limits of use ambient temperature
-10°C +40°C.
Limits of storage temperature -25°C +55°C.
Relative humidity to the air 90% a 20°C.
Max altitude max 1000 s.l.m.
Degree of protection IP 55.
Reference standard for the construction of the panels EN 60335-1.

DISPLAY

Thanks to the configuration wizard, installation of display versions is much simpler.

Management is also much easier, thanks to the status always being visible and to a range of additional functions, such as the anti-seizing of drainage pumps, the alarm log, the language selection, and the password protected settings.

EBOX

ELECTRONIC PROTECTION AND CONTROL PANEL

EMPTYING / FILLING FUNCTION

Ideal for piloting the pumping stations of filling / emptying the drainage of rainwater or waste water in general.

- Operation with bulb floats or standard, max 5 (2/3 for operation, 2 for alarm).
- Operation with level transducer (0-10V / 4...20mA).
- Exchange of the starting order of the pumps at every start, every 24 hours or at predefined intervals.

For pump power input voltages other than the standard 400V contact our sales distribution network.
For pumps with power exceeding 4 kW or Y/D start see the ED panels.

ED

ELECTROMECHANICAL PROTECTION AND CONTROL PANELS

Example photo

Supplied on the box in self-extinguishing thermoplastic material, complete with brackets for wall mounting. The framework is self-protected and protects the pump from overload, short circuits with manual reset. The models ED3M, ED3MHS, from ED2,5 to ED30T SD can handle the signal over temperature protection if the pump is provided with it. The models ED3MHS and ED2, 4MHS are provided with additional electrolytic condenser for high startup torque.
Complete with:
- Power line switch with pad lockable door handle (except in single-phase version)
- Self-protected transformer for the power supply of the external controls
- Terminals for connecting the electric pump and the float / pressure control switches
- Terminals without potential for controlling alarm and remote installation of an audible / visual alarm
- Button on the front panel for manual operation (single phase versions)
- Switch on the front panel for manual operation - 0 - Automatic
- Amperometric protection reports
- Pump running indicator
- Voltage indicator
- Limits of use ambient temperature: - 10° C +40° C
- Degree of protection IP55

Nominal power input voltage
230V 1~ ± 10%.
400V 3~ ± 10%.

Frequency 50-60 Hz.

Ambient temperature operation limits
-10 °C +40 °C.

Storage ambient temperature limit
-25 °C + 55 °C.

Relative humidity (without condensation)
50% at 40 °C MAX (90% a 20 °C).

Protection class IP55.

Panel construction
to EN 60204-1 and EN 60439-1.

* Electric control panels ready for the addition of the oil probe module.
** Electric control panels with oil probe module as standard.

E2D

ELECTROMECHANICAL PROTECTION AND CONTROL PANELS

Example photo

Supplied on the box in self-extinguishing thermoplastic material and in metal models E2D50TSD and E2D60TSD, complete with brackets for wall mounting. The framework is self-protected and protects the pump from overload, short circuits with manual reset. The models E2D6M, E2D6MHS, from E2D5T to E2D60T SD can handle the signal over temperature protection if the pump is provided with it. The models E2D6MHS IS provided with additional electrolytic condenser for high startup torque. Complete with:

- Power line switch with pad lockable door handle (except in single-phase version)
- Self-protected transformer for the power supply of the external controls
- Exchange model for the alternation of starting pumps
- Terminals for connecting the electric pump and the float / pressure control switches
- Terminals without potential for controlling alarm and remote installation of an audible / visual alarm
- Button on the front panel for manual operation (single phase versions)
- Switch on the front panel for manual operation - 0 - Automatic
- Amperometric protection reports
- Pump running indicator
- Voltage indicator
- Limits of use ambient temperature: -10° C +40° C
- Degree of protection IP55

Nominal power input voltage
230V 1~ ± 10%.
400V 3~ ± 10%.

Frequency 50-60 Hz.

Ambient temperature operation limits
-10 °C to +40 °C.

Storage ambient temperature limit
-25 °C to + 55 °C.

Relative humidity (without condensation)
50% at 40 °C MAX (90% a 20 °C).

Protection class IP55.

Control panel construction
According to EN 60204-1, and UNI EN 60439/-1.

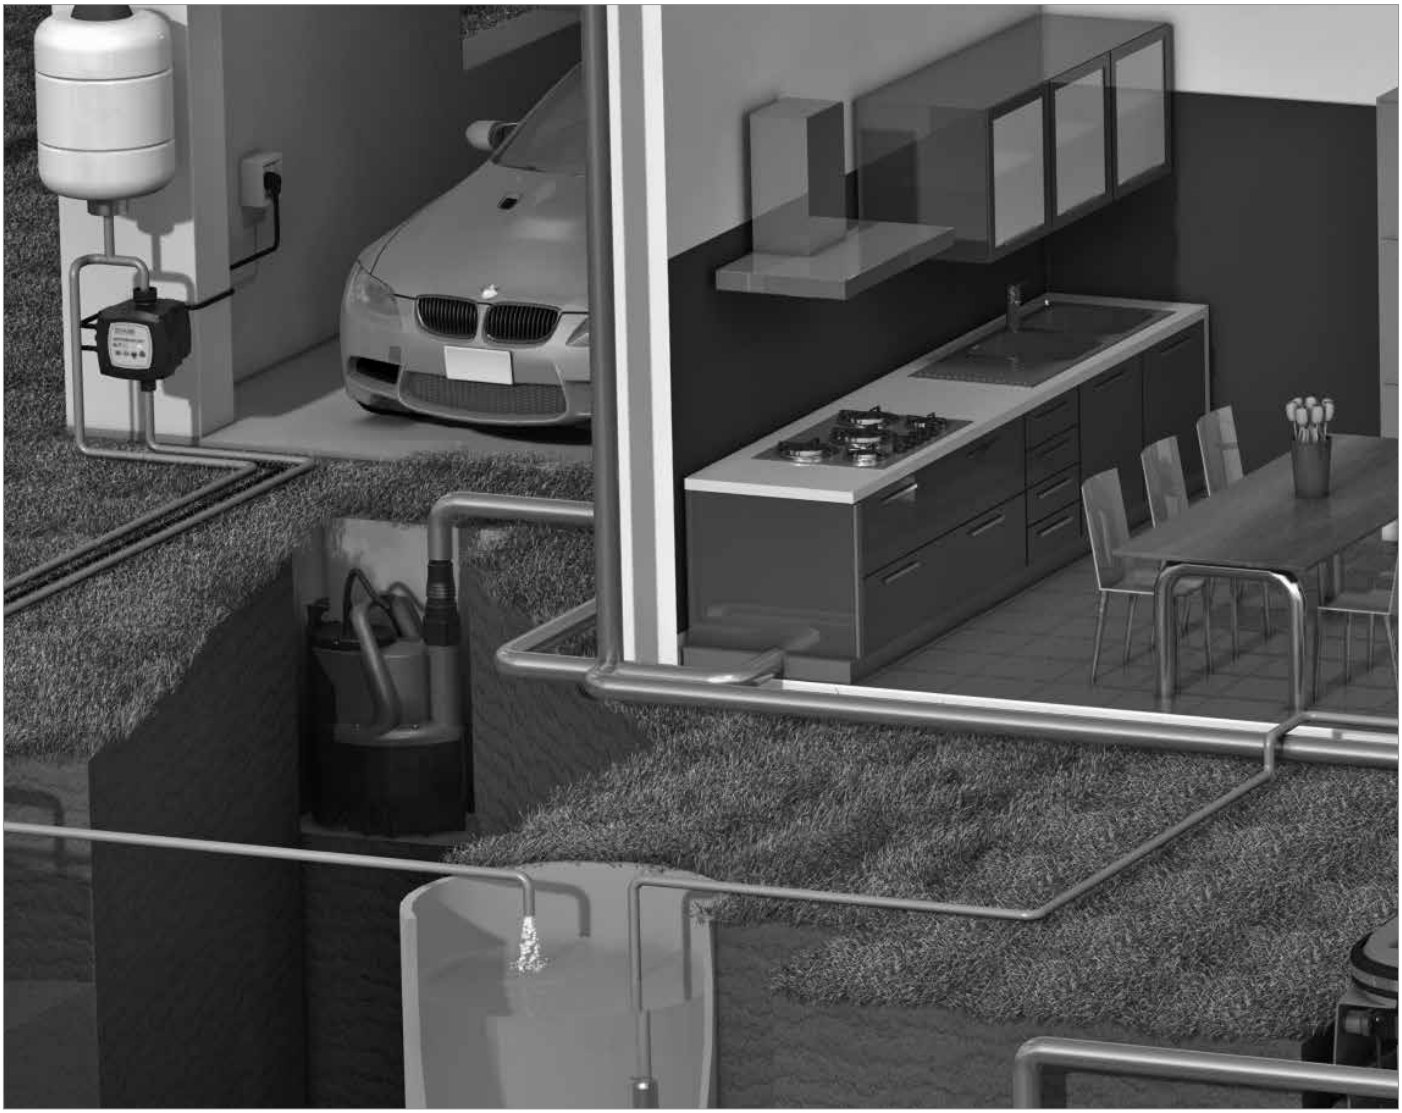
TECHNICAL APPENDIX



APPLICATIONS

Draining of water from basements and garages
Rain water collection wells
Draining wells
Lifting of water from tanks or rivers
Other applications
NOVA: ideal for pumping dirty water without fibres
FEKA: ideal from pumping sewage water from cesspools

FEATURES

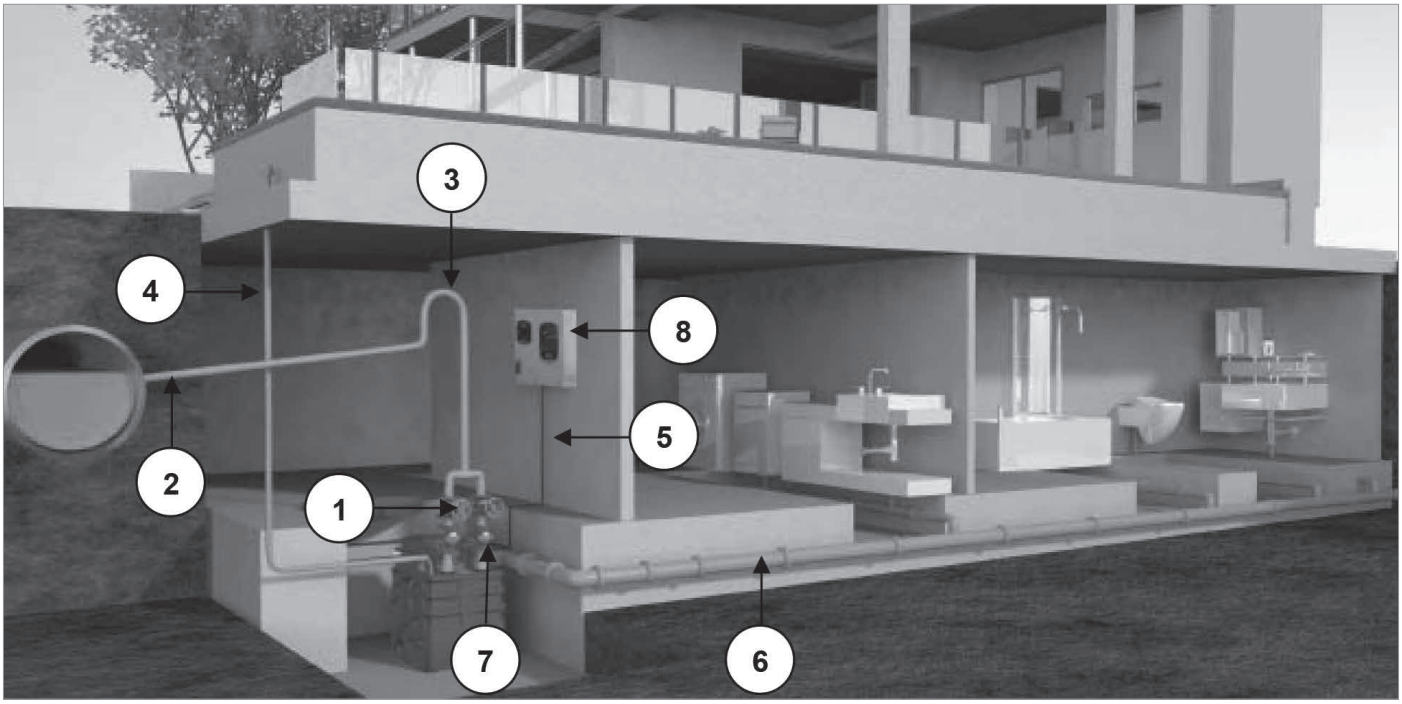
Operating range: from 1 a 16 m^3 with head of up to 10.2 metres.
Water temperature between 0 °C and 35 °C
Free passage for particles from 5 mm to 25 mm
Maximum immersion depth: 7 m
Light and easy to transport

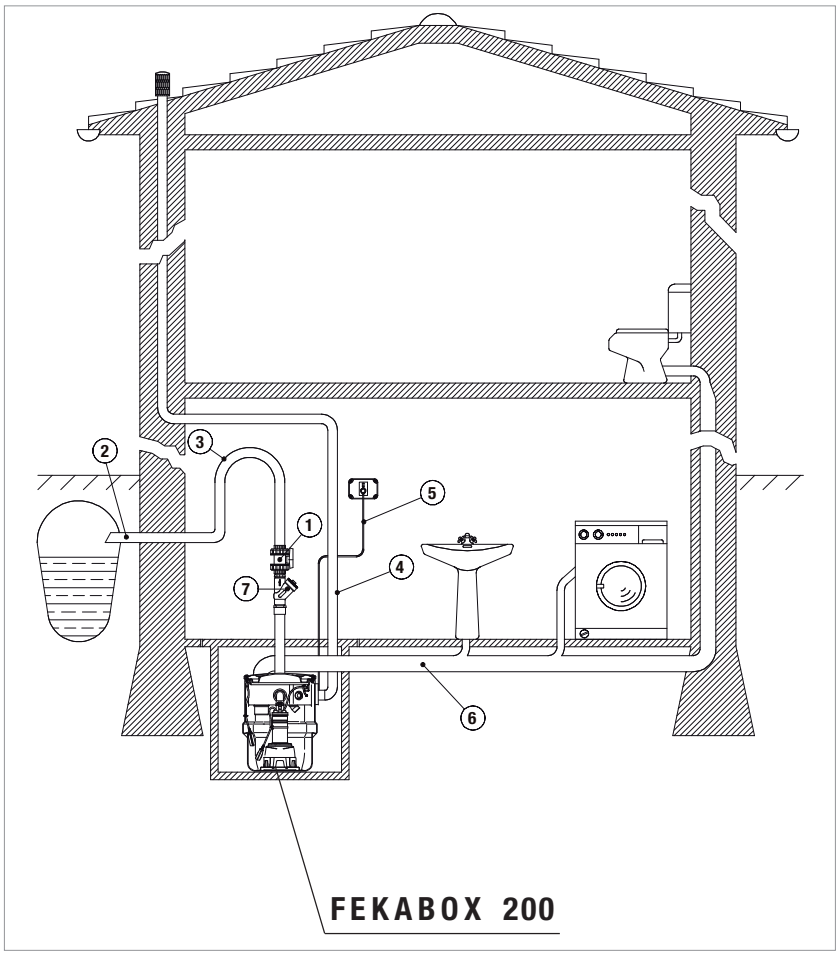
IMPORTANT INFORMATION:

Install a support to ensure that the pump is not resting at the bottom
Do not install pipes of a smaller diameter than the delivery of the pump
Always install in the vertical position
For models with float, to ensure automatic operation, make sure that the arm or the float can move freely, without being impaired by the installation.
Do not connect the electric power input if there are people in contact with the water in the tank where the pump is installed.
Submerge the pump completely to avoid motor overheating
Make sure that there are no air pockets in the pump.

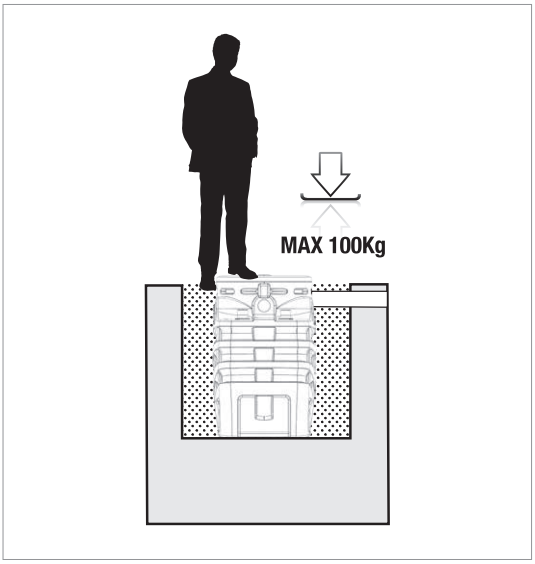
EXAMPLES OF INSTALLATION

Installation can be both above and under ground, when the overcoming of soil barriers is required for connection to the sewage network, including any that might be far. FEKAFOS may be installed in cellars, garages, underground wells.





REFERENCE	DESCRIPTION
1	Ball check valve
2	Delivery
3	Siphon
4	Ventilation
5	Power input cable
6	Collection
7	Non-return valve
8	E-BOX control panel (FEKAFOS models only)



Outdoor installation without supporting structure, buried, with sand. It can be walked on.

FEKAFOS MAXI 1200-3600 PUMPING STATION POSITIONING

Underground on the outside of a building, make a reinforced concrete support platform of adequate strength, calculated by a qualified technician. Position the tank on top of the reinforced concrete support platform and make holes in it in correspondence with the appropriate hooking seats made on the base of the product. Then insert pressure screws into the holes made and hook the tank.

In order to avoid abnormal deformations on the tanks and on the inspection towers during the backfill, always keep the water level inside the tank higher than the level of backfill. Proceed forming layers of 15/20 cm, filling the water tank first and then backfilling with light concrete, as indicated in the drawing.
Finally, cover the product with a layer of washed round gravel and sand until it is completely covered.

In the event of groundwater, having made the reinforced concrete slab, fill the tank with water until reaching the groundwater level, externally backfilling it for the same thickness with concrete.

PULSAR

5" SUBMERSIBLE MONOBLOCK MULTISTAGE PUMP

NEW

5" multi-impeller single bloc submersible pump designed for pressurization, gardening and irrigation and lifting water in residential building service.
These pumps work immersed in wells and first collection tanks or cisterns.
The suction takes place through a filter located in the lower part of the pump.
The motor is located above the hydraulic part and is cooled by the pumped liquid.
Robust components allow the pump to run dry for short periods.
Impellers and diffusers are in technopolymer.
Double mechanical seal in carbon ceramic on motor side and silicon carbide / silicon carbide on pump side, with interposed oil chamber.
Power cable, thermo-amperometric protection and starting capacitor included in the single-phase version.
The single-phase version is also available without the capacitor, this version must be combined with a control panel supplied as an accessory.
Protection by the user in the three-phase version.

Operating range
From 0,9 up to 7,2 m^3/h with head up to 88 m.
Maximum immersion depth 20 m.
Type of pumped liquid Clean, free from solid or abrasive substances, non-viscous, non-aggressive, non-crystallized and chemically neutral.
Sand quantity 50 g/m^3.
Liquid temperature range from 0°C to +40°C.
Flanges, thread 1" 1/4 GAS.
Pump maximum diameter 138 mm.
Impeller/s material Technopolymer.
Maximum number of starts 20/h.
Pump motor protection level IP 68.
Motor insulation class F.
Single phase power input 230 V 50 Hz
Three phase power input
3x230 V 50 Hz / 3x400 V 50 Hz
Power cable 15 m H07RN-F
Possible type of installation Fixed or removable, in vertical or horizontal position
Special versions on request Different voltages and frequencies, different cable length.
Certification CB.

PULSAR DRY

5" SUBMERSIBLE MONOBLOCK MULTISTAGE PUMP

NEW

5" multi-impeller submersible or surface single-block pump.
The suction takes place through a watertight fitting located in the lower part of the pump.
The pump is designed for pressurization, gardening and irrigation in residential building service.
It can withdraw water from first collection tanks or cisterns and is also able to work on the surface.
It can be installed in rooms without ventilation or subject to flooding.
The motor is positioned above the hydraulic part and is cooled by the pumped liquid.
Robust components allow the pump to run dry for short periods.
Impellers and diffusers are in technopolymer.
Double mechanical seal in carbon ceramic on motor side and silicon carbide/silicon carbide on pump side with interposed oil chamber.
The single-phase version includes the 15 meter power cable with power plug, the thermo-amperometric protection and the starting capacitor.
The single-phase version is also available without the capacitor, this version must be combined with a control panel supplied as an accessory.
Protection by the user in the three-phase version.

Operating range
From 0,9 up to 7,2 m^3/h with head up to 88 m.
Maximum immersion depth 20 m.
Type of pumped liquid Clean, free from solid or abrasive substances, non-viscous, non-aggressive, non-crystallized and chemically neutral.
Sand quantity 50 g/m^3.
Liquid temperature range from 0°C to +40°C.
Flanges, thread 1" 1/4 GAS.
Pump maximum diameter 138 mm.
Impeller/s material Technopolymer.
Maximum number of starts 20/h.
Pump motor protection level IP 68.
Motor insulation class F.
Single phase power input 230 V 50 Hz
Three phase power input
3x230 V 50 Hz / 3x400 V 50 Hz
Power cable 15 m H07RN-F
Possible type of installation
Fixed or removable, in vertical position
Special versions on request Different voltages and frequencies, different cable length.

SUBMERSIBLE MULTI-IMPELLER PUMP

NEW

Submersible multi-impeller pump for clean water, designed for pressurization, rainwater reuse, gardening and irrigation in residential building service.
This pump is ideal for the use in rainwater recovery systems and for drawing water from a cistern or a tank.
Available in manual or automatic version with floats.
The automatic version has a single-phase motor and a float switch for protection against dry running.
It does not require a control panel.
The starting capacitor is accessible without disassembling the pump; the motor has integrated thermal protection against overheating.
The pumps is equipped with retractable carrying handle, technopolymer anti-debris filter, non-return valve and 15 meter power cable with Shuko plug.
A four-section reducer fitting is supplied as standard.

Flow rate from 1 m^3/h to 6 m^3/h
Head up to 45 m (model 900);
30 m (model 650);
25 m (model 500).
Maximum immersion depth 12 m
Type of pumped liquid Clean, free from solid or abrasive substances, non-viscous, non-aggressive, non-crystallized and chemically neutral
Liquid temperature range From 0°C to +40°C
Maximum operation depth 15 m
Flanges, thread 1" (supplied as standard with a four-section fitting-reducer)
Pump maximum diameter 160 mm
Impeller/s material Technopolymer
Maximum number of starts 20/h
Protection class IP 68
Motor insulation class F
Single phase power input 230 V 50 Hz
Power cable (m) and plug
15 m H07RNF with power plug.
Possible type of installation
Fixed or removable, in vertical position
Special versions on request Cable of different lengths, different type of power plug

SUBMERSIBLE MULTI-IMPELLER ELECTRONIC PUMPS

NEW

Submersible electronic multi-impeller pump for clean water designed for pressurization, reuse of rainwater, gardening and irrigation in residential building service.
It integrates a pressure switch, a flow sensor and control electronics for automatic switching on and off.
The automatic operation allows the pump to start and stop autonomously according to the requirements of the system and protects it from dry running.
Supplied with integrated start capacitor, it is installed in a compartment accessible without disassembling the pump, a non-return valve and a 15 meter power cable with plug.
The pump is available with technopolymer anti-debris filter or with connection for float suction kit (X version).
It is recommended the installation of a small auxiliary expansion tank.

Flow rate from 1 m³/h to 6 m³/h
Head up to
45 m (900 version) - 30 m (650 version)
Maximum immersion depth 12 m
Type of pumped liquid Clean, free from solid or abrasive substances, non-viscous, non-aggressive, non-crystallized and chemically neutral.
Liquid temperature range From 0°C to +40°C
Maximum operation depth 15 m
Flanges, thread 1" (supplied as standard with a four-section fitting-reducer)
Pump maximum diameter 160 mm.
Impeller/s material Technopolymer
Maximum number of starts 20/h
Protection class IP 68
Motor insulation class F
Single phase power input 230 V 50 Hz
Power cable (m) and plug
15 m H07RNF with power plug
Possible type of installation
Fixed or removable, in vertical position
Special versions on request Cable of different length, different type of power plug

DTRON 2

7" ELECTRONIC MULTISTAGE SUBMERSIBLE PUMPS

7" submersible electronic multi-impeller pump designed for use in water wells, tanks or cisterns. The pump is suitable for use in residential building service for pressurization, rainwater reuse and gardening and irrigation.
The pressure switch and flow switch integrated with the electronic board, make the pump completely automatic for the switching on/off and dry running protection. It integrates a double mechanical seal, a not return valve and a handle for ease transport and installation. Built with a innovative modular design: the hydraulic part, the motor, the electrical part and the filter can be disassembled separately, simplifying the maintenance activity.
The suction height is adjustable from the bottom up to 8 cm using the special accessory supplied as standard. A float can be connected without compromising the water tightness of the pump thanks to the NFC pocket. Integrated 0.04-litre expansion vessel with no need for maintenance or refilling. The cable has a quick coupling for easier installation inside the tank/cistern.
The pump is also available in X version with 1" intake and kit X which includes 1 meter suction hose and float to prevent the suction of impurities from the bottom. The whole pump is classified as IP 68. With the accessory DOC68 (supplied separately) becomes a surface pump to be used under the water level.
* Certified version for drinking water is available on request.

Flow rate maximum 7,2 m³/h.
Head up to 45 m.
Maximum immersion depth 12 m.
Type of pumped liquid Clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallized and chemically neutral.
Free passage 2 mm.
Liquid temperature range from +0°C to +50°C.
Maximum immersion depth 15 m.
Set cut-in 2,4 bar (+-0,2).
Outlet connection Thread 1" 1/4.
Pump maximum diameter 185 mm.
Protection class IP 68.
Motor insulation class F.
Power cable (m) and plug 15 m with plug.
Possible type of installation Fixed, horizontal or vertical. Submerged or semi-submerged. It can be installed on the surface, under the water level, or outside in a vertical position with the DOC68 accessory (supplied separately).

7" ELECTRONIC MULTISTAGE SUBMERSIBLE PUMPS

7" electronic submersible multi-impeller pump for clean water designed for use in wells, cisterns or tanks. It can be use submerged, partially submerged or on the surface (with the appropriate accessory).
It is suitable for use in residential building service for pressurization, reuse of rainwater and gardening and irrigation activities.
The pressure sensor and a flow meter integrated with the electronic board, make the pump completely automatic for the switching on/off and dry running protection. It integrates a double mechanical seal, a not return valve and a handle for ease transport and installation. Suction height can be adjusted from the bottom up to 8 cm using the special accessory supplied as standard. It is possible to connect a float without compromising the watertight seal of the pump thanks to the NFC (Near Field Communication) pocket.
The starting pressure is adjustable through the Com Box, supplied as standard. Integrated 0.04-litre expansion vessel with no need for maintenance or refilling. 15 meter power cable with plug. The Com Box allows you to set the start and stop pressure and to control the alarms.
Pump available le in the X version with 1" inlet and X kit which includes the 1 meter suction tube and float to prevent the suction of impurities from the bottom.
The entire pump is IP 68 certified. With the DOC68 accessory (supplied separately) it becomes an IP 68 surface pump to be used under head.
* Certified version for drinking water available on request.

Flow rate maximum 7,2 m³/h.
Head up to 45 m.
Maximum immersion depth 12 m.
Type of pumped liquid Clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallized and chemically neutral.

MICRA HS

HIGH SPEED 3" SUBMERSIBLE PUMPS

3" submersible pump for pressurization, gardening, irrigation and subsurface water removal tasks in residential building service.
It can be installed in wells of at least 3" or in cisterns and tanks; Micra HS makes it possible to increase the pressure of the water trapped and to use it to water the garden or the vegetable garden.
Micra HS is supplied with the Active Driver Plus variable frequency drive, which allows the pump motor speed to be adjusted according to requirements, thus allowing energy savings and increasing the maximum motor rotation speed (up to 130 Hz or 7600 rpm) to allow better performance compared to pumps of the same size.
Pump and motor coupled by rigid joint. Not return valve integrated in the cylinder head. Two-pole asynchronous submersible electric motor with stator immersed in thermosetting insulating resin, with high heat dissipation capacity and encapsulated in a hermetic stainless steel casing.
The DConnect service makes remote control possible (with DConnect Box supplied separately).

Power supply tolerance
230 V (+10% / -20%) single-phase.

Rotation speed 7.600 rpm (130 Hz).

Pump voltage 230 V three-phase.

Operating range
from 1 to 5 m^3/h with head up to 150 m.

Pumped liquid clean, free of solid or abrasive contaminants, not viscous, not aggressive, chemically neutral, similar to water properties.
Maximum permissible sand quantity: 50 g/m^3.
Liquid temperature range: from 0°C up to +35°C.
Installation: boreholes ≥ 3" diameter and tanks in vertical position. In case of horizontal installation, ensure a minimum load applied to the thrust bearings.

Power lead cable 1,4 m or 60 m removable cable (available also as optional single unit shielded cable 30m, 60m, 90m long).

The package contains the pump (hydraulic part and motor) with standard cable and Active Driver.

3" SUBMERSIBLE PUMPS

CB[1]

BOOSTER

[1]Required for single-phase versions

Centrifugal type. Directly coupled pump and motor with rigid coupling. Impellers and thrust rings in Noryl and diffusers in self-lubricating polyacetyl. Pump liner, shaft and coupling, strainer and cable sheath in stainless steel. Base support and head in brass with check valve incorporated in head. Submersible asynchronous two-pole motor made entirely of AISI 304 stainless steel with brass bearings. Squirrel cage rotor in copper mounted on Kingsbury thrust block. Cooling of the thrust bearing assembly and the bushings is provided by water, thereby eliminating the risk of oil contamination. **Stainless steel canned stator, filled with thermosetting resin with high insulation property and better thermal dissipation capability.**
The automatic reset thermal protection device is integral with the motor.

Liquid quality requirements clean, free of solid or abrasive contaminants, not viscous, chemically neutral, close to the properties of water.

Liquid temperature range From 0° C to +35° C.

Maximum permissible sand quantity 40 g/m^3.

Protection rating IP 68.

Heat insulation class F.

Max. number of starts 20/h.

Power cable
MICRA 50 - 1 m.
MICRA 75 - 1,2 m.
MICRA 100 - 1,4 m.

Ready-to-install kit available including single phase electric pump with 15m cable and double capacitor control panel.

S4 AMEIRA - WATER FILLED MOTOR

4" SUBMERSIBLE PUMPS

AMEIRA
S4 SUBMERSIBLE PUMPS

The S4 AMEIRA are a 4 inches multi-impeller borehole pumps for clean water, designed for water boosting, gardening and irrigation, lifting water from boreholes in domestic and residential, civil and commercial applications and irrigation systems also for agriculture.
Hydraulic part and motor made of AISI 304 stainless steel and technopolymer for parts in contact with water. Technopolymer impellers and diffusers. Built-in not return valve and suction filter. Single-phase version with manually resettable overload protection and capacitor in the electric control panel to be ordered separately (except for the kit version). Overload protection to be provided by the user for the three-phase version.
Water filled motor, stainless steel canned stator, filled with thermosetting resin with high insulation property and better thermal dissipation capability.
Available: only pump body, pump body with water or oil-filled motor and kit with pump body and motor, power supply cable, cord and control box.
All the model have the ACS and WRAS certificates. DM174 certificate are pending approval.

Flow rate up to 21,6 m^3/h.
Head up to 427 m.
Type of pumped liquid clean, free of solids and abrasive substances, not viscous, not aggressive, not crystallized and chemically neutral.
Pump maximum diameter 99 mm.
Maximum amount of sand 150 g/m^3.
Impellers material
Technopolymer.
Liquid temperature range
From 0°C to + 40°C.
Max immersion depth
4GG: 300 m.
Motor protection class IP 68.
Motor insulation class F.

S4 - OIL FILLED MOTOR

4" SUBMERSIBLE PUMPS

4" multi-impeller borehole pumps for clean water, designed for water boosting, gardening and irrigation, lifting water from boreholes in residential building service, commercial building service and irrigation systems also for agriculture. **Only for extra EU markets.**
Hydraulic part built in stainless steel AISI 304, technopolymer is used for the parts in contact with water. Impellers and diffusers in technopolymer. Built-in check valve and suction filter. Single-phase version with manual resetting thermo-amperometric protection and condenser in the electrical control panel to be ordered separately (except for the kit version). The three-phase version must be protected by the user.

Oil filled motor
4OL is a two-pole asynchronous motor in AISI 304L stainless steel for parts in contact with water. The cooling and lubrication of the ball bearings is guaranteed by a special liquid approved for food use. The rewindable stator is inserted in an AISI 304L stainless steel jacket secured by steel pins to the upper motor support. Equipped with a carbon-ceramic mechanical seal.
Motor suitable for use with inverters (30 Hz - 50 Hz). Electrical panel supplied or to be ordered separately depending on the configuration chosen. In the three-phase version the protection is the responsibility of the user.

Flow rate maximum up to 21,6 m^3/h.

Head up to 368 m.

Type of pumped liquid Clean, free of solids and abrasive substances, not viscous, not aggressive, not crystallized and chemically neutral.

Pump maximum diameter 99 mm.

Maximum amount of sand 150 g/m^3.

Impellers material
Technopolymer.

Liquid temperature range
From 0°C to + 40°C.

Max immersion depth
4OL: 250 m.

Motor protection class IP 68.

Motor insulation class F.

ONLY FOR EXTRA EU MARKETS

SAND RESISTANT

4 " SUBMERSIBLE MOTORS

4" Asynchronous two-poles submersible motor, **made in AISI 304 stainless steel** for parts in contact with water. Cooling and lubrication of the thrust bearing assembly and carbon bushes is provided by a **mixture of water and glycol.** Squirrel-cage rotor mounted on Kingsbury self-centring thrust bearing.
Stainless steel canned stator, filled with thermosetting resin with high insulation property and better thermal dissipation capability.
Removable cable connector to allow fast and easy maintenance. The cable is certified ACS, WRAS and KTW. Motor suitable for use with variable frequency drive (30 Hz – 50 Hz). Capacitor and manually resettable overload protection located in the electric panel that can be supplied separately for the single-phase 50 Hz version. Overload protection must be provided by user for the three-phase version.

Flanging NEMA - 4".

Protection level IP 68.

Insulation class F.

Voltage
Single-phase 220-230 V / 50 Hz.
Three-phase 400 V / 50 Hz - 230 V / 50 Hz.

Equipped with cable
1,7 m for motor power up to 2,2 kW.
2,7 m for motor power up to 3 kW.
3,5 m for motor power of 7,5 kW.

Available on request cables of different lengths, different supply voltage, thermal surge protector.

4TW

4 " SUBMERSIBLE MOTORS

The 4TW is a 4-inch single-phase submersible motor, designed for pressure boosting, gardening and irrigation, drawing water from subsoil in civil and commercial applications and for using water in irrigation systems also in agriculture.
Motor with the parts in contact with water made of AISI 304 stainless steel. Encapsulated and resin-filled stator. Cooled and lubricated with a mixture of water and glycol. Combined with the pump body, it is able to increase the water pressure, draw water from wells, tanks or reservoirs and to allow it to be used also for irrigating medium and large-sized vegetable gardens. **It has an integrated capacitor which does away with the external control panel.**

Flanging NEMA 4".
Insulation class F.
Protection class IP68.
Cooling flow speed min. 0,3 m/s 35 °C.
Power supply tolerance + 6 % / -10 %.
Max. starts 20/h.
Max operating depth 300 m.
Possible type of installation
Vertical or horizontal.
Horizontal operation 0,5 HP - 1,5 HP.
On request cables of different lengths and different power input voltages.

4 " SUBMERSIBLE MOTORS

4" Asynchronous two-poles submersible motor, rewindable-type, made in AISI 304 stainless steel for parts in contact with water. Cooling and lubrication of the ball bearings is provided by a special FDA-approved liquid. Stator housed in an external shell in AISI 304L (rewindable-type) connected with stainless steel pins to the upper support of the motor. Removable cable connector to allow fast and easy maintenance. The cable is certified ACS, WRAS and KTW.
Motor suitable for use with variable frequency drive (30 Hz – 50 Hz). Mechanical seal in ceramic-carbon. Capacitor and manually resettable overload protection located in the electric panel that can be supplied separately for the single-phase version. Overload protection must be provided by user for the three-phase version. The motor can be equipped with a PT100 temperature sensor.

Flanging NEMA 4".
Insulation class F.
Protection class IP68.
Cooling flow speed min. 0,3 m/s 35 °C.
Power supply tolerance + 6 % / -10 %.
Max. starts 20/h.
Max operating depth 250 m.
Horizontal operation 0,5 HP - 10 HP.

SS6

6" SUBMERSIBLE PUMPS

Multistage **semiaxial** submersible electric pumps for wells measuring 6" or above, able to generate a broad range of flow rates. These units are used extensively for lifting, distribution, and pressurisation in civil and industrial water systems, filling of booster pumps and tanks, fire-fighting systems and washing of irrigation systems. Application with clean, not aggressive water free from solids or abrasive substances.

Construction features of the pump

Pump body and impellers in pressed AISI 304 stainless steel or AISI 316.

Pump with check valve of low pressure loss.

For operation with inverter see the specifications of the coupled motor.

Performance range

flow up to 75 m^3/h and max head of 670 m.

Max. quantity of sand/silt 50g/m^3.

Max. ambient temperature

30°C (50°C available on request).

Outlet connection diameter (inside threaded)

SS6 A / SS6 B : 2 ½".

SS6 C : 3".

SS6 D – SS6 E : 4".

Coupling with motors of 4", 6" or 8" depending on the required hydraulic power, and available in standard or stainless steel version:
4GG: encapsulated 4" submersible motor.
4OL: 4" submersible motor in oil bath.
6GF: encapsulated 6" submersible motor.
TR6: rewindable 6" submersible motor.
TR8: rewindable 8" submersible motor.

ErP ready

SS7

7" SUBMERSIBLE PUMPS

Multistage semiaxial submersible electric pumps for wells measuring 7" or above, able to generate a broad range of flow rates. These units are used extensively for lifting, distribution, and pressurisation in civil and industrial water systems, filling of booster pumps and tanks, fire-fighting systems and washing of irrigation systems.
Application with clean, not aggressive water free from solids or abrasive substances.

Construction features of the pump

Pump body and impellers in pressed AISI 304 stainless steel or AISI 316.
Pump with check valve of low pressure loss.

For operation with inverter see the specifications of the coupled motor.

Performance range
flow up to 110 m³/h and max head of 423 m.

Max. quantity of sand/silt 50g/m³.

Max. ambient temperature
30°C (50°C available on request).

Outlet connection diameter (inside threaded)
5".

Coupling with motors of 6" or 8" depending on the required hydraulic power, and available in standard or stainless steel version:
6GF: encapsulated 6" submersible motor.
TR6: rewindable 6" submersible motor.
TR8: rewindable 8" submersible motor.

8" SUBMERSIBLE PUMPS

Multistage **semiaxial** submersible electric pumps for wells measuring 8" or above, able to generate a broad range of flow rates. These units are used extensively for lifting, distribution, and pressurisation in civil and industrial water systems, filling of booster pumps and tanks, fire-fighting systems and washing of irrigation systems.
Application with clean, not aggressive water free from solids or abrasive substances.

Construction features of the pump
Pump body and impellers in pressed AISI 304 stainless steel or AISI 316.
Pump with check valve of low pressure loss.

For operation with inverter see the specifications of the coupled motor.

Performance range
flow up to 210 m³/h and max head of 555 m.

Max. quantity of sand/silt 50g/m³.

Max. ambient temperature
30°C (50°C available on request).

Outlet connection diameter (inside threaded)
6".

Coupling with motors of 6", 8" or 10" depending on the required hydraulic power, and available in standard or stainless steel version:
6GF: encapsulated 6" submersible motor.
TR6: rewindable 6" submersible motor.
TR8: rewindable 8" submersible motor.
TR10: rewindable 10" submersible motor.

10" SUBMERSIBLE PUMPS

Multistage **semiaxial** submersible electric pumps for wells measuring 10" or above, able to generate a broad range of flow rates. These units are used extensively for lifting, distribution, and pressurisation in civil and industrial water systems, filling of booster pumps and tanks, fire-fighting systems and washing of irrigation systems.
Application with clean, not aggressive water free from solids or abrasive substances.

Construction features of the pump
Pump body and impellers in pressed AISI 304 stainless steel or AISI 316.
Pump with check valve of low pressure loss.

For operation with inverter see the specifications of the coupled motor.

Performance range
flow up to 290 m³/h and max head of 385 m.
Max. quantity of sand/silt 50g/m³.
Max. ambient temperature
30°C (50°C available on request).
Outlet connection diameter (inside threaded)
6".

Coupling with motors of 6", 8" or 10" depending on the required hydraulic power, and available in standard version or a version completely in stainless steel.
6GF: encapsulated 6" submersible motor.
TR6: rewindable 6" submersible motor.
TR8: rewindable 8" submersible motor.
TR10: rewindable 10" submersible motor.

SMC6

6" SUBMERSIBLE PUMPS

Multistage semiaxial submersible electric pumps for wells measuring 6" or above, able to generate a broad range of flow rates and heads. They are used extensively for the lifting, distribution and pressurisation of industrial water systems, the supply of booster pumps and tanks, fire fighting systems and irrigation systems. Application with clean, not aggressive water free from solids or abrasive substances.

Construction features of the pump
Cast iron pump body treated with cataphoresis paint coating and dynamically balanced impellers in microcast AISI 304 stainless steel coupled on the shaft with pull tab. Shaft guided with coaxial bush bearings and fully protected with bushes.

Pump with check valve of low pressure loss. Threaded delivery port.

Refer to the technical data sheets of the specific model for the electrical characteristics of the coupled motors and the specifications for operation with inverter.

Operating range
up to 84 m^3/h with head up to 452 m.

Pumped liquid clean, free of solids and abrasives, chemically neutral, with properties similar to water.

Starts/hour see the coupled motor.

Cooling flow see the coupled motor.

Maximum permitted amount of sand
40 g/m^3.

Ambient temperature 30 °C.

Minimum recommended level on suction line 1 m.

Installation horizontal or vertical.

Coupling with motors of 4", 6" or 8" depending on the required hydraulic power, and available in standard version or a version completely in stainless steel.
4GG: encapsulated 4" submersible motor.
4OL: 4" submersible motor in oil bath.
6GF: encapsulated 6" submersible motor.
TR6: rewindable 6" submersible motor.
TR8: rewindable 8" submersible motor.

8" SUBMERSIBLE PUMPS

8 "semi-axial multi-impeller submersible pump with cast iron pump body.
Designed for pressurization activities, pressurization and groundwater in commercial building service and to be used in irrigation systems, also in agriculture.
Different types of impeller available to ensure the best efficiency at different flow rates and models up to 18 impellers to cover a wide range of heads.
Impellers in micro-cast AISI 304 stainless steel.
Threaded delivery port.
Pump equipped with non-return valve with low pressure drop.
The pump complies with DM174 for use with drinkable water.
The package contains the two cable covers to be used according to the type of starting (direct or star / delta).

Coupling with motors from 6 "to 8" depending on the power required by the hydraulics:

- 6GF: encapsulated 6" submersible motor
- TR6: rewindable 6" submersible motor
- TR8: rewindable 8" submersible motor

For operation with the variable frequency drive, refer to the specifications of the coupled motor.

Flow rate maximum
Up to 192 m^3/h with head up to 500 m.
Maximum immersion depth
Depending on the motor.
Pumped liquid Clean, free from solid or abrasive substances, non-viscous, non-aggressive, non-crystallized and chemically neutral.
Amount of sand supported 80 g/m^3.
Liquid temperature range
From 0°C to +30°C.
Maximum pressure Depending on the motor.
Flanges, thread 5".
Pump maximum diameter 203 mm.
Impeller/s material
Micro-cast AISI 304 stainless steel.
Protection class IP 68.
Single phase power input Not available.
Three phase power input
3x230 V 50 Hz / 3x400 V 50 Hz.
Power cable (m) and plug Depending on the motor, all without the power plug.
Possible type of installation
Fixed in vertical position.
Horizontal installation permitted by removing the non-return valve and installing a cooling jacket (check the applicability of the motor for horizontal use in the dedicated section).

SMC10

10" SUBMERSIBLE PUMPS

Multistage semiaxial submersible electric pumps for wells measuring 10" or above, able to generate a broad range of flow rates and heads. They are used extensively for the lifting, distribution and pressurisation of industrial water systems, the supply of booster pumps and tanks, fire fighting systems and irrigation systems. Application with clean, not aggressive water free from solids or abrasive substances.

Construction features of the pump
Cast iron pump body treated with cataphoresis paint coating and dynamically balanced impellers in microcast AISI 304 stainless steel coupled on the shaft with pull tab. Shaft guided with coaxial bush bearings and fully protected with bushes.

Pump with check valve of low pressure loss. Flanged delivery port and kit containing counter flange, bolts and gaskets.

Refer to the technical data sheets of the specific model for the electrical characteristics of the submersible motors and the specifications for operation with inverter.

Operating range
Up to 400 m³/h with head up to 453 m.

Pumped liquid clean, free of solids and abrasives, chemically neutral, with properties similar to water.

Start-ups/hour see the coupled motor.

Cooling flow see the coupled motor.

Maximum permitted amount of sand 40 g/m³.

Ambient temperature 30 °C.

Minimum recommended level on suction line 2 m.

Installation horizontal or vertical.

Coupling with motors of 6", 8" or 10" depending on the required hydraulic power, and available in standard version or a version completely in stainless steel.
6GF: encapsulated 6" submersible motor.
TR6: rewindable 6" submersible motor.
TR8: rewindable 8" submersible motor.
TR10: rewindable 10" submersible motor.

SMC12

12" SUBMERSIBLE PUMPS

Multistage semiaxial submersible electric pumps for wells measuring 12" or above, able to generate a broad range of flow rates and heads. They are used extensively for the lifting, distribution and pressurisation of industrial water systems, the supply of booster pumps and tanks, fire fighting systems and irrigation systems. Application with clean, not aggressive water free from solids or abrasive substances.

Construction features of the pump
Cast iron pump body treated with cataphoresis paint coating and dynamically balanced impellers in microcast AISI 316 stainless steel coupled on the shaft with pull tab. Shaft guided with coaxial bush bearings and fully protected with bushes.

Pump with check valve of low pressure loss. Flanged delivery port and kit containing counter flange, bolts and gaskets.

Refer to the technical data sheets of the specific model for the electrical characteristics of the submersible motors and the specifications for operation with inverter.

Operating range
Up to 540 m^3/h with head up to 320 m.

Pumped liquid clean, free of solids and abrasives, chemically neutral, with properties similar to water.

Start-ups/hour see the coupled motor.

Cooling flow see the coupled motor.

Maximum permitted amount of sand 40 g/m^3.

Ambient temperature 30 °C.

Minimum recommended level on suction line 2.5 m.

Installation horizontal or vertical.

Coupling with motors of 8", 10" or 12" depending on the required hydraulic power, and available in standard version or a version completely in stainless steel.
TR8: rewindable 8" submersible motor.
TR10: rewindable 10" submersible motor.
TR12: rewindable 12" submersible motor.

SMN8

8" SUBMERSIBLE PUMPS

8" semi axial multi-impeller submersible pump in AISI 316 stainless steel for clean water. Designed for pressurization activities, lifting water in commercial building service and use in irrigation systems even agriculture. The SMN8 pump makes it possible to increase the pressure of water drawn from wells (at least 8" in diameter), from cisterns or tanks and to use it in irrigation systems in agriculture. Different types of impellers to guarantee the best efficiency at different flow rates and models up to 17 impellers to cover a wide range of heads are available. AISI 316 stainless steel impellers. Pump equipped with low pressure drop check valve. The pumps complies with DM174 for use with water intended for human consumption. The package contains the two cable covers to be used according to the type of starter (DOL or Star/Delta).

Operating range
Up to 192 m^3/h with head up to 466m.

Pumped liquid Clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallized and chemically neutral, also suitable for aggressive solutions and/or salt water.

Start-ups/hour see the coupled motor.

Cooling flow see the coupled motor.

Maximum permitted amount of sand
80 g/m^3.

Ambient temperature 30 °C.

Minimum recommended level on suction line 1,5 m.

Installation horizontal or vertical.

Coupling with motors from 6" to 8" depending on the power required by the hydraulic system:
6GF: 6" submersible encapsulated motor
TR6: 6" submersible rewindable motor
TR8: 8" submersible rewindable motor

For operation with the variable frequency drive, refer to the specifications of the coupled motor.

SMN10

10" SUBMERSIBLE PUMPS

10" semi axial multi-impeller submersible pump in AISI 316 stainless steel for clean water. Designed for pressurization activities, lifting water in commercial building service and use in irrigation systems even agriculture. The SMN10 pump makes it possible to increase the pressure of water drawn from wells (at least 10" in diameter), from cisterns or tanks and to use it in irrigation systems in agriculture. Different types of impellers to guarantee the best efficiency at different flow rates and models up to 7 impellers to cover a wide range of heads. AISI 316 stainless steel impellers. Pump equipped with low pressure drop check valve. The pumps complies with DM174 for use with water intended for human consumption. The package contains the two cable covers to be used according to the type of starter (DOL or Star/Delta).

Operating range
Up to 420 m^3/h with head up to 453 m.

Pumped liquid Clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallized and chemically neutral, also suitable for aggressive solutions and/or salt water.

Start-ups/hour see the coupled motor.

Cooling flow see the coupled motor.

Maximum permitted amount of sand
80 g/m^3.

Ambient temperature 30 °C.

Minimum recommended level on suction line 1,5 m.

Installation horizontal or vertical.

Coupling with motors from 6" to 10" depending on the power required by the hydraulic system:
6GX: 6" submersible encapsulated motor
TR6: 6" submersible rewindable motor in AISI 316 or DUPLEX
TR8: 8" submersible rewindable motor in AISI 316 or DUPLEX
TR10: 10" submersible rewindable motor in AISI 316 or DUPLEX

For operation with the variable frequency drive, refer to the specifications of the coupled motor.

12" SUBMERSIBLE PUMPS

12" semi axial multi-impeller submersible pump in AISI 316 stainless steel for clean water. Designed for pressurization activities, lifting water in commercial building service and use in irrigation systems even agriculture. The SMN12 pump makes it possible to increase the pressure of water drawn from wells (at least 12" in diameter), from cisterns or tanks and to use it in irrigation systems in agriculture. Different types of impellers to guarantee the best efficiency at different flow rates and models up to 5 impellers to cover a wide range of heads. AISI 316 stainless steel impellers. Pump equipped with low pressure drop check valve. The pumps complies with DM174 for use with water intended for human consumption. The package contains the two cable covers to be used according to the type of starter (DOL or Star/Delta).

Operating range
Up to 540 m^3/h with head up to 320 m.

Pumped liquid Clean, free from solid or abrasive substances, not viscous, not aggressive, not crystallized and chemically neutral, also suitable for aggressive solutions and/or salt water.

Start-ups/hour see the coupled motor.

Cooling flow see the coupled motor.

Maximum permitted amount of sand 80 g/m^3.

Ambient temperature 30 °C.

Minimum recommended level on suction line 2.5 m.

Installation horizontal or vertical.

Coupling with motors of 8", 10" or 12" depending on the required hydraulic power, and available in standard version or a version completely in stainless steel.
TR8: rewindable 8" submersible motor.
TR10: rewindable 10" submersible motor.
TR12: rewindable 12" submersible motor.

For operation with the variable frequency drive, refer to the specifications of the coupled motor.

6GF / 6GX

6" SUBMERSIBLE MOTORS

6-inch submersible motors designed for pressure boosting, gardening and irrigation, drawing water from subsoil in civil and commercial applications and for using water in irrigation systems also in agriculture.

6GX model:

- made of AISI 316 stainless steel.
- with SiC/SiC mechanical seal.

GF model:

- made of AISI 304 and cast iron protected with an electrophoresic paint coating for the part submerged in water.

Encapsulated and resin-filled stator. Cooled and lubricated with a mixture of water and glycol. Combined with the pump body, it is able to draw water from wells of at least 6" (or tanks and cisterns). Single-phase versions to be combined with an external panel that integrates the capacitor and the manually resettable overload protection. Different versions are available with the addition, during installation, of the PT100 or PTC temperature sensor which can also come with star-delta start-up.

Flanging NEMA 6".
Insulation class F.
Protection class IP68.
Cooling flow speed min. 0,3 m/s 35 °C.
Power supply tolerance + 6 % / -10 %.
Max. starts 25/h.
Max operating depth 300 m.
Horizontal operation 5,5 HP - 50 HP.
On request cables of a different length, different power input voltages, single-phase version (up to 15 HP).

6GF HEAVY DUTY

6" SUBMERSIBLE MOTORS

6" canned submersible motor made in AISI 304 and cataphoresis treated cast iron. Resin filled stator. Cooling and lubrication are guaranteed by a mixture of water and glycol. 6GF heavy duty motors are design very deep borehole installation. Motor suitable for use with variable frequency drive (30 Hz - 50 Hz). Available with direct or star-delta start, protection must be guaranteed by the user. It is available with additional PT100 or PTC temperature sensor.

Maximum operating depth 300 m.
Standard flanges NEMA 6".
Maximum number of starts per hour 25/h.
Motor protection class IP 68.
Motor insulation class F.
Cooling flow speed min. 0,3 m/s a 35°C.
Max Thrust load 50 kN.
Three phase power input
3x400V 50 Hz / 3x460V 60 Hz.
Power input tolerance +6% / -10%.
Power cable 4 m.
Possible type of installation Vertical.
Special versions on request It is available with additional PT100 or PTC temperature sensor. Voltage and power cables of different length.
Cable certifications ACS, WRAS and KTW certified cable.

MECHANICAL SEAL
Sic Sic as STD,
reinforced top support

IMPROVED DIAPHRAGM
stronger material and design
for an higher reliability

HEAVY DUTY THRUST BEARING,
max axial load 50 kN

TR6

6" SUBMERSIBLE MOTORS

6" rewindable asynchronous submersible motor.
Designed for pressurization, lifting water from wells and water use in agricultural irrigation systems.
AISI 316 stainless steel jacket.
Rewindable stator available with PE2+PA windings which allows the use of the motor in special applications and/or with variable frequency drive.
The rotor is mounted on self-centering thrust bearing unit of the Mitchell type capable of withstanding high axial loads.
Cooling and lubrication by means of a mixture of water and glycol.
Two or four pole versions, versions with direct or star-delta starting, supplied with 5-metre single-core cables directly connected to the winding and earthing cable.
The cable is certified ACS and WRAS.
Available only in three-phase version predisposed for installation of PT100 or PTC temperature sensor.
The motor is also available in AISI 316 stainless steel, TR6N model, or AISI 904 stainless steel, model TR6R.
Motors must be combined with an hydraulic part.

Flanging NEMA 6".
Protection class IP68.
Cooling flow speed 0,5 m/s.
Power supply tolerance + 6 % / -10 %.
Max. starts 15/h.
Max operating depth 300 m.
Maximum operating pressure 60 bar.
Horizontal operation 7,5 HP - 50 HP.

8" SUBMERSIBLE MOTORS

8" rewindable asynchronous submersible motor.
Designed for pressurization, lifting water from wells and water use in agricultural irrigation systems.
AISI 316 stainless steel jacket.
Rewindable stator available with PE2+PA windings which allows the use of the motor in special applications and/or with variable frequency drive.
The rotor is mounted on self-centering thrust bearing unit of the Mitchell type capable of withstanding high axial loads.
Cooling and lubrication by means of a mixture of water and glycol.
Two or four pole versions, versions with direct or star-delta starting, supplied with 5-metre single-core cables directly connected to the winding and earthing cable.
The cable is certified ACS and WRAS.
Available only in three-phase version predisposed for installation of PT100 or PTC temperature sensor.
The motor is also available in AISI 316 stainless steel, TR8N model, or AISI 904 stainless steel, model TR8R.
Motors must be combined with an hydraulic part.

Flanging NEMA 8".
Protection class IP68.
Cooling flow speed 0,5 m/s.
Power supply tolerance + 6 % / -10 %.
Max. starts 10/h.
Max operating depth 300 m.
Maximum operating pressure 60 bar.
Horizontal operation 30 HP - 125 HP.

10" SUBMERSIBLE MOTORS

10" rewindable asynchronous submersible motor.
Designed for pressurization, lifting water from wells and water use in agricultural irrigation systems.
AISI 316 stainless steel jacket.
Rewindable stator available with PE2+PA windings which allows the use of the motor in special applications and/or with variable frequency drive.
The rotor is mounted on self-centering thrust bearing unit of the Mitchell type capable of withstanding high axial loads.
Cooling and lubrication by means of a mixture of water and glycol.
Two or four pole versions, versions with direct or star-delta starting, supplied with 8-metre single-core cables directly connected to the winding and earthing cable.
The cable is certified ACS and WRAS.
Available only in three-phase version predisposed for installation of PT100 or PTC temperature sensor.
The motor is also available in AISI 316 stainless steel, TR10N model, or AISI 904 stainless steel, model TR10R.
Motors must be combined with an hydraulic part.

Flanging 10".
Protection class IP68.
Cooling flow speed 0,5 m/s.
Power supply tolerance + 6 % / -10 %.
Max. starts 8/h.
Max operating depth 300 m.
Maximum operating pressure 60 bar.
Horizontal operation 100 HP - 230 HP.

12" SUBMERSIBLE MOTORS

12" rewindable asynchronous submersible motor.
Designed for pressurization, lifting water from wells and water use in agricultural irrigation systems.
AISI 316 stainless steel jacket.
Rewindable stator available with PE2+PA windings which allows the use of the motor in special applications and/or with variable frequency drive.
The rotor is mounted on self-centering thrust bearing unit of the Mitchell type capable of withstanding high axial loads.
Cooling and lubrication by means of a mixture of water and glycol.
Two or four pole versions, versions with direct or star-delta starting, supplied with 8-metre single-core cables directly connected to the winding and earthing cable.
The cable is certified ACS and WRAS.
Available only in three-phase version predisposed for installation of PT100 or PTC temperature sensor.
The motor is also available in AISI 316 stainless steel, TR12N model, or AISI 904 stainless steel, model TR12R.
Motors must be combined with an hydraulic part.

Flanging 12".
Protection class IP68.
Cooling flow speed 0,5 m/s.
Power supply tolerance + 6 % / -10 %.
Max. starts 5/h.
Max operating depth 300 m.
Maximum operating pressure 60 bar.
Horizontal operation 180 HP - 260 HP.
Direction of rotation to be specified in the order; the standard version turns anti-clockwise.

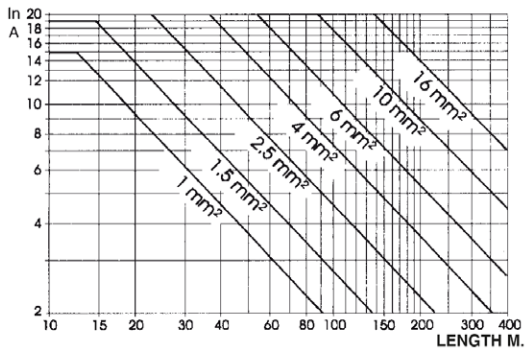
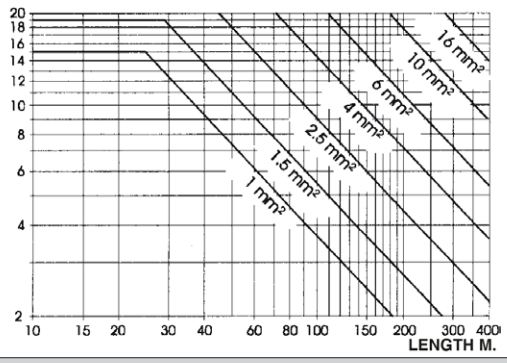
ACCESSORIES FOR SUBMERSIBLE PUMPS AND SUBMERSIBLE MOTORS

TABLES TO ESTABLISH POWER CABLE CROSS SECTION IN RELATION TO LENGTH



SINGLE-PHASE



THREE-PHASE

For a correct junction, use a cable with a section greater or equal to the motor cable section.
Size properly the section of the cable that has to be spliced, accordingly to the required length of the cable.

	DESCRIPTION	CODE
	**DCONNECT BOX 2** Thanks to DConnect Box 2 and the new App you can check the pump, set the starting and stopping parameters, view the details of alarms and monitor the status of the system directly on your smartphone. With the level sensor it is also possible to monitor the water level in the tank. The DConnect Box 2 allows you to access the DAB cloud service (only for DTron 3).	60196424
	**NFC WATER LEVEL MEASUREMENT** Only connected to the DConnect Box 2, controls the level of water in the tank and notifies the user of the level via an App (only for DTron 3).	60184570

AA

	DESCRIPTION	CODE
	**NFC FLOAT** Detects the level of water in a tank, preventing emptying of the latter and seizing of the pump avoiding the dry running, due to too low a level of water.	60184577
	**DOC68** The DOC68 permits installation of the DTron even outdoors as an IP68 certified surface pump.	60192274

ESC PLUS

Panel for protection and control of motor/single-phase/three-phase pump with direct start up.
Double set-up mode: automatic/manual
The motor/pump protection against dry running is assured by the major of the motor cos φ, (level probes not required)
Casing made of shock-proof and self-extinguishing thermoplastic material with two antipull plugs.
Main switch.
Power supply:
Single-phase 230 V +/- 5%
Three-phase 400 V +/-5%
Three-phase 230 V on request

Digital display with status indications.
Four models available for powers from 0.5 HP to 15 HP.
Protection degree IP54. Starting
Capacitor for single phase version (to be order separately).
Optoisolated auxiliary contact for control by probes, pressure switch and float switch.
ON-OFF switch.
Functional features:
Overload protection.
Phase failure protection (three-phase version).
Overvoltage protection.
Short circuit protection.
Protection against dry running.

CONTROL BOX 4”

Electric control panel for single phase bore-hole pumps featuring manually resettable overload cut-out, capacitor and terminal board for the electrical connections and possible connection of pressure switch/float. Complete with 1.5 metres of power cable with SCHUKO EEC 7 – VII – UNEL 47166-168 electric plug. Cabinet for wall mounting in a flame-proof, thermoplastic material.

4” CONTROL BOOSTER BOX

4” Control Booster Box
Control panel for increasing the starting torque of the single-phase electric pumps with capacities ranging from 0.37 to 3.7 kW single-phase containing the microdisgiuntore for overload protection with manual reset, the starting condenser and run condenser and terminal block for electrical connections.

Plug not included.
Degree of protection: IP 54.
Ambient operating temperature: -10 ° C + 40 ° C.
Wall mounting box in self-extinguishing thermoplastic material.

ES 1 M - ES 3 M

Electric control unit for protecting single-phase electric borehole pumps from running without water (see table). The panel is protected and protects the electric pump from overloading and short circuits with a manually resettable device.
Can work with 1, 2 or 3 probes depending on the use to which it is put.

Protection level: IP55.
Temperature application range: from –10°C to +40°C.
Supplied standard with an electric probe and wall bracket.
Cabinet for wall mounting in flame-proof, thermoplastic material.

COMMAND AND CONTROL SYSTEM - ES

Electrical panels for protection and automatic control using float/s for bore-hole three phase electric pumps, installed singularly.
Available for direct and star-delta starting.
Cabinet for wall mounting in flame-proof, thermoplastic material.
The panel is self-protected and protects the electric pump from overloading and short circuits, power failure with a manually resettable device.
Supplied complete with:
- Power line switch with pad lockable door handle;
- Self-protected transformer for 24V powering of external commands;
- Terminals for connecting electric pump/s and min. and max. control float/s;
- Probes module for the running without water control;
- Terminals for connecting a remote acoustic or luminous alarm (without potential);
- Switch on the front of the panel for man - 0 - out operation of the electric pump;
- Operating temperature range: -10°C +40°C;
- Level of protection: IP55;
- The panels are built to EN 60204-1 and EN 60439-1;
- Supplied with standard electric probe.

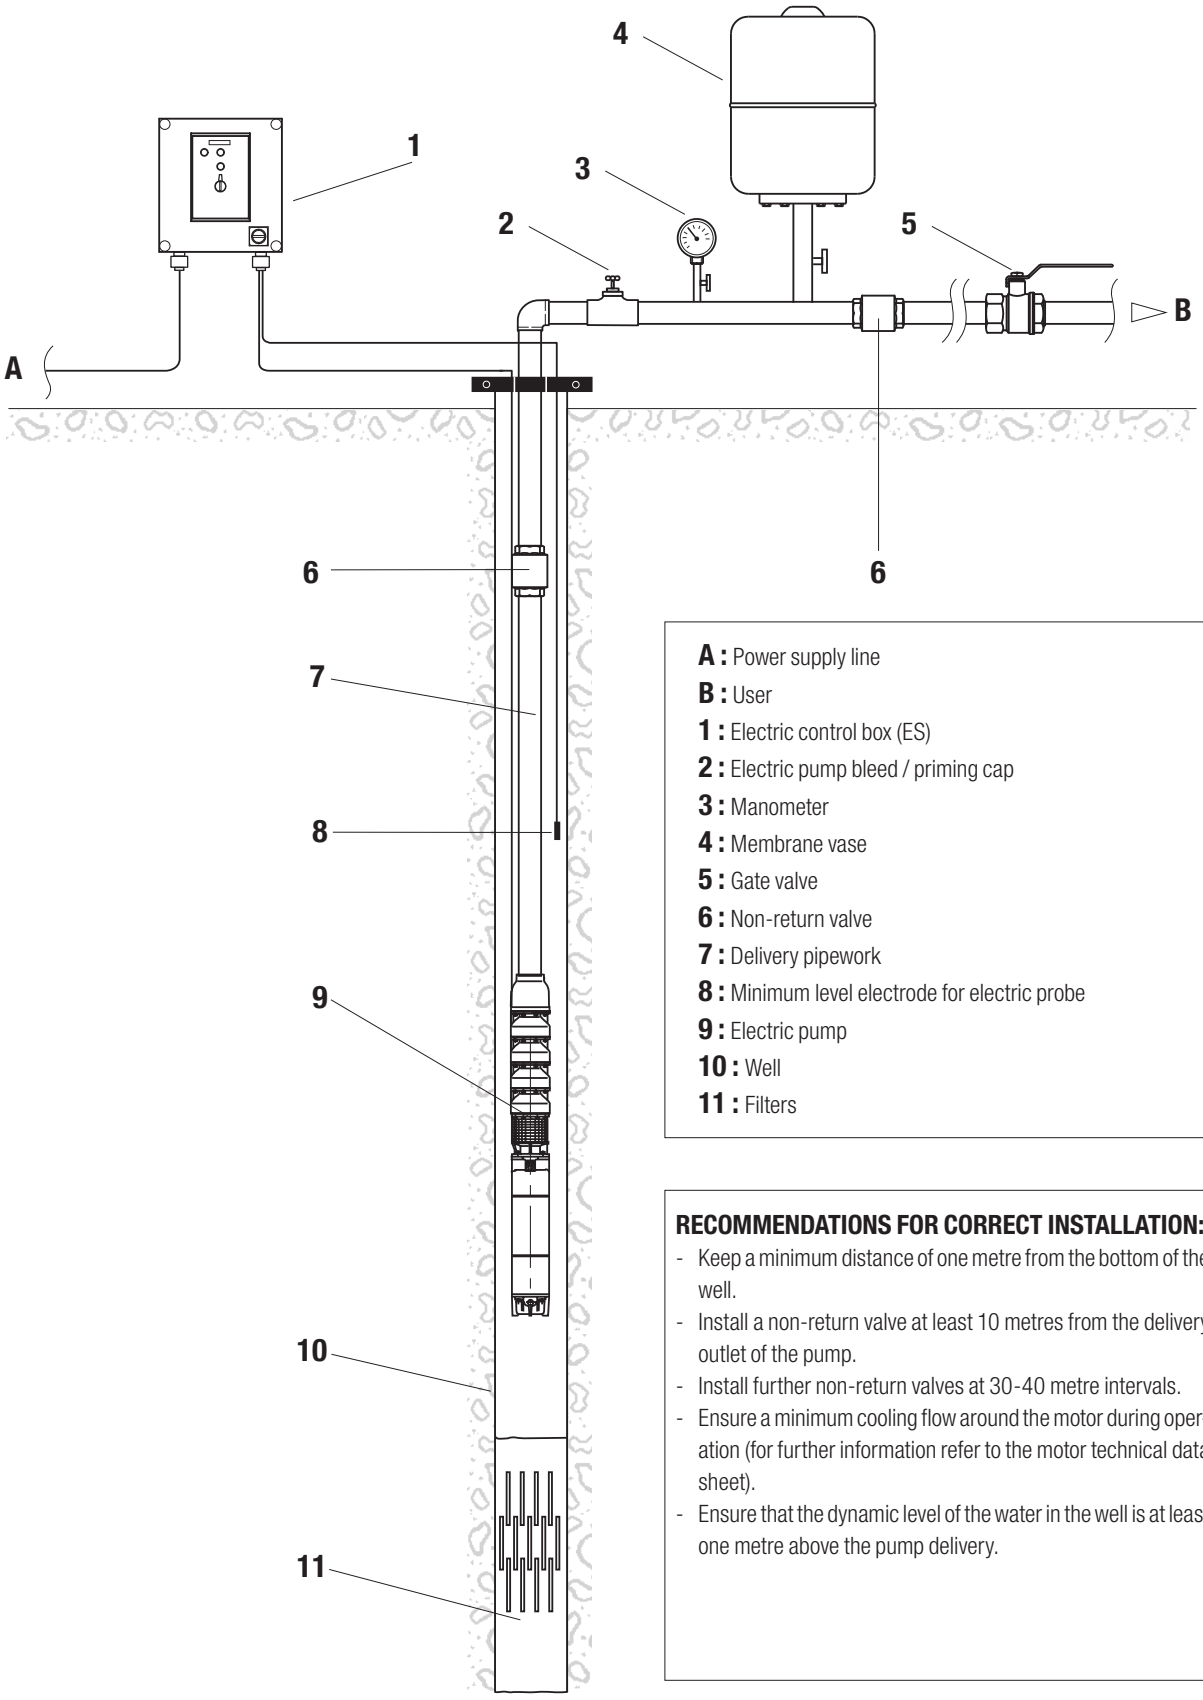
TECHNICAL APPENDIX

EXAMPLE OF INSTALLATION OF A SUBMERSIBLE ELECTRIC PUMP

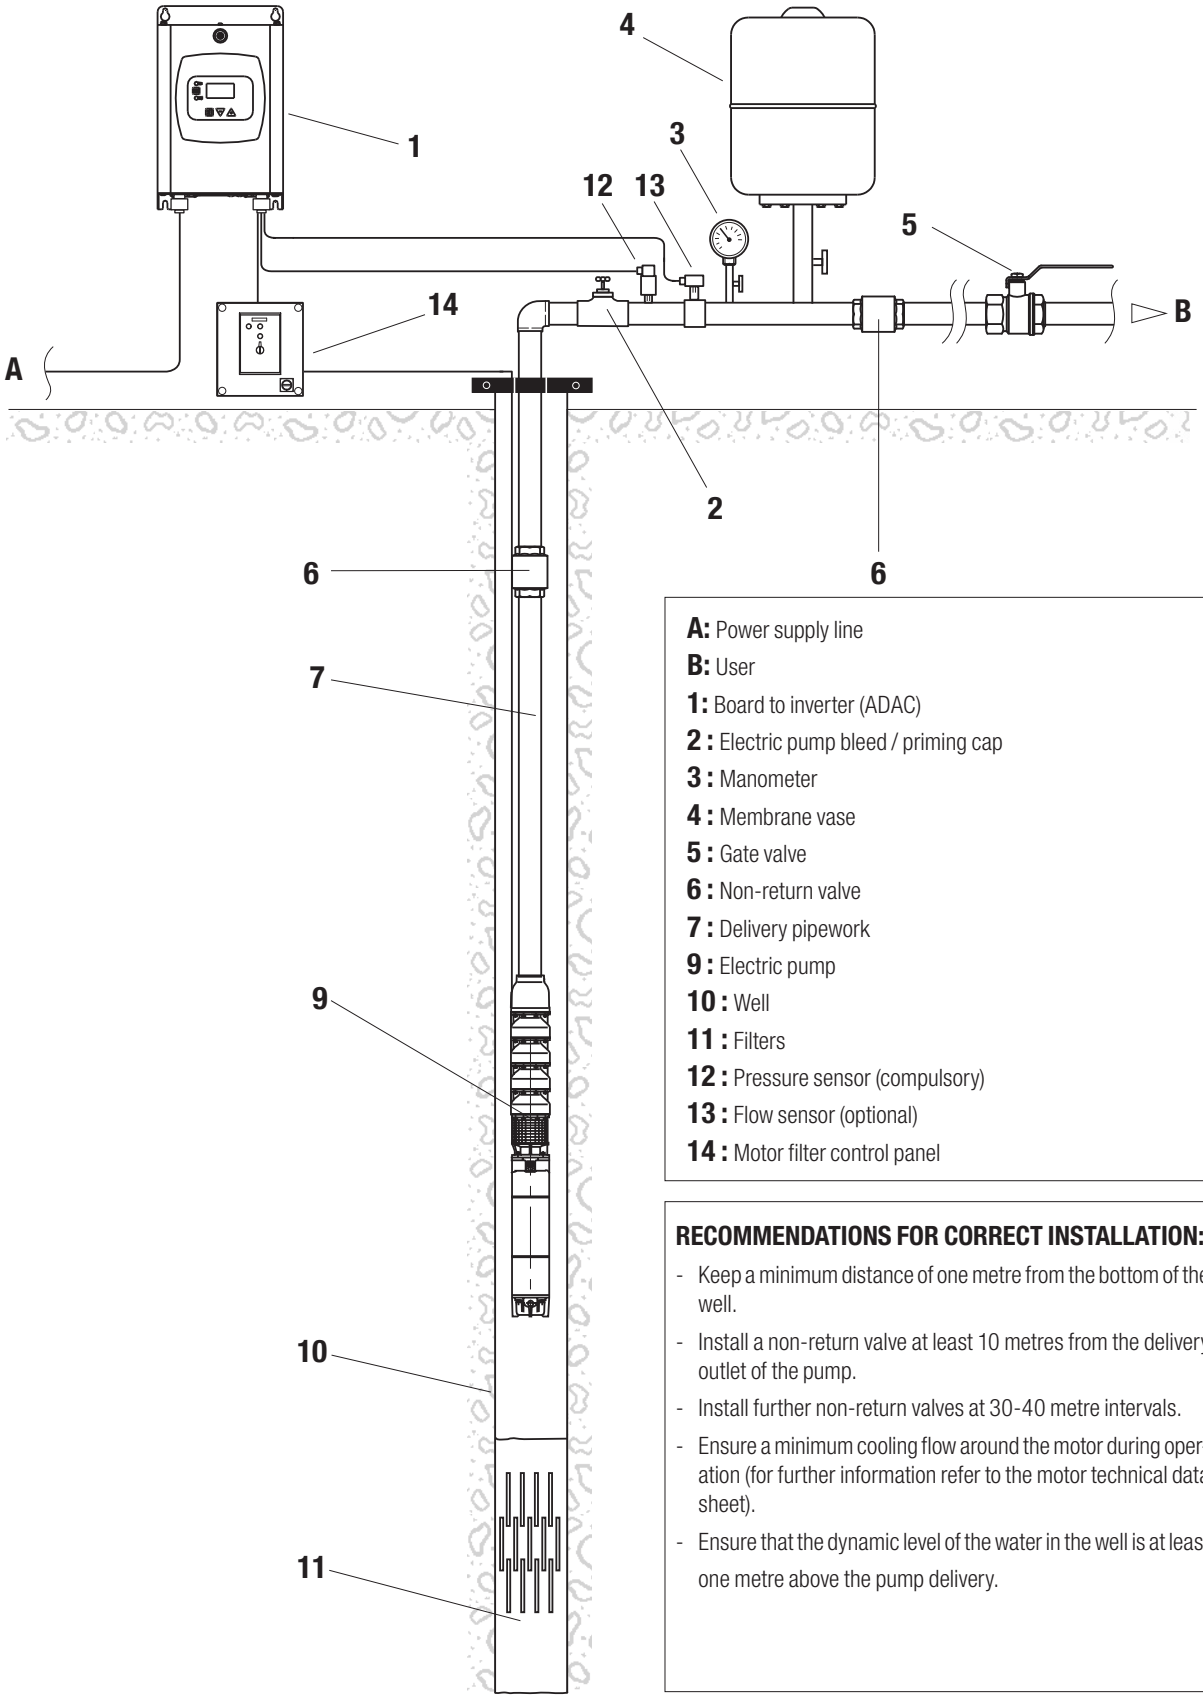


A : Power supply line
B : User
1 : Electric control box (ES)
2 : Electric pump bleed / priming cap
3 : Manometer
4 : Membrane vase
5 : Gate valve
6 : Non-return valve
7 : Delivery pipework
8 : Minimum level electrode for electric probe
9 : Electric pump
10 : Well
11 : Filters

RECOMMENDATIONS FOR CORRECT INSTALLATION:

- Keep a minimum distance of one metre from the bottom of the well.
- Install a non-return valve at least 10 metres from the delivery outlet of the pump.
- Install further non-return valves at 30-40 metre intervals.
- Ensure a minimum cooling flow around the motor during operation (for further information refer to the motor technical data sheet).
- Ensure that the dynamic level of the water in the well is at least one metre above the pump delivery.

EXAMPLE OF INSTALLATION OF A SUBMERSIBLE ELECTRIC PUMP CONTROLLED BY INVERTER



A: Power supply line
B: User
1: Board to inverter (ADAC)
2 : Electric pump bleed / priming cap
3 : Manometer
4 : Membrane vase
5 : Gate valve
6 : Non-return valve
7 : Delivery pipework
9 : Electric pump
10 : Well
11 : Filters
12 : Pressure sensor (compulsory)
13 : Flow sensor (optional)
14 : Motor filter control panel

RECOMMENDATIONS FOR CORRECT INSTALLATION:

- Keep a minimum distance of one metre from the bottom of the well.
- Install a non-return valve at least 10 metres from the delivery outlet of the pump.
- Install further non-return valves at 30-40 metre intervals.
- Ensure a minimum cooling flow around the motor during operation (for further information refer to the motor technical data sheet).
- Ensure that the dynamic level of the water in the well is at least one metre above the pump delivery.

COOLING LINERS FOR 4" SUBMERSIBLE PUMP

Kit of cooling liners of different lengths, used to ensure perfect cooling of the 4" motor in case of installation inside tanks or containers, or in any location where a minimum cooling flow on the motor cannot be guaranteed.
The length of the pipe must be selected based on the type of motor and its power, as indicated in the following table.

<table>

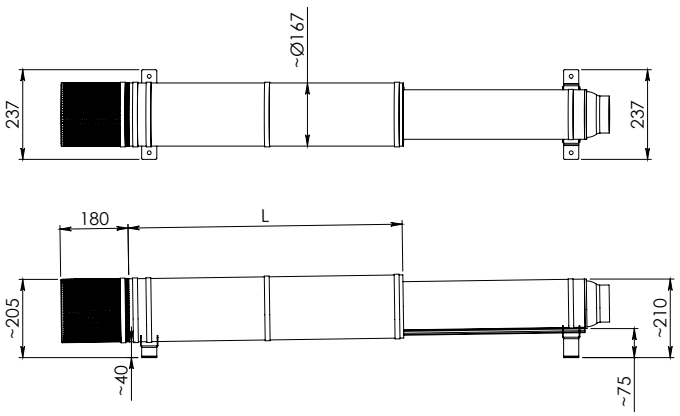
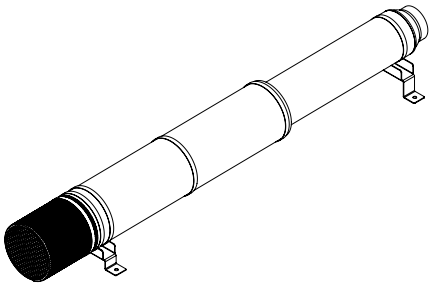
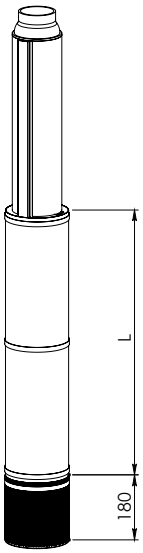
COOLING LINERS FOR 6" SUBMERSIBLE PUMP

Kit of cooling liners of different lengths, used to ensure perfect cooling of the 6" motor in case of installation inside tanks or containers, or in any location where a minimum cooling flow on the motor cannot be guaranteed.
The length of the pipe must be selected based on the type of motor and its power, as indicated in the following table.
SUITABLE FOR USE ON S6, SR6 E SM6 ELECTRIC PUMPS COUPLED WITH 6" MOTOR.

POWER SUPPLY 50 Hz	MOTOR POWER		MOTOR TYPE	
	HP	kW	6GF-6GX	TR6
THREE-PHASE	5,5	4	725 PIPE KIT	
	7,5	5,5		960 PIPE KIT
	10	7,5		
	12,5	9,3		
	15	11	960 PIPE KIT	
	17,5	13		1220 PIPE KIT
	20	15		
	25	18,5		
	30	22		
	35	26	1220 PIPE KIT	
	40	30		1490 PIPE KIT
	50	37		







in order to determine the cooling flow speed v [m/s] along the motor liner, the following formula can be used:

$$v = \frac{\frac{Q}{2}}{\pi \cdot (\frac{D^2}{4} - \frac{d^2}{4})}$$

On the other hand, in order to determine the correct diameter of the cooling liner, to ensure that the minimum required cooling flow condition is met at a certain pump flow level, the following formula can be used:

$$D = \sqrt{4 \cdot (\frac{Q}{v \cdot \pi} + \frac{d^2}{4})}$$

Q [m^3/s] = flow at the point of operation of the electric pump.
D [m] = well diameter.
d [m] = motor diameter.
v [m/s] = cooling flow speed.

NOTES

INDEX - PRESSURE UNITS

1/2/3 KVC AD

VARIABLE SPEED PRESSURISATION UNITS WITH ACTIVE DRIVER PLUS

1-2-3 KVC A.D. are **variable speed** pressurisation units with 1, 2 or 3 vertical axis multistage centrifugal pumps particularly suited for domestic use, and small civil or industrial systems. Thanks to the use of the Active Driver Plus inverter, they offer performance features capable of automatically adapting to the different needs of the systems to meet the **constant pressure** requirements of modern system engineering solutions. The constant pressure adjustment is a requirement in the most varied sectors:
Water pipelines, Irrigation, Industry, Hotel, Residential building, Spas.
Their main features are reliability, simple operation, and minimum maintenance requirements.

Construction features – main components:
- 1 to 3 KVC vertical axis multistage electric pumps (up to 4 pumps on request)
- Galvanized sheet steel base, complete with 4 anti-vibration rubber feet
- Suction and delivery manifolds in stainless steel
- 1 to 3 Active Driver Plus inverters on the delivery port of each pump
- 1 8-litre expansion vessel for each unit (for version 85/120 of 18 litres)
- 1 protection unit for units with 2 and 3 pumps

Operating range from 0.5 to 36 m³/h.

Pumped liquid clean, free of solids and abrasives, not viscous, not aggressive, not crystallised and chemically neutral, with properties similar to water.

Liquid temperature range
From 0 °C to +40 °C.

Maximum ambient temperature +40°C.

Maximum operating pressure PN12 (12 bar).

Protection class IP44.

Special executions on request up to 4 pumps and voltages and frequencies not on the price list available on request.

Up to 4 pumps on request

All the domestic units with Active Driver Plus have 1 8-litre expansion vessel and delivery and suction manifolds in AISI 304 stainless steel.

(1) Available on request 3x400 V Three-phase version without neutral wire.
The unit is supplied assembled and tested in a sturdy cardboard packaging on wooden pallet and with instruction leaflet with electric diagram.

2 JET AD / 2 EURO AD / 2 EUROINOX AD

VARIABLE SPEED PRESSURISATION UNITS WITH ACTIVE DRIVER PLUS

2JET A.D. – 2EURO A.D. – 2EUROINOX A.D. are **variable speed** pressurisation units with 2 horizontal axis centrifugal pumps particularly suited for domestic use, and small civil or industrial systems. Thanks to the use of the Active Driver Plus inverter, they offer performance features capable of automatically adapting to the different needs of the systems to meet the constant pressure requirements of modern system engineering solutions. The **constant pressure** adjustment is a requirement in the most varied sectors:
Water pipelines, Irrigation, Industry, Hotel, Residential building, Spas.
Their main features are reliability, simple operation, and minimum maintenance requirements.

Construction features – main components:
- **2 JET A.D.** has 2 JET self-priming horizontal axis pumps with cast iron pump body
- **2 EURO A.D.** has 2 EURO self-priming horizontal axis pumps with cast iron pump body
- **2 EUROINOX A.D.** has 2 EUROINOX self-priming horizontal axis multistage pumps with stainless steel pump body
- Tropicalized sheet steel base, complete with 4 anti-vibration rubber feet
- Suction and delivery manifolds in galvanized steel (in stainless steel for 2EUROINOX A.D.)
- 2 Active Driver Plus inverters on the delivery port of each pump
- 1 8-litre expansion vessel for each unit
- 1 protection control unit

Operating range from 0.4 to 15 m^3/h.

Pumped liquid clean, free of solids and abrasives, not viscous, not aggressive, not crystallised and chemically neutral, with properties similar to water.

Liquid temperature range
From 0 °C to +40 °C.

Maximum ambient temperature +40°C.

Maximum operating pressure PN10 (10 bar).

Protection class IP44.

Special executions on request
Voltages and/or frequencies not on the price list.

Including 1 8-litre expansion vessel

1-2-3 KVE ADAC

VARIABLE SPEED PRESSURISATION UNITS WITH ADAC

1-2-3 KVE ADAC are variable speed pressurisation units with 1, 2 or 3 vertical axis multistage centrifugal pumps particularly suited for domestic use, and small civil, agricultural, or industrial systems for **applications with hot water up to 90°C**. The use of vertical axis multistage centrifugal electric pumps ensures high performance results. Their main features are limited space requirements, sturdiness and absolute reliability. Thanks to the use of the ADAC inverter, they offer performance features capable of automatically adapting to the different needs of the systems to meet the constant pressure requirements of modern system engineering solutions.

Construction features – main components:
- 1 to 3 KV vertical axis multistage electric pumps
- Galvanized sheet steel base, complete with 4 anti-vibration rubber feet
- Suction and delivery manifolds in galvanized steel with caps
- Delivery and suction on-off ball valves
- Check valves on the suction ports of each pump
- 1 8-litre expansion vessel for each unit
- 1 protection control unit
- 1 to 3 ADAC inverters on the pump

Operating range from 0.5 to 42 m^3/h.

Pumped liquid clean, free of solids and abrasives, not viscous, not aggressive, not crystallised and chemically neutral, with properties similar to water.

Liquid temperature range
From 0 °C to +90 °C.

Maximum ambient temperature +40°C.

Maximum operating pressure PN16 (16 bar).

Protection class IP44.

Special executions on request
Voltages and/or frequencies not on the price list.

Including 1 8-litre expansion vessel

The unit is supplied assembled and tested in a sturdy cardboard packaging on wooden pallet and with instruction leaflet with electric diagram.

2/3 KVCXE MCE/P DCONNECT

VARIABLE SPEED BOOSTER SET WITH MCE-P VARIABLE FREQUENCY DRIVE AND DCONNECT

Booster set with 2 or 3 KVCX pumps with one MCE-P variable frequency drive for pump installed as standard. The booster set is designed to increase pressure in commercial building service and for activities in agriculture and irrigation. Limited size thanks to the use of vertical pumps. There is one expansion tank per group. Base in galvanized sheet metal with anti-vibration rubber feet. Inlet and outlet manifolds in galvanized steel. Suction check valves for each pump. Possibility of remote control thanks to the DConnect service.
DConnect Box (installed in a IP 65 panel) included as standard. The cloud service is manageable from the internetofpumps.com website or from the DConnect App (for Android or iOS) it is possible to control installations even remotely and receive alarms in real time through an extremely functional and clear user interface.

Operating range from 0,5 to 36 m^3/h with head of up to 112 m.

Pumped liquid Clean, free of solids and abrasives, not viscous, not aggressive, not crystallised and chemically neutral.

Liquid temperature range from 0°C to +40°C.

Maximum ambient temperature +40°C.

Maximum operating pressure 12 bar / 1200 kPa.

Protection class IP55.

Special executions on request different voltages or frequencies, units with up to four pumps.

VARIABLE SPEED PRESSURISATION UNITS WITH MCE

DAB's new NKVE units with pumps are variable speed pressurisation units for the recirculation of water for pressurisation in civil and commercial environments and irrigation systems also for agriculture.
The NKVE units have 1, 2, 3 or 4 NKV multi-impeller pumps with MCE-P inverter installed as standard.
For all the models with NKV 10, 15, 20 S, the parts in contact with the liquid are made of AISI 304 stainless steel. The models with NKV 32, 45 have the pump body and upper flange in cataphoretic paint coated cast iron, and the impellers, diffusers and pump liner in AISI 304 stainless steel.
The MCE-P inverter installed on the pump permits constant pressure. There is a protection controller for each unit. Delivery check valve, pressure transmitter and expansion vessel for each pump. Suction and delivery manifolds in AISI 304 stainless steel.
Version X on request with materials in contact with the water made in AISI 316 stainless steel.
The units are provided already assembled, set up and tested directly at the factory, and with the installation and maintenance instructions and test report.
Pumps coupled by rigid coupling to IE3 high energy efficiency electric motors.

Operating range from 0.5 a 280 m^3/h with head of up to 140 metres.

Pumped liquid Clean, free of solids and abrasives, not viscous, not aggressive, not crystallised and chemically neutral.

Liquid temperature range from 0°C to +120°C (80°C with expansion vessel installed).

Maximum ambient temperature +50°C.

Maximum operating pressure 16 bar / 1600 kPa.

Protection class IP55.

Special executions on request Yes, different voltages or frequencies or support for certain liquids, units with up to six pumps, **version X with material in contact with water in AISI 316.**

The units are provided already assembled, set up and tested directly at the factory, and with the installation and maintenance instructions and test report.

The units comprise 1 x 18-litre expansion vessel for each pump and delivery and suction manifolds in AISI 304 stainless steel

IE3 ≥ 0,75 kW

2/3 NKVE 10 - 15 - 20 - 32 - 45 MCE/P DCONNECT

VARIABLE SPEED BOOSTER SET WITH MCE-P VARIABLE FREQUENCY DRIVE AND DCONNECT

New variable speed booster sets with MCE-P variable frequency drive for pressurization in commercial building service and for irrigation in agriculture. Booster sets with 2 or 3 NKV multi-impeller pumps. The models with NKV 10, 15, 20 S have the parts in contact with the liquid in AISI 304 stainless steel. Models with NKV 32, 45 have the pump body and upper flange in cataphorised cast iron, impellers, diffusers and pump jacket in AISI 304 stainless steel. The MCE-P variable frequency drive is installed on the pump and allows constant pressure. There is a protection switchboard per group. One check valve, one pressure transmitter and one expansion tank for each pump. Steel inlet and outlet manifolds in stainless steel AISI 304. On request it is available the X version with materials in contact with water in AISI 316 stainless steel. The booster sets are supplied assembled, set up and tested directly at the factory and complete with installation, maintenance instructions and test report. Pumps coupled by rigid coupling to a high energy efficiency electric motors (IE3).

DConnect Box (installed in a IP 65 panel) included as standard. The cloud service is manageable from the internetofpumps.com website or from the DConnect App (for Android or iOS) it is possible to control installations even remotely and receive alarms in real time through an extremely functional and clear user interface.

Operating range up to 280 m^3/h with head of up to 102 metres.

Pumped liquid Clean, free of solids and abrasives, not viscous, not aggressive, not crystallised and chemically neutral.

Liquid temperature range from 0°C to +120°C (80°C with expansion vessel installed).

Maximum ambient temperature +50°C.

Maximum operating pressure 16 bar / 1600 kPa.

Protection class IP55.

Special executions on request Yes, different voltages or frequencies or support for certain liquids, units with up to six pumps, **version X with material in contact with water in AISI 316.**

The units are provided already assembled, set up and tested directly at the factory, and with the installation and maintenance instructions and test report.

The units comprise 1 x 18-litre expansion vessel for each pump and delivery and suction manifolds in AISI 304 stainless steel

IE3 ≥ 0,75 kW

AQUATWIN TOP

PRESSURIZATION GROUP FOR RAINWATER RECOVERY SYSTEM

Pressurization group for systems management and reuse of rainwater with 2 centrifugal pumps type EUROINOX or JETINOX. Complete with water reserve tank up to 150L implemented in the system. For medium to large systems.

CONTROL PANEL

Automatic inverter for exchanging the order of pump starting at each start. General breaker switch. PLC for the management and monitoring of reserve water supplies. Low voltage auxiliary circuit complete with transformer, protection fuses and a three-way electric valves for switching rainwater tanks - public water network.

AQUATWIN comes with a black, cataphorised steel structure, tank capacity up to 150L public network water accumulation, stainless steel storage delivery manifold with shut-off valve, expansion tank up to 8L. Including "Air gap", connection system to public water network according to UNI EN 1717: Protection against pollution of potable water in installations and requirements of devices to prevent pollution from backflow.

Line voltage 230 V single phase.
Voltage of electric pump 230 V single phase.
Power frequency 50 Hz.
Installation vertical only.
Pumped liquid temperature range From 0 °C to +40 °C.
Maximum ambient temperature 40 °C.
Max pressure 5,5bar.
Pumped liquid clean, free from solids.
Pressure regulation range 3 to 5 bar.
Suction diameter (DNA) 1".
Delivery diameter (DNM) 1"1/2.
Protection class IP44.

1/2/3 KVC

SET WITH 1-2-3 VERTICAL MULTISTAGE CENTRIFUGAL PUMPS

1-2-3 KVC are fixed speed pressurisation units with 1, 2 or 3 vertical axis multistage centrifugal pumps particularly suited for domestic use, and small civil or industrial systems. The use of the electric panel (units with 2 and 3 pumps) guarantees automatic switching of the pumps, control at the main switch and protection of the electric pumps with thermal magnetic circuit breakers. EBox panel with display for the 2KVC units.
Their main features are reliability, simple operation, and minimum maintenance requirements.

Construction features – main components:
1 to 3 KVC vertical axis multistage electric pumps.
Tropicalized sheet steel base, complete with 4 anti-vibration rubber feet.
Suction and delivery manifolds in stainless steel.
Control:
-1KVC --> the single-phase version has a 2-pole pressure switch with power input plug; while the three-phase version has a remote motor protector control panel with reset button.
- 2KVC --> with EBox D panel with display.
- 3KVC --> with E3G panel with pressure switches.

Operating range from 1 to 36 m³/h.

Pumped liquid Clean, free of solids and abrasives, not viscous, not crystallised and chemically neutral, with properties similar to water.

Liquid temperature range
From 0 °C to +40 °C.

Maximum ambient temperature +40°C.

Maximum operating pressure PN12 (12bar).

Special executions on request
Contact our sales network.

Protection class IP55.

The units comprise 1 x 18-litre expansion vessel for each pump and delivery and suction manifolds in AISI 304 stainless steel

IE3 ≥ 0,75 kW

The units are supplied with tanks and air feeder connection.

1/2/3 KV 3- 6 -10

SETS WITH 1-2-3 VERTICAL MULTISTAGE PUMPS

1-2-3 KV are **fixed speed** pressurisation units with 1, 2 or 3 vertical axis multistage centrifugal pumps particularly suited for domestic use, and small civil, agricultural, or industrial systems for **applications with hot water up to 90°C**. The use of the electric panel (units with 2 and 3 pumps) guarantees automatic switching of the pumps, control at the main switch and protection of the electric pumps with thermal magnetic circuit breakers.
The main features of the EBox panel with display for 2KV units are limited space requirements, sturdiness and absolute reliability.

Construction features – main components:
1 to 3 KV vertical axis multistage electric pumps.
Tropicalized sheet steel base, complete with 4 anti-vibration rubber feet.
Suction and delivery manifolds in galvanized steel
Control:
-1KVC --> the single-phase version has a 2-pole pressure switch with power input plug; while the three-phase version has a remote motor protector control panel with reset button.
-2KVC --> with EBox D panel with display.
-3KVC --> with E3G panel with pressure switches.

Operating range from 0.5 to 40 m3/h.

Pumped liquid Clean, free of solids and abrasives, not viscous, not crystallised and chemically neutral, with properties similar to water.

Liquid temperature range
From -15 °C to +90 °C.

Maximum ambient temperature +40°C.

Maximum operating pressure PN16 (16bar).

Special executions on request
Contact our sales network.

Protection class IP55.

Including 1 18-litre expansion vessel for each pump

IE3 ≥ 0,75 kW

1/2/3/4 NKV

FIXED SPEED PRESSURISATION UNITS

1-2-3-4 NKVE MCE are **variable speed** pressurisation units with 1, 2, 3 or 4 NKV vertical axis multistage centrifugal pumps in stainless steel, suitable for water systems of medium and large users. The use of vertical axis multistage centrifugal electric pumps ensures high performance results. **All the parts in contact with the liquid are rust-proof.**

Construction features – main components:
- 1 to 4 NKV vertical axis multistage electric pumps in stainless steel;
- Suction and delivery manifolds in AISI 304 stainless steel;
- Delivery and suction on-off valves for each pump;
- Check valves on the delivery ports of each pump;
- 1 electric control panel with direct start up to 7.5 kW included, star-triangle start for higher voltages. AUT-0-MAN operation selectors and operation notification lamps on the front of the panel;
- 1 18-litre expansion vessel for each pump;
- 1 pressure transmitter for each pump.

The units are provided already assembled, set up and tested directly at the factory, and with the installation and maintenance instructions and test report.

Operating range from 0.5 to 280 m³/h.
Pumped liquid clean, free of solids and abrasives, not viscous, not aggressive, not crystallised and chemically neutral, with properties similar to water..
Liquid temperature range from 0°C to +120°C (80°C with expansion vessel installed).
Maximum ambient temperature +50°C.
Maximum operating pressure
PN16 (up to PN25 on request).
Protection class IP55.
(IP55 motors on request).
Special executions on request
Voltages and/or frequencies not on the price list.
Version "X", components in contact with the water made in AISI 316 stainless steel.

The units comprise 1 x 18-litre expansion vessel for each pump and delivery and suction manifolds in AISI 304 stainless steel

IE3 ≥ 0,75 kW

2 NKV 10/15/20 WITH EBOX

PRESSURIZATION GROUPS WITH 2 MULTISTAGE CENTRIFUGAL PUMPS WITH A VERTICAL AXIS

Construction features - Groups with 2 pumps
- Groups consisting of N. 2 main electric pumps centrifugal multistage on a vertical axis NKV.
- Impellers in stainless steel AISI 304, all parts in contact with liquid are stainless.
- Three phase asynchronous motor, motor-pump by means of a rigid coupling.
- Pumps mounted on a single base in galvanized steel.

HYDRAULIC GROUP
Intake Manifold Inox, Stainless steel manifold, pressure transducer, electrical control panel, n. 2 expansion tanks, each suction pump with inlet shutoff valves, each pump with outlet shutoff and check valves.

ELECTRICAL CONTROL PANEL
E-box IP 54 switchboard mounted on the crankcase pumps. Direct start up to 5.5 kw including, front panel switches for AUT-0-MAN operation, warning lights.

Line voltage 400V three phase.
Voltage of electric pump 400V three phase.
Power frequency 50-60 Hz.
Installation vertical only.
Operating range from 4 to 280 m^3/h.
Pumped liquid temperature range
From 0°C to +120°C
(80°C with expansion vessel installed).
Maximum ambient temperature 50°C.
Max pressure 16 bar.
Pumped liquid clean, free of solids.
Pressure control range from 3 to 14 bar.
Protection class IP55.

The units comprise 1 x 18-litre expansion vessel for each pump and delivery and suction manifolds in AISI 304 stainless steel

IE3 ≥ 0,75 kW

1/2/3 NKP-G / K

SETS WITH CENTRIFUGAL PUMPS K - NKP-G

Water lifting sets suitable for civilian installation, condominium, hotels, tourist facilities and industrial uses.
Lifting units equipped with 1-2-3 centrifugal pumps K series (twin impeller) and NKP / NKP-G series All lifting are complete with galvanised steel base, suction and delivery manifold (for units with one pump only delivery manifold), one stop valve on suction side for each pump and stop valve and not return valve on delivery side for each pump.
1 - 2 or 3 20 liters membrane tanks; pressure transmitter (pressure switch for 2-3 K 55/200) and pressure gauge on delivery manifold.
Electrical panel: IP 55, direct starting for single motors inputs up to 7,5 kW (included) and star-delta starting for single motors from 9,2 kW.

- Weekly test included as standard for all units.
- Available, where indicated, also with the relative pilot pump KVCX series.
- The units is supplied assembled, tested, in a strong cardboard box with wooden pallet and instructions sheet with electrical diagram.

Weekly test included

Line voltage 400V three phase.
Voltage of electric pump 400V three phase.
Power frequency 50-60 Hz.
Installation vertical only.
Operating range from 4 to 720 m^3/h.
Pumped liquid temperature range
From -15 °C to + 70 °C
(max 40 °C for the version with jockey pump).
Maximum ambient temperature 40°C.
Max pressure 10 bar.
Pumped liquid clean, free of solids.
Protection class IP55.

IE3 ≥ 0,75 kW

1 KDN COMPACT

FIRE -FIGHTING BOOSTER SETS UNI EN 12845 WITH ELECTRIC PUMP AND DIESEL PUMP

Diesel and electric motor fire-fighting sets, ideal for automatic sprinkler systems and/or hydrants of commercial buildings. Designed to be coupled with each other, in order to obtain all the versions and meet all the requirements of the EN 12845 and UNI 10779 standards.

The pump is coupled, by means of a spacer elastic coupling, to an electric motor or Diesel engine capable of providing the power absorbed by the pump at any pump load condition, from no-load, to a load corresponding to NPSH16m (as requested by section 10.1 of the UNI EN 12845 standard).

Modular design:
The UNI EN 12845 DAB fire-fighting sets are supplied in modular version. This setup facilitates transport, and the installation of DAB fire-fighting pump sets in pump rooms, even with narrow access doors.
Thanks to a coupling kit (supplied as accessory), it is possible to obtain all the compositions contemplated by the standard (one, two, or three electric or Diesel pumps, with or without jockey pump).

Operating range from 10 to 650 m^3/h.

Pumped liquid clean, free of solids and abrasives, not viscous, not aggressive, not crystallised and chemically neutral, with properties similar to water..

Liquid temperature range
From 0 to 70°C.

Maximum ambient temperature
+ 40°C.

Maximum operating pressure
16 bar (1600kPa) PN16.

Special executions on request
Diesel version with water/water heat exchanger, 230 three-phase 50 or 60 Hz electric versions, bronze impeller.

UNI EN 12845

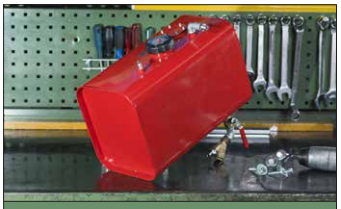
ISTITUTO GIORDANO Qualità al Plurale

ACCESSORIES PAGE 415

FEATURES

COLLECTION RESERVOIR

Reservoir for the collection of any fuel leaking out of the diesel tank, included up to 11kW pursuant to standard UNI 11292.



TANK

All the engine-drive pumps have a fuel pump sized to ensure 6 hours of operation, as required for the highest hazard classes pursuant to standard EN 12845 - 10.9.6.

CLAPET VALVE

An inspectionable check valve is mounted on the delivery port of each main pump to facilitate maintenance.

FRAME

Compact steel frame painted RAL 3000 red to support the pump, with anti-vibration devices to dampen the vibrations transmitted to the system.

CONTROL PANELS

All the fire-fighting sets have an electric control panel pursuant to EN 12845 /UNI 10779 for each main pump and an electric control panel for the jockey pump, already connected to the main components (motor, pressure switches, sensor, batteries, etc..).

MOTORS

The motors of all the main pumps are sized in accordance with standard EN 12845 - 10.1 to supply the power absorbed by the pump under any load conditions up to an NPSH value of 16 m.c.w.

ALARM REMOTE CONTROL UNIT

Alarm notification and remote control unit suitable for sets with 1 to 3 pumps. The GSM module accessory makes it possible to receive notification text messages in real time on the status of the pumping system.

HIGH QUALITY

Fire-fighting sets designed and manufactured with components that guarantee a high standard of quality.

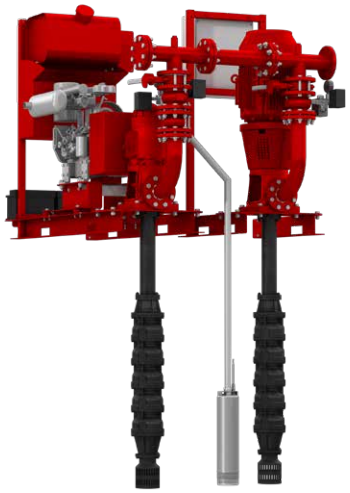
Available on request Diesel Fire-fighting Booster Sets with heat exchanger for diesel motor starting from the power P2=37 kW

1 KVT

DIESEL AND ELECTRIC EN 12845 FIRE-FIGHTING SETS WITH VERTICAL TURBINE PUMPS

DIESEL MODULE ELECTRIC MODULE



The new 1KVT fire-fighting pump sets with diesel engine or electric motor assembly, ideal for automatic sprinkler systems and/or hydrants of commercial buildings, are manufactured using vertical turbine pumps, in accordance with article 10.6.1 of UNI EN 12845 standards.

Simple Maintenance:
Thanks to the submersible pump body and the motor assembly control above the surface, they eliminate any self-priming issues, in addition to making the job of the maintenance technician much easier.

Modular design:
DAB pressurisation sets are designed to be coupled with each other, in order to obtain all the versions and meet all the requirements of the UNI EN 12845 standard.

Available set models:
- 1 KVT ..... EN
Consisting of an axial flow submersible pump (vertical turbine pump) with electric motor, including submersible pump, cork plug, control head installed on appropriate base, electric control panel.
- 1 KVT ..... MD EN
Consisting of an axial flow submersible pump (vertical turbine pump) with air-cooled diesel engine or with radiator (with exchanger on request), including submersible pump, cork plug, control head installed on appropriate base, electric control panel, diesel tank ensuring 6 hours of operation, and with fuel collection tank for powers up to 26 kW.

Operating range from 4 to 300 m^3/h.

Pumped liquid clean, free of solids and abrasives, not viscous, not aggressive, not crystallised and chemically neutral, with properties similar to water..

Liquid temperature range
From 0 to 40°C.

Maximum ambient temperature
+ 40°C.

Maximum operating pressure
16 bar (1600kPa) PN16.

Special executions on request
Diesel version with water/water heat exchanger, 230 three-phase 50 or 60 Hz electric versions, non standard performance.

UNI EN 12845

ACCESSORIES PAGE 415

FEATURES

VERTICAL TURBINE PUMP

Vertical turbine pumps offer the great advantage of flooded suction installation even with an underground tank (UNI EN 12845 – 10.6.1). Vertical turbine pumps have a cataphoresis paint coating and cork plug, and can be coupled with an electric motor or diesel engine through a control head installed on an appropriate base.

COUPLING KIT

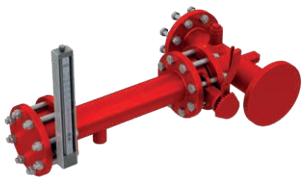
In order to obtain all the versions contemplated by the standard (2-3 pump sets), DAB supplies as accessory a coupling kit, to be fitted between the delivery manifolds of the individual sets.

TANK

Each diesel engine driven pump has a diesel tank that guarantees 6 hours of operation. For engine powers up to 26 kW, a collection tank is also included (in compliance with UNI 11292), for the containment of any fuel spillages.

ANTI-VORTEX PLATE

Vertical turbine pumps can be equipped with anti-vortex plates to decrease the speed on the suction side (UNI EN 12845 – 9.3.5), in order to make the most of the volume of the storage tank.



FLOW METER

The measuring kit with flow meter must be installed on a branch on the delivery manifold of the set. It is used to check the performance of the main pumps.

AXIAL LINE

The axial line is a flanged pipe treated with black cataphoresis paint coating and equipped with a transmission shaft that connects the submersible pump to the control head, with the corresponding guide supports (separate accessory).

CONTROL HEAD

Control head connected to the motor with 3-part spacer coupling. This means the 2 components (motor or pump) can be removed separately in accordance with UNI EN 12845 – 10.1.

JOCKEY PUMP

Submersible jockey pump with 20-litre expansion vessel and its own electric control panel.

DIESEL AND ELECTRIC EN 12845 FIRE-FIGHTING SETS WITH VERTICAL TURBINE PUMPS

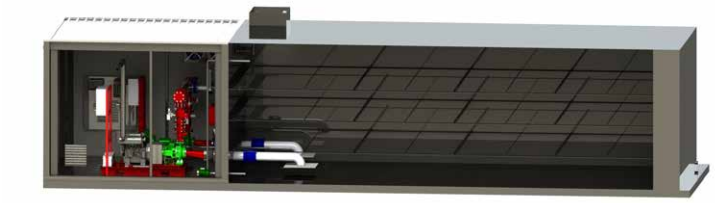
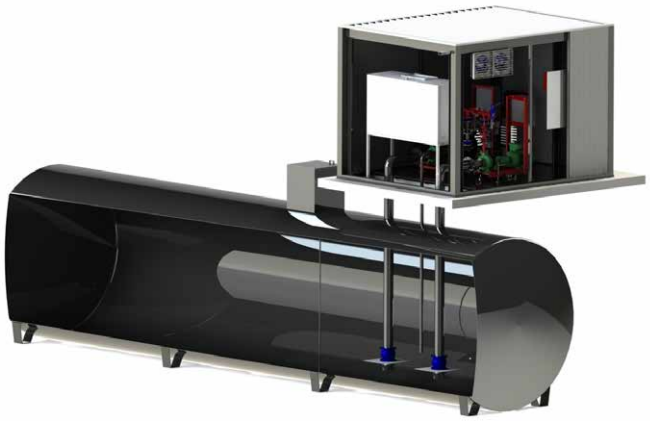
EXAMPLES OF INSTALLATION WITH 1KDN



FLOODED SUCTION INSTALLATION

The standards set down, in order of preference, the various ways in which a pump for a fire-fighting set can be installed.
End-suction horizontal pumps must be installed with flooded suction whenever possible, and the standard EN 12845 clearly defines the parameters for flooded suction installation:
- at least two thirds the effective capacity of the suction tank must be above the axial line of the pump;
- the axial line of the pump must not be more than 2 m above the minimum level of water in the supply tank.



SUCTION LIFT INSTALLATION

Suction lift installation is the alternative when flooded suction installation is not possible. Standard EN 12845, however, advises against suction lift installation and specifies that it should be considered only when flooded suction installation is not feasible.
The standard indicates a maximum distance of 3.2 m between the axial line of the pumps and the lowest point of the suction piping.
Specific priming pumps must also be installed above the main pumps (1 per main pump) to ensure that these are all primed.

EXAMPLES OF INSTALLATION WITH 1KVT

FLOODED SUCTION INSTALLATION

Standard EN 12845 recommends the use of vertical turbine pumps when flooded suction installation with end-suction horizontal pumps is not possible. Vertical turbine pumps offer the great advantage, in fact, of flooded suction installation even with an underground tank.
Thanks to the submersible pump body and the motor assembly control above the surface, they eliminate any self-priming issues, in addition to making the job of the maintenance technician much easier.

S4 - SS6 - SS7 - SS8

FIRE FIGHTING UNITS UNI STANDARDS EN 12845 WITH 4”- 6”- 7” - 8” SUBMERSIBLE ELECTRIC PUMPS

TECHNICAL DATA

Fire-fighting pump groups made according to the specifications of the European standard UNI EN 12845. Fixed fire-fighting installations-automatic sprinkler systems.
All pumps (main and jockey) are equipped with 15 meter power input cable.
The 6” - 7” - 8” pumps are fully made of AISI 304 stainless steel.

OVERVIEW OF THE UNI-EN 12845

The UNI-EN 12845, the Italian version of the European standard UNI-EN 12845, establishes the criteria for the design, installation and maintenance of sprinkler systems.
An automatic sprinkler system is designed to detect the presence of fire and extinguish it in the initial stage or to keep the flames under control until the extinction can be completed by other means. The classic sprinkler system includes:
a water supply, a group of fire pumps, control valves and a network of pipelines with sprinkler.
The main pump continues to run until it is stopped manually using the STOP button on the control panel. In the case of fire hydrant networks, you should refer to the UNI 10779 - July 07. UNI 10779, in addition to requiring the power pumps according to EN 12845, admits, in the case of activity not constantly manned, the automatic shutdown of the pumps after 20 minutes of closing the hydrants. DAB groups are suited for both sprinkler networks with manual shutdown and for hydrant networks with automatic stop.

OPERATION OF FIRE FIGHTING PUMP GROUPS AS PER UNI EN 12845

Under normal conditions (zero water demand), the system is under static pressure. On the first request of water the compensating pump is started that restores the system pressure. If the demand for water is significant (fire sprinkler opening) the system pressure drops until the two pressure switches connected in series activate the main pump. The two pressure starter switches must be calibrated so that you can start the pumps at the following pressure values:

Operating range from 4 to 160 m^3/h.

Pumped liquid clean, free of solids and abrasives, not viscous, not aggressive, not crystallised and chemically neutral, with properties similar to water.

Pumped liquid temperature range
From -15 to 70 °C.

Maximum ambient temperature + 25 °C.

Maximum operating pressure
16 bar (1600kPa) PN16.

Special executions on request
Execution with joined cable available on request.

The control panels of the sets with submerged pumps are already fitted on base for quicker installation.
The main and pilot pumps are provided as standard with a 15-metre power cable.
All the 6” and 8” electric pumps (SS6 – SS7 and SS8) are entirely in AISI 304 stainless steel.

FIRE-FIGHTING PUMP UNITS TO EN 12845 WITH VERTICAL NKV PUMPS

TECHNICAL DATA

Fire-fighting pump units manufactured in compliance with the prescriptions of European standard UNI EN 12845. Fixed fire-fighting installations – Automatic sprinkler systems

NOTES ON UNI EN 12845

UNI EN 12845, the Italian version of European standard EN 12845, establishes design, installation and maintenance criteria for sprinkler systems and it replaces the earlier Italian standards UNI 9489 and UNI 9490.

An automatic sprinkler system is designed to detect the presence of fire and extinguish it in the initial stages, or to keep flames under control until they can be extinguished fully using ancillary means.

The classic sprinkler system is composed of: a water source, a fire-fighting pump unit, a series of control valves, and a sprinklers circuit.

The main pump continues to run until it is stopped manually by pressing the STOP pushbutton on the control panel.

In the case of hydrant circuits refer to the prescriptions of UNI 10779-July 07. UNI 10779,as well as stating that fire-fighting pumps must be in compliance with the requirements of UNI EN 12845, also permits, in the case of work not constantly supervised, automatic stopping of the pumps 20 minutes after closure of the hydrants.

DAB pump sets are suitable for sprinkler installations with manual stopping and for hydrant installations with automatic stopping.

OPERATION OF EN 12845 FIRE-FIGHTING PUMP SET

In normal conditions (zero water demand) the system is maintained under static pressure.

The first demand for water results in start-up of the jockey pump, which restores system pressure. If a significant flow rate of water is demanded (opening of sprinklers), the pressure will drop until the two pressure switches connected in series trip to start up the main pump. The two start-up pressure switches must be calibrated in such a way as to start the pumps at the following pressure values.

Operating range from 4 to 29 m^3/h.

Pumped liquid clean, free of solids and abrasives, not viscous, not aggressive, not crystallised and chemically neutral, with properties similar to water.

Pumped liquid temperature range
From -15 to 70 °C.

Maximum ambient temperature + 40°C.

Maximum operating pressure
16 bar (1600 kPa) PN16.

GENERAL WARRANTY CONDITIONS

1.1 DURATION OF THE WARRANTY

DAB Pumps Spa is committed to supply Products in compliance with the agreements and free from defects that make them unsuitable for the use for which products of the same type are normally intended.
All the products, including spare parts are guaranteed against construction material and processing defects for a period of 24 months from the date of delivery or purchase. Such date shall be demonstrated by the delivery document or the invoice issued by DAB Pumps Spa. Should such documentation not be available, the 24-month period shall be calculated from the date of production indicated on the product identification plate.

1.2 WARRANTY TERMS

1.2.1 As part of the sale to distribution, wholesaler, dealer and professional channel, product conformity defects and faults must be notified in writing, under penalty of expiration of the warranty, within 8 days from the date of delivery of the product, or discovery, in case of hidden conformity defect or fault, or from the date when the buyer could have discovered the conformity defect or fault through an accurate analysis of the product, or , again, from the actual date of receipt of the claim and/or request from third party relating to the Product. All this notwithstanding the General sales conditions.

1.2.2 The product shall be sent, at the expenses of the sender to the DAB, or to one of our authorised Service Partners.

1.2.3 The DAB Service Partners network operates with the aim of minimising any negative impacts for the Customer.

1.2.4 The product sent to the Service Partner must not have been disassembled or tampered with. Submersible pumps must be delivered with the cable connected. For hygiene and safety reasons, pumps must be cleaned and disinfected before despatch.

1.2.5 The warranty terms shall be fulfilled through total replacement of the product, or replacement of some components, or free repair, or a price reduction, or, should the payment have already been made, partial return of the amount paid, taking into account the level of use of the product and its age, and only after the existence of the manufacturing defect has been confirmed by the DAB or DAB Service Partner. The latter shall also be requested to check the delivery/purchase documentation before applying the terms of the warranty.

1.2.6 The replacement of the product, or any components, shall not result in any changes to the terms of the warranty.

1.2.7 The product or the various components replaced will be scrapped by DAB Pumps Spa on behalf of its Customer who has benefited of the warranty, unless requested by the Customer to return the products. This request must be sent to the Customer Service within 5 days from the date of receipt. The shipping costs will be charged to the Customer.

1.2.8 In case of product under warranty to be repaired at the installation site (normally products that cannot be moved), DAB Pumps Spa shall make available to the requesting party its own authorised Technical Support network. If the work carried out is not covered by the terms of the warranty, any charges incurred will be debited to the party requesting the intervention.

1.2.9 The warranty does not cover any direct and indirect damages caused by DAB Pumps Products, including any costs for their removal and reinstallation, or costs for the installation of replacement products, including any products installed while the repairs are being carried out.

1.2.10 No warranty related issues shall authorise the Customer to withdraw from its contractual commitments.

1.2.11 The warranty is subjected to the compliance by the Customer with the agreed payment terms.

1.2.12 The standard warranty terms applied by DAB Pumps Spa do not affect the statutory rights of consumers pursuant to the 1999/44/EU European Directive, acknowledged in Italy with Italian Legislative Decree no. 206/2005, applicable to consumer end users.

1.3 LIMITS OF THE WARRANTY

DAB Pumps Spa shall not be liable for conformity defects and products faults in the following cases:

1.3.1 if the conformity defect or fault is the due to drawings, designs, information, instructions, software, materials, semi-finished products, component or else, supplied by the Buyer, or by any other parties on behalf of the same;

1.3.2 if the conformity defect or fault is due to product tampering, or repairs/modifications not carried out by DAB, or by third parties authorised by the same;

1.3.3 if the conformity defect or fault is due to incorrect installation of the product;

1.3.4 if the conformity defect or fault is due to a failure to protect the product, or to inappropriate protection, or to errors in the connection of the product;

1.3.5 if the conformity defect or fault is due to the use of corrosive liquids and/or any liquids not contemplated in the documentation delivered with the product;

1.3.6 if the conformity defect or fault is due to the use of liquids with the presence of suspended solids in quantities greater than what is permitted;

1.3.7 if the conformity defect or fault is due to normal wear and tear;

1.3.8 if the conformity defect or fault is due to an incorrect use of the product (e.g. overloading beyond the limits of the product);

1.3.9 if the conformity defect or fault is due to an occurrence taking place after the risks have been transferred to the Buyer;

1.3.10 if the conformity defect or fault is due to a proven shortfall or default of the electric system, the supply system, or changes resulting from environmental or climate conditions, or conditions of any other nature;

1.3.11 if all the product installation, energy network (electric and water lines) connection, use and maintenance activities have not been carried out in strict compliance with the instructions of the Instruction Booklet, or the documentation delivered with the product;

1.3.12 if the conformity defect or fault is due to improper and incorrect use of the product, not in compliance or against the indications of the User and Maintenance Booklet, or if the product is used for purposes other than its intended purpose;

1.3.13 if the conformity defect or fault is due to the installation and use of the product not in compliance with technical and safety standards;

1.3.14 if the conformity defect or fault has been caused by defects in the plant or equipment to which the product is connected;

1.3.15 if the product or goods are damaged during transport carried out by the customer or by appointed transporters;

1.3.16 Moreover, the warranty shall not apply in case of:

- use of non-original spare parts;
- regular maintenance activities, or replacement of components subjected to normal wear;
- new products, never installed and still sealed;

In general, the warranty does not cover defects not caused by objectively identified construction or material faults.

1.4. PRODUCT INSTALLED OUTSIDE COUNTRY

For products installed outside the country, the above conditions shall apply, with the understanding that the product must be sent to the local Service Partner at the expenses of the Customer. Exceptions are the products sold within the European community through traditional channels or web channels. In these cases the Customer needs After-sales assistance may contact the DAB branches or official Service Partners, where present, to receive more details about the local procedures. For the identification of the reference DAB Pumps branch, please refer to DAB Pumps website https://dabpumps.com .
